Date: 2 August 2011

JSE InfoWiz Change to the J200 Index Dissemination Interval

JSE InfoWiz subscribers are advised of a dissemination change to the FTSE/JSE Africa Top 40 index (J200). With effect from the 1 September 2011, the FTSE/JSE Africa Top 40 Index (J200) will migrate from the FTSE Pulse service to the FTSE Streaming service.

The current FTSE/JSE Africa Top 40 (J200) Pulse index outputs a snapshot price every 15 seconds while open regardless of the underlying market activity. The FTSE/JSE Africa Top 40 (J200) Streaming index will output a real time price for every index calculation result; this generally corresponds with a price movement in one or more of the underlying index constituents.

As a result of the migration to the FTSE Streaming service, the message rates for the FTSE/JSE Africa Top 40 Index (J200) are expected to be higher than for the current FTSE Pulse service and this will be accommodated by JSE InfoWiz within the current JSE InfoWiz minimum bandwidth requirements of 1.5MB. There will be no change to the current JSE InfoWiz messages (5ON Index Status and 5OU Index Values messages).

As indicated in Volume 07 – Indices Feed (FAST – UDP) of the recently issued new Equity Trading and Information Technology User Specification documents, the FTSE Streaming service includes two additional fields, the Total Return Value (TRI) and the TRI Change fields. These new fields will be disseminated via the replaced JSE InfoWiz service as part of the migration to the new technology in 2012.
