0.13	Tshepo Modise	25 March 2019	<ul style="list-style-type: none"> Made cosmetic changes Updated Dissemination file name for data record CCD 03 in section 4
1.0	Tshepo Modise	01 May 2019	<ul style="list-style-type: none"> Accept all track changes
1.1	Tshepo Modise	30 May 2019	<ul style="list-style-type: none"> Updated dissemination time for RED 02 Updated context notes for MED 01 Updated field description for “Total Open Interest For Day” in OED 02 and SED 02 data records Updated record headings of all data records
2.0	Tshepo Modise	July 2019	<ul style="list-style-type: none"> Accepted all track changes from working version 1.1

2. DISCLAIMER

This specification is being provided to you strictly for informational purposes solely for the purpose of developing or operating systems for your use that interact with market data systems of JSE Limited. JSE reserves the right to withdraw, modify, or replace the specification (or any part thereof) at any time.

To the extent allowed by law, JSE does not (expressly, tacitly or impliedly) guarantee or warrant the availability, sequence, accuracy, completeness, reliability or any other aspect of any of the information contained in, linked to or distributed through this specification, or that the information contained therein is up to date.

3. Introduction

The aim of this document is to provide users with relevant information on the reference and statistical data provided on the day's trading activity via a standardised format. Data is provided in the form of fixed width data records which are made available via the JSE Information Delivery Portal (IDP) FTP server which does not require a direct network connection.

Users can select which data records are required from the standard layouts available. To allow for full flexibility, each market has its own set of data records. Due to the data records being produced at different times and frequencies, the subscribed set of data records will be made available be made available in one or more separate data files.

The filename standards will be as follows:

Equity Derivatives Products: DDAP.SPRD.alphacode.ED.zip

Where *alphacode* is the unique code assigned to each separate data subscriber company

Prospective subscribers must contact the Market Data Department in writing via MDSalesTeam@jse.co.za if they are interested in subscribing to any of the records.

3.1 CONFIRMATION OF IDP USER ID AND PASSWORD

1. A representative from the Client Service Centre will provide you with your sign-on and dataset name before the day you go live.
2. For security purposes, a representative from the JSE will provide you with your Password.
3. A Market Data Account Manager from the Information Services Division will contact you to confirm receipt of the Dataset, User ID and Password.
4. The onus is on you to test as soon as you have received the above mentioned information to ensure that you successfully access to the system.

Should you experience any problems relating to the information communicated to you or the actual testing of this information, please contact the under-mentioned persons for assistance:

Detailed Instruments	Equity Derivatives	Daily by	20:30	FTP	XED – Subtype 1	ED.ZIP

5. Instruments Identifiers

There are three unique instrument identifiers for derivative instruments

- [Contract Code](#)
- [ISIN](#)
- [Instrument ID](#)

Please refer to the [Instrument Reference Data Guidance Note](#) document which explains the Instrument reference data standards and changes being introduced as part of the ITaC project.

5.1 Contract Code

The Contract Code is an alphanumeric field which is derived based on certain attributes of the system. The purpose of this field is to provide a clear and user friendly description of the instrument. Examples of a contract code are:

- 01DEC15 AGL PHY ANY DN
- 01DEC15 AGL PHY ANY 23.99C
- 17DEC15 GOOGL CSH
- 01DEC15 GOOGL CSH QUANTO 23.99C
- 17DEC15 ALSI MINI

Please refer to the [Instrument Reference Data Guidance Note](#) document for a detailed explanation for all instruments.

5.2 ISIN

This is the International Security Identification Number that is assigned to each tradable instrument. This is an ISO standard for the unique identification of instruments worldwide. The following convention is applied for derivative instruments in the Equity Derivatives market:

- Futures: ZAD...
- Options: ZAD<*>...

* The fourth character for options will start with 'A' and when all the numbers are used up, will increment to 'B', then 'C' etc. This is to cater for the large number of options that are created over time.

Please refer to the [Instrument Reference Data Guidance Note](#) document for a detailed explanation for all instruments.

5.3 Instrument ID

Each instrument also has a unique number assigned to it. This number is unique across all the instruments in all the markets at the JSE.

Please refer to the [Instrument Reference Data Guidance Note](#) document for a detailed explanation for all instruments.

