Date	**06 February 2013**

JSE Remote Disaster Recovery (DR) Site Connectivity test for Equity Derivatives, Commodity Derivatives, Interest Rate and Currency Derivatives clients – 9 and 10 March 2013

JSE Clients (all Members and non-Members for all the JSE markets) that connect directly to the JSE systems are referred to Market Notices 078 and 079, A1675, F5507, Y952 issued 8 August 2012, that highlighted that all direct connected JSE Clients are required to be able to connect to the JSE's Remote Disaster Recovery (DR) Site.

Post the internal JSE Remote DR test conducted on 5 and 6 October 2012, the JSE made a decision to limit the scope of the scheduled DR test on 10 November 2012 to connectivity proving for the Equity Market Trading and Information services only.

Testing to prove connectivity to the Trading and Information services for the other JSE Markets (Equity Derivatives, Commodity Derivatives, Interest Rate and Currency Derivatives) and other services (Information Delivery Portal (IDP) and JSE website) has been scheduled for 9 March 2013. On Sunday 10 March 2013, clients will be required to prove connectivity back to JSE Productions services post the DR test on Saturday. The scope of the test will be provided in due course.

DR testing remains a client responsibility and clients who have not been able to test connectivity to the JSE's Remote DR Site are strongly advised to inform the JSE's Customer Support team as soon as possible so that the JSE can assist with a connectivity test prior to the market test on 9 March 2013.

Kindly refer any queries related to this notice to the JSE's Customer Support team on (011) 520 7777 or CustomerSupport@jse.co.za.
