

ANNEXURE B1

SILO OWNERS/MANAGERS UNDERTAKE TO

1. Apply in writing to the Executive Officer for a permit to handle and dispatch infected wheat.
2. Provide the Executive Officer with a schedule for the movement of infected wheat/plant product (Infected wheat/plant product shall only be dispatched to commercial mills / processing plant situated outside a wheat production area)
3. Take all measures to avoid decontamination within the silo (e.g. Dust accumulation) and ensure that the immediate area surrounding the silo shall be cleared of plant of plant material and sprayed with herbicide, preventing germination of volunteer wheat or other host plants.
4. Load infected wheat / plant product only into sealed carriages (open top carriages should be sealed on top)
5. Clean the sides, top and under carriage of each road or rail truck after loading.
6. Provide effective emergency procedures in case of mass spillage of infected wheat/plant product to the satisfaction of the Executive Officer.
7. Determine the gross weight of each consignment of infected wheat/plant product before leaving the loading premises.