6. Field Formats

A field descriptor will also be given that describes the contents:

- A: Alpha only
- N: Numeric only - fields which are definitely whole numbers (integers) will show N (I)
- AN: Alpha numeric
- DATE: 8 byte date field formatted as CCYYMMDD
- B: Boolean – Formatted 'T' for True; 'F' for False

Alphabetic fields where the data is shorter than the specified number of bytes will have the space character (ASCII value 32) appended to the data to fill the field to its fixed width.

Numeric fields may be either integral or decimal depending on the nature of the data that is stored. For values that are decimal in nature, the decimal point will be present and in a fixed position, which will be indicated in the record type specifications. The decimal point will consume 1 byte of space.

Some amount of space has been left, both in the record headers and the record bodies for future expansion. This space is marked as “filler” and will be populated with the specified number of space (ASCII value 32) characters to fill the field until such time as that space is needed for other pertinent information.

7. Equity Derivatives Market

7.1 Leading Record Layout

Each record will begin with a header that contains fields common to all records. The data fields that make up each different record will be contained in the data sub-records.

Header

Sub Record 1

Common data	Record Type	Record Sub type	Run Date	Other common data	Data Fields
-------------	-------------	-----------------	----------	-------------------	-------------

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Market Number	1	1	N		1
Contract Type	2	1	A		2
Instrument Type	3	10	A		12
Record Type	13	4	A		16
Record Sub-Type	17	4	AN		20
Run Date	21	8	DATE		28
Filler	29	20	A		48

FIELD DESCRIPTIONS:

MARKET NUMBER

Unique identifier for the specific market:

Market Number	Market Identifier	Full Market Name
3	EDM	Equity Derivatives Market

CONTRACT TYPE

This indicates the type of the contract

F = Future or **Y** = Option.

INSTRUMENT TYPE

Indicates the type of the instrument underlying the contract

RECORD TYPE

The code indicating the type of information that is being disseminated e.g.: DED – Daily Equity Derivatives

RECORD SUB TYPE

The Sub Type related to a particular record sub type - e.g. DED 01

RUN DATE

The date of the dissemination runs, in the format CCYYMMDD.

FILLER

The filler allows for space between the body of the record type and the universal header for future expansion.

7.2 Daily Traded Statistics - DED Sub Type 01

The Daily Equity Derivatives Traded Statistics records are calculated at the close of each trading day.

This record only contains the contracts that were traded on the day. It provides a consolidated view of the MTM and Value Traded for the day as well as the different prices (high, low, opening and closing).

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Instrument	49	7	A		55
Date	56	8	DATE		63
Strike Price	64	17	N	10.6	80
Option Type	81	1	A		81
Spot Price	82	17	N	10.6	98
Closing Bid	99	17	N	10.6	115
Closing offer	116	17	N	10.6	132
MTM	133	17	N	10.6	149
First Price	150	17	N	10.6	166
Last Price	167	17	N	10.6	183
High Price	184	17	N	10.6	200
Low Price	201	17	N	10.6	217
Number of deals	218	14	N	14	231
Volume Traded	232	14	N	14	245
Value Traded	246	21	N	14.6	266
Open Interest	267	14	N	14	280
Volatility	281	11	N	4.6	291
ISIN	292	13	AN		304
Instrument ID	305	17	N	17	321

FIELD DESCRIPTIONS:

INSTRUMENT	Underlying instrument that the contract is written on.
DATE	Refers to the expiry date of the individual contract.
STRIKE PRICE	The price at which the buyer/holder of an option has the right to buy/sell the underlying future.
OPTION TYPE	Indicates whether this is a put or a call
SPOT PRICE	Closing price of the underlying instrument.
CLOSING BID	Closing price at which a market participant is willing to buy.

