COLOCATION EQUITY DERIVATIVE DISCONNECTS ON 1 AUGUST 2018 - JSE COUNTERACTIVE MEASURES IMPLEMENTED

Following Service hotline **149/2018**, we identified a content addressable memory (CAM) bug which impacted colocation connectivity to the Equity Derivatives Market on 1 August 2018. In line with the recommendations received by our 3rd party vendor, the JSE upgraded the colocation switches on Friday, 10 August 2018 to mitigate against the re-occurrence of such an incident. The upgrade was successfully tested on Saturday, 11 August 2018.

Market / Service:

JSE Equity Derivatives Market

Environment(s):

Production
