

Market Notice

Number: A1210
Date: 26 March 2010

Foreign referenced commodities will no longer be quoted anonymously

Following approval by the South African Reserve Bank, we are able to deactivate the anonymous quoting functionality currently in place on the foreign referenced commodities. As from Monday 29 March 2010 member codes will be displayed on the NUTRON depth windows similar to the physically settled grain products and included in the public broadcast message (API message no 59) to all subscribers.

By displaying the member codes, the JSE is able to provide the market makers who actively quote on the central order book with the necessary exposure which will also allow market participants who wish to transact in the foreign referenced commodities the opportunity to identify who to contact. The disclosure should also stimulate further liquidity in these fledgling products.

Should there be any further questions please contact Chris Sturgess on 011 5207299 or email chris@jse.co.za.