	This field will be populated for on book traded instruments, however will be blank for instruments traded off book only
CLOSING OFFER	Closing price at which a market participant is willing to sell.
	This field will be populated for on book traded instruments, however will be blank for instruments traded off book only.
MTM	Official closing price as determined by the Exchange
FIRST PRICE	First execution price of a trade the specified day.
	This field will be blank for instruments traded off book traded only.
LAST PRICE	Last execution price of a trade the specified day.
	This field will be blank for instruments traded off book traded only.
HIGH PRICE	Highest execution price of a trade on the specified day
	This field will be blank for instruments traded off book traded only.
LOW PRICE	The lowest execution price of a trade on the specified day
	This field will be blank for instruments traded off book traded only.
NUMBER OF DEALS	The total number of deals traded on the specified day.
VOLUME TRADED	The total number of contracts traded on the specified day.
VALUE TRADED	The total value of the contracts traded on the specified day.
OPEN INTEREST	The amount of open interest on the specified contract
VOLATILITY	The extent to which the return of the underlying asset will fluctuate between now

and the option's expiration. Only applicable to Options.

ISIN

An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.

INSTRUMENT ID

This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.3 Daily Market Statistics - DED Sub Type 02

This record contains market statistics for all the contracts that were traded for the Equity Derivatives market.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Derivatives Instrument Type	49	60	A		108
Contract Code	109	50	AN		158
Call/Put/Future	159	6	A		164
Deals	165	14	N	14	178
Contracts Traded	179	14	N	14	192
Nominal Value	193	21	N	14.6	213
Delta Value	214	21	N	14.6	234
Delta Value Sign	235	1	A		235
Premium Value	236	21	N	14.6	256
Open Interest	257	14	N	14	270
Contracts/Deals	271	14	N	14	284
ISIN	285	13	AN		297
Instrument ID	298	17	N	17	314

FIELD DESCRIPTIONS:

DERIVATIVES INSTRUMENT TYPE

The type of instrument that the contract represents e.g. Single Stock Future, Forex Any day Option, etc.

CONTRACT CODE

The Contract Code describes the major aspects of the instrument. It assists greatly in providing context. The field describes the following aspects of the instrument: Expiry Date, Underlying and Settlement Type

CALL/ PUT/ FUTURE

This field indicates the Contract Type (Call, Put, or Future)

DEALS

Number of deals transacted

CONTRACTS TRADED

The total number of contracts traded on the specified day.

NOMINAL VALUE

The nominal value of a trade

DELTA VALUE

The delta value of a trade

DELTA VALUE SIGN

Sign indicating the Delta value e.g. 'N' for negative value and 'P' for positive value

PREMIUM VALUE

The premium value of a trade

OPEN INTEREST	The amount of open interest on the specified contract.
CONTRACTS/DEALS	Total Contracts divided by Deals
ISIN	An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.
INSTRUMENT ID	This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.4 Weekly Market Statistics - DED Sub Type 03

This record contains market statistics for the trading day for all the contracts that were traded for the Equity Derivatives market.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Derivatives Instrument Type	49	60	A		108
Contract Code	109	50	AN		158
Call/Put/Future	159	6	B		164
Deals	165	14	N	14	178
Contracts Traded	179	14	N	14	192
Nominal Value	193	21	N	14.6	213
Delta Value	214	21	N	14.6	234
Delta Value Sign	235	1	A		235
Premium Value	236	21	N	14.6	256
Open Interest	257	14	N	14	270
Contracts/Deals	271	14	N	14	284
ISIN	285	13	AN		297
Instrument ID	298	17	N	17	314

FIELD DESCRIPTIONS:

DERIVATIVES INSTRUMENT TYPE	The type of instrument that the contract represents e.g. Single Stock Future, Forex Any day Option, etc.
CONTRACT CODE	The Contract Code describes the major aspects of the instrument. It assists greatly in providing context. The field describes the following aspects of the instrument: Expiry Date, Underlying and Settlement Type.
CALL/ PUT/ FUTURE	This field indicates the Contract Type (Call, Put, or Future)
DEALS	Number of deals transacted
CONTRACTS TRADED	The total number of contracts traded on the specified day.
NOMINAL VALUE	The nominal value of a trade
DELTA VALUE	The delta value of a trade
DELTA VALUE SIGN	Sign indicating the Delta value e.g. 'N' for negative value and 'P' for positive value
PREMIUM VALUE	The premium value of a trade

OPEN INTEREST	The amount of open interest on the specified contract.
CONTRACTS/DEALS	Total Contracts divided by Deals
ISIN	An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.
INSTRUMENT ID	This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.5 Monthly Market Statistics - DED Sub Type 04

This record contains market statistics for the month for all the contracts that were traded for the Equity Derivatives market.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Derivatives Instrument Type	49	60	A		108
Contract Code	109	50	AN		158
Call/Put/Future	159	6	B		164

