SUBJECT: REQUEST FOR INFORMATION TO ASSIST WITH DETERMINATION OF LOCATION DIFFERENTIALS (LD) FOR 2020/2021 SUNFLOWER SEEDS MARKETING SEASON

Name and Surname: Raphael Karuaihe
Designation: Head - Commodities

Dear JSE Stakeholder,

Please feel free to distribute to any interested parties.

The new marketing season for sunflower seeds commencing 1 March 2020 is approaching and we kindly request all interested participants to provide input in order to ensure the published location differentials most accurately reflect the cost of transport from the registered delivery point to Randfontein.

We are attaching a separate spreadsheet with all registered suns delivery points with a special column provided for you to enter your road rates to Randfontein. The latest January 2020 rates are requested. If you prefer a different format of providing the information, please feel free to do so.

Once required information is received we will then proceed and use the formula below to determine rand per ton (RPT):

$$RPT = \frac{\text{Distance} * RLF * RPK}{\text{Payload}}$$

Where:

Distance is distance in km to the reference point,

RLF is the return load factor,

RPK is Rand per km, and

Payload is in tons.

Note that rail transport is not considered when calculating location differentials for sunflower seeds since we have not seen product move via this medium. It is also imperative market participants refer to the published distances of each registered delivery point to Randfontein to ensure these remain accurate as the distance travelled is critical in ensuring the accuracy of the calculation. The distances are also provided in the attached spreadsheet

In the absence of rail component in our calculation, the aggregate rand per ton (RPT) road component obtained above will be the actual Location Differential rates for sunflower seeds.

Our commitment stands that we always treat your submitted information with utmost confidentiality. Only aggregated information of all participants combined will be used as inputs in our model to determine the LD for sunflower seeds.

Market participants are also reminded of the new standing arrangement as per Market Notice 460/2017 dated 24 October 2017, where applications for registration and/or de-registration of oilseeds (SUNS and SOYA) delivery points opened on 1 January 2020 and close on 28 February 2020. Please make sure that you submit your requests in time for processing during the set period.

Please forward all your input to commodities@jse.co.za or contact Raphael Karuaihe/Vuyo Mpumza on 011 520 7039. All contributions should reach the JSE no later than **Wednesday, 5 February 2020**.

This Market Notice will be available on the website at <https://www.jse.co.za/redirects/market-notice-and-circulars>
