

## Treatment of Company Suspensions - FTSE/JSE Ground Rules

28 June 2018

---

In response to feedback from the January 2018 consultation on the Treatment of Suspensions, the FTSE Russell Product Governance Board has approved the following methodology change which is effective immediately (changes are highlighted in bold).

### 6.5 Suspension of Dealing\*

6.5.1 In the event that a constituent of a FTSE/JSE Africa Index, other than the FTSE/JSE Top 40 Index, is suspended, the constituent may remain in the FTSE/JSE Africa Index, at the price at which it is suspended, for up to 20 business days, whilst a suspended constituent of the FTSE/JSE Top 40 Index may remain in the Index for up to five business days. During this time FTSE/JSE may delete the constituent immediately at zero value in cases it is expected that the constituent will not recommence trading.

- If a constituent is declared bankrupt, placed under curatorship, business rescue or placed in provisional liquidation, the last traded price will be adjusted down to zero value and it will subsequently be removed from the index **with appropriate notice (typically T+2)**.
- In all other cases, if the company is a constituent of the Top 40 index, the constituent will continue to be included in the index for a period of 5 business days, If the constituent continues to be suspended at the end of that period, it will be removed from the index with T+2 notice at the last traded price.
- In all other cases, the constituent will continue to be included in the index for a period of up to 20 business days at its last traded price.
- If the constituent continues to be suspended at the end of that period, it will be subject to review and a decision will be taken to either allow the constituent to remain in the index for a further period of up to 20 business days or to remove it at zero value. In making this determination, FTSE/JSE will take into account the stated reasons for the suspension. These reasons may include announcements made by the company regarding a pending acquisition or restructuring, and any stated intentions regarding a date for the resumption of trading.
- **If the suspension period reaches 60 business days the constituent will be removed from the index at zero value at the next index review, subject to the 60th business day of suspension occurring on or before the Friday which falls four weeks prior to the index review implementation date. Where the 60th business day of suspension falls after such date the constituent will be reviewed for removal at a subsequent index review.**
- In certain limited circumstances where the index weight of the constituent is significant and FTSE/JSE determines that a market-related value can be established for the suspended constituent, for example because similar company securities continue to trade, deletion may take place at the market-related value instead. In such circumstances, FTSE/JSE will set out its rationale for the proposed treatment of the constituent at the end **of the 60 business day period**.
- **If following the end of the 60 business day period, a suspended constituent resumes**

**trading in advance of the index review lock-down period (i.e. the two week period prior to the index review effective date) in March, June, September or December, the deletion notice will be rescinded and the constituent will be retained in the index. However, where the constituent resumes trading during the index review lock-down period, the constituent will continue to be removed from the index as previously announced, but in these circumstances the deletion will instead be implemented at market value unless there are barriers that render a market value irreplicable. In this event, the company will continue to be removed at zero.**

- If a constituent has been removed from the index and trading is subsequently restored, the constituent will only be re-considered for inclusion after a period of 12 months from its deletion. For the purposes of index eligibility it will be treated as a new issue.

\*The Suspended Companies policy also applies to constituents which have a price that FTSE/JSE considers to be unreliable. This includes Indonesian constituents that have reached the minimum allowable trade price of IDR 50 per share.