Open Interest	257	14	N	14	270
Contracts/Deals	271	14	N	14	284
ISIN	285	13	AN		297
Instrument ID	298	17	N	17	314

FIELD DESCRIPTIONS:

DERIVATIVES INSTRUMENT TYPE	The type of instrument that the contract represents e.g. Single Stock Future, Forex Any day Option, etc.
CONTRACT CODE	The Contract Code describes the major aspects of the instrument. It assists greatly in providing context. The field describes the following aspects of the instrument: Expiry Date, Underlying and Settlement Type.
CALL/ PUT/ FUTURE	This field indicates the Contract Type (Call, Put, or Future)
DEALS	Number of deals transacted
CONTRACTS TRADED	The total number of contracts traded on the specified day.
NOMINAL VALUE	The nominal value of a trade
DELTA VALUE	The delta value of a trade
DELTA VALUE SIGN	Sign indicating the Delta value e.g. 'N' for negative value and 'P' for positive value
PREMIUM VALUE	The premium value of a trade

OPEN INTEREST	The amount of open interest on the specified contract.
CONTRACTS/DEALS	Total Contracts divided by Deals
ISIN	An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.
INSTRUMENT ID	This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.6 All Contracts Open Interest - DED Sub Type 05

This record type contains all active instruments, their open interest and number of contracts traded for the current day.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Contract Code	49	50	AN	50	98
Open Interest	99	14	N	14	112
Contract Traded	113	14	N	14	126
ISIN	127	13	AN	13	139
Instrument ID	140	17	N	17	156

FIELD DESCRIPTIONS:

CONTRACT CODE	The Contract Code describes the major aspects of the instrument. It assists greatly in providing context. The field describes the following aspects of the instrument: Expiry Date, Underlying and Settlement Type
OPEN INTEREST	The amount of open interest on the specified contract.
CONTRACT TRADED	The total number of contracts traded on the specified day.
ISIN	An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.
INSTRUMENT ID	This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.7 Daily Full Market Type Totals - SED Sub Type 02

This product displays the end of day total contracts traded grouped by the type of contract (e.g. Future or Option) and the underlying instrument type they represent e.g. Indices, Single Stock Futures etc. This provides a consolidated view of the MTM and Value Traded for the day.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Total number of contracts per Contract and Instrument Type	49	14	N	14	62
Total number of Deals per Contract and Instrument Type	63	14	N	14	76
Total Value of contracts per Contract and Instrument Type	77	21	N	14.6	97
Total Open Interest per Contract and Instrument Type	98	14	N	14	111

FIELD DESCRIPTIONS:

TOTAL NUMBER OF CONTRACTS PER CONTRACT AND INSTRUMENT TYPE

The total number of Contracts that fall within the Contract and Instrument type for the specified day.

TOTAL NUMBER OF DEALS PER CONTRACT AND INSTRUMENT TYPE

The total number of Deals that fall within the Contract and Instrument type for the specified day.

TOTAL VALUE OF CONTRACTS PER CONTRACT AND INSTRUMENT TYPE

The total value of the Contracts that fall within the Contract and Instrument Type for the specified day.

TOTAL OPEN INTEREST PER CONTRACT AND INSTRUMENT TYPE

The total amount of Open Interest that fall within the Contract and Instrument Type for the specified day.

7.8 Daily Full Market Overall Totals - OED Sub Type 02

The record contains the key market statistics for the day's trade. It provides a view of the day's trade at a glance. It provides a daily snapshot view of overall volume, value and deals for the entire market.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Total number of contracts for day	49	14	N	14	62
Total number of Deals for day	63	14	N	14	76
Total Value of contracts for day	77	21	N	14.6	97
Total Open Interest for day	98	14	N	14	111
Total Margin on Deposit	112	21	N	14.6	132

FIELD DESCRIPTIONS:

TOTAL NUMBER OF CONTRACTS FOR DAY	Total number of contracts for the specified day.
TOTAL NUMBER OF DEALS FOR DAY	The overall total number of Deals for the specified day.
TOTAL VALUE OF CONTRACTS FOR DAY	The total value of the Contracts for the specified day.
TOTAL OPEN INTEREST FOR DAY	The total amount of Open Interest that fall within the Contract and Instrument Type for the specified day.
TOTAL MARGIN ON DEPOSIT	The total amount of margin on deposit for the specified day.
	N.B This field will always be populated with zeros

