Nutron Phase 2 Workshop: Scope and roll out processes

Post the implementation of Phase 1 of the Nutron project the JSE has implemented two emergency changes to improve the performance relating to a number of critical matters that have arisen. We have spoken to a number of market participants to get a better understanding of some of the outstanding issues that they would like to see resolved in the phase 2 release of Nutron. We have combined these new items with the outstanding line items from phase 1 into a list of outstanding requests.

This list of enhancements and bug fixes is substantial and as such we would like all market participants to attend a workshop to discuss the following items:

- Agree line items to be included in the next release
- Agree release dates
- Time frames required to develop all outstanding line items
- Possible delivery dates and release dates from the JSE
- Resource constraints from a member perspective
- Roll out plans
- Communication framework to members by the JSE
- Additional Phase 1 comments and matters to be resolved

The workshop will be held on Friday 12th August 2011 at 10:00am at the JSE. A meeting request will follow shortly. Please find attached the current list of requests and enhancements.

If you have any further questions please feel free to contact us regarding this matter.
