DELAY OF THE COMMODITY DERIVATIVES END OF DAY DATA PRODUCTS DISSEMINATION 3 SEPTEMBER 2018

The JSE picked up a technical problem with the production routines on the evening of Monday, 3 September 2018. The problem was due to a duplicate Silo certificate that was received and the end of day process could not continue, this resulted in the dissemination of the Commodity Derivatives (AD.Zip) file being delayed.

The duplicate Silo certificate was removed to allow the EOD process to continue and the Commodity Derivatives (AD.Zip) file was then disseminated.

As is our customary practice, the JSE will conduct further investigations of the root cause of the problem and assessing what measures to take to try and mitigate this specific type of problem from happening again.

The JSE apologises for the impact to your operations and inconvenience to your data users.

Market / Service:

JSE Commodity Derivatives End of Day Data Service

Environment(s):

Production