7.9 Early MTM - MED Sub Type 01

This product provides all members, traders, clients and general public with the updated MTM information and closing prices, for instruments that meet one or more of the below criteria:

- All future contracts
- All option contracts with open interest (open interest > 0) as at 18:40. The 18h40 open interest may/may not include system exercise, abandon and close-outs trades.
- All option contracts that traded for the day on-book or off-book (traded volume on-book or off-book > 0).

FIELD DESCRIPTIONS:

CONTRACT CODE

The Contract Code describes the major aspects of the instrument. It assists greatly in providing context. The field describes the following aspects of the instrument: Expiry Date, Underlying and Settlement Type

DERIVATIVES INSTRUMENT TYPE

The type of instrument that the contract represents e.g. Single Stock Future, Forex Any day Option, etc. This is the derivative instrument type.

STRIKE PRICE	The price at which the buyer/holder of an option has the right to buy/sell the underlying future. Must display only for Options. For Futures, the strike price will zero whereas for Options, the strike price will be the strike value of the option.
CALL/ PUT/ FUTURE	This field indicates the Contract Type (Call, Put, or Future).
FUTURE EXPIRY DATE	The Contract Expiry Date for the Future.
OPTION EXPIRY DATE	The Contract Expiry Date for the Option.
MTM PRICE	Official closing price as determined by the Exchange.
MTM YIELD	Closing yield on the contract. N.B. Equity Derivatives Markets do not have yield traded instruments, therefore this field will always be blank
MTM VOLATILITY	Changes in volatility.
PREVIOUS MTM PRICE	Previous day's closing price on instrument/contract.
PREVIOUS MTM YIELD	Previous day's closing price on instrument/contract. N.B. Equity Derivatives Markets do not have yield traded instruments, therefore this field will always be blank
PREVIOUS MTM VOLATILITY	Previous day's end of day Volatility.
DELTA	The delta of the option. N.B the values can have a negative of ppositive values, <ul style="list-style-type: none"> • Positive values can be identified by a space at the beginning of the field. • Negative values can be identified by a negative sign (-) at the beginning of the field.
FIRST PRICE	First execution price of a trade the specified day.

	This field will be blank for instruments traded off book only.
LAST PRICE	Last execution price of a trade the specified day.
	This field will be blank for instruments traded off book only.
HIGH PRICE	Highest execution price of a trade on the specified day
	This field will be blank for instruments traded off book traded only.
LOW PRICE	The lowest execution price of a trade on the specified day
	This field will be blank for instruments traded off book traded only.
SPOT	Closing price of the underlying instrument.
ISIN	An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.
INSTRUMENT ID	This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.11 MTM All - MED Sub Type 02

Displays the closing price for the day, for instruments that meet one or more of the below criteria:

- All future contracts
- All option contracts with open interest (open interest > 0).
- All option contracts that traded for the day on-book or off-book (traded volume on-book or off-book > 0).

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS

7.15 Close Out Prices – Monthly - CED Sub Type 01

This data record contains the official closing prices per contract code.

N.B. The frequency of this record will be monthly to accommodate both the monthly expiries and quarterly futures closeout.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Contract Code	49	50	AN		98
Equity Code	99	7	AN		105
Price	106	17	N	10.6	122
ISIN	123	13	AN		135
Instrument ID	136	17	N	17	152

FIELD DESCRIPTIONS:

CONTRACT CODE	The code of the underlying instrument that the contract is written on.
EQUITY CODE	The code that uniquely identifies an index or instrument.
PRICE	The closing price is in ZAR.
ISIN	An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.
INSTRUMENT ID	This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.16 Margin Requirements - IED Sub Type 01

The clearing members need this report to recalculate initial market margin and for end of day balancing purposes.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Contract Code/Short Name	49	50	A		98
Expiry Date	99	8	D		106
Fixed Margin	107	11	N	11	117
Spread Margin	118	11	N	11	128
VSR	129	17	N	10.6	145
Series Spread Margin	146	11	N	11	156
ISIN	157	13	AN		169
Instrument ID	170	17	N	17	186

FIELD DESCRIPTIONS:

CONTRACT CODE/SHORT NAME

The code of the underlying instrument that the contract is written on.

