

SERVICE HOTLINE

REFERENCE NUMBER: 81/2019

18 April 2019

INTEGRATED TRADING AND CLEARING (ITaC) END-TO-END STAGING ENVIRONMENT NOT AVAILABLE FROM 23-26 APRIL 2019 AND LIVE CONNECTIVITY TESTS TO PROD

In preparation for the ITaC Go Live on 29 April 2019, clients are reminded as per the ITaC Client Forum session held 10 April 2019 that the **ITaC End-To-End Staging environment will be brought down from Tuesday, 23 April 2019 – Friday 26 April 2019**. As a result of the environment being down, we will not produce any daily NLMD files for the ETE staging environment

Clients are also reminded that **during 23-25 April 2019 EDM and FXM clients are required to conduct final connectivity tests to the new ITaC production environments**. The ETE Staging environment will be down during this period to ensure clients connect to the correct environment.

New ITaC Production connectivity test summary required are as follows:-

	ITaC Trading	ITaC Real-time Market Data	ITaC Real-Time Clearing	Information Delivery Portal
	Front-end and API Login	Heartbeats and API Login	Front-end and API Login	Login and Folder access
Trading Members	x	x	x	x
Clearing Members	x	x	x	x
Live Information Subscribers		x		x
Non-Live Market Data Subscribers				x

The **ITaC End-To-End Staging** will be online and available to clients again for access from Monday, 29 April 2019 and will be refreshed and aligned to the same instrument, client and position reference data as will be in the ITaC production Trading and RTC environments post the go live cut-over activities.
