**REFERENCE NUMBER:** 161/2018

21 August 2018

### CDM, EDM AND IRM NUTRON DECOMMISSIONING TESTING FOR THE INTEGRATED TRADING AND CLEARING (ITaC) PROJECT

Clients of the Derivatives Markets are reminded that as part of the Integrated Trading and Clearing (ITaC) project, the Equity Derivatives and Currency Derivatives markets will be migrated off the Nutron platform to the new Integrated Trading and Clearing (ITaC) technology.

In order to ensure that the Commodity Derivative, Interest Rate and Spot Bond markets continue to operate successfully on Nutron after the ITaC go live, clients of these markets are encouraged to participate in testing these services with the JSE. This is to ensure that all functionality operates as expected once the Equity Derivatives and Currency Derivatives markets are decommissioned ("turned off").

Decommissioning testing is scheduled to commence 20 August 2018 through to 7 September 2018. Clients are encouraged to participate and test all trading activity and other business as usual activity performed in production.

In addition there is a mandatory dress rehearsal on Saturday, 15 September 2018 where all JSE markets will be tested and participation by all JSE clients (trading members, clearing members and information subscribers) is mandatory.

Clients wishing to participate in the Decommissioning testing should kindly contact the JSE Client Service Centre (CSC) on +27 11 520 7777 or [CustomerSupport@jse.co.za](mailto:CustomerSupport@jse.co.za) and provide the following information:

- Public IP address that you will connect from
- Member and dealer code to be used for the test
- Contact details of the person doing the testing
- Log all issues experienced during testing with [CustomerSupport@jse.co.za](mailto:CustomerSupport@jse.co.za)

**Please see overleaf** for all connectivity information pertaining to the Decommissioning tests.