EXPIRY DATE

The date the contract expires.

FIXED MARGIN

This is the fixed amount of margin per contract

SPREAD MARGIN

This is the offset margin that you will receive if two contracts are traded in the same offset group.

VSR

This is the volatility scanning range used to calculate margin for options.

SERIES SPREAD MARGIN

This is the offset margin that you will receive if two contracts are traded in the same offset group.

ISIN

An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.

INSTRUMENT ID

This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.17 Dividends - IED Sub Type 02

This record contains dividend assumptions and declared dividends for the market to recreate JSE's MTM valuations for the Single Stock Futures. It is important component in calculating the dividend value.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Contract Code	49	50	AN		98
Expiry Date	99	8	D		106
EX Date	107	8	D		114

Origin	206	11	A		216
ISIN	217	13	AN		229
Instrument ID	230	17	N	17	246

FIELD DESCRIPTIONS:

TRADE DATE	The code of the underlying instrument that the contract is written on.
CONTRACT CODE	The code of the contract name.
EXPIRY	The date the contract expires.
QUANTITY	The number of contracts traded.
STRIKE PRICE	The price at which the buyer/holder of an option has the right to buy/sell the underlying future.
CALL/PUT	Indicates whether the trade is a Put option or a call option.
SPOT PRICE	The closing price of the underlying share or index.
PRICE	The closing price of the day.
RATE	The settlement price (or rate).
ORIGIN	The trade origin of the trade leg (which book the trade was executed on or the type of deal management performed on a trade) Flag to indicate whether the deal was onscreen or off-screen.

ISIN

An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.

INSTRUMENT ID

This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.19 Volatility Surfaces - LED Sub Type 01

The data in this data record is used to determine the volatility skew (adjustment) that needs to be applied to the At-the-money volatility of an option during the daily valuation of index and single stock option contract. N.B the volatility surfaces will be disseminated daily but the inputs will be updated on an ad-hoc basis approximately every fortnight.

N.B. This data record contains both EDM and FXM Volatility Surfaces data.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Volatility Surface code	49	50	A		98
Term to Expiry	99	17	N	10.6	115
Moneyness	116	17	N	10.6	132
Volatility Adjustment	133	17	N	10.6	149

FIELD DESCRIPTIONS:

VOLATILITY SURFACE CODE

The Volatility surface code

TERM TO EXPIRY

Term to expiry is the number of days until expiry divided by 365.

MONEYNES

This is the relative position of the current price (or future price) of an underlying asset (e.g., a stock) with respect to the strike price of a derivative, most commonly a call option or a put option.

VOLATILITY ADJUSTMENT

This is the adjustment that is applied to the "at-the-money volatility" to establish the MTM Volatility.

7.20 All Contract Details - AED Sub Type 01

Contains all tradable instruments including the margins and the clearing fees.

FIELD DESCRIPTIONS:

BUSINESS DATE	The business date on which the risk calculation is triggered.
PRICING TAG	The pricing tag which is used for the risk calculation.
CONTRACT ID	This is the instrument ID which is a unique identifier that is assigned to all instruments.
CONTRACT CODE	This is a field that uniquely identifies a contract. It is a combination of contract expiry, forex pair, settlement type or contract size, strike price and option type.
ALPHA CODE	The code of the underlying instrument that the contract is written on.
EXPIRY DATE	Refers to the expiry date of the individual contract.
INSTRUMENT CLASS	This indicates the instrument class of the contract (Spot, Future, Option, CFD, Bond).
CALL/PUT	This indicates the Option type which can either be Call or Put.
STRIKE	The price at which the buyer/holder of an option has the right to buy/sell the underlying future.
CONTRACT SIZE	The amount of underlying asset represented by each contract.
CONTRACT SIZE TYPE	This indicates if the Contract is base/mini/maxi/super.
JSE INSTRUMENT TYPE	This indicates the type of the instrument underlying the contract. This is a finer grouping than the instrument class.
DELTA	The delta of the contract for the business date and price tag. N.B the values can have a negative or positive values,

- Positive values can be identified by a space at the beginning of the field.
- Negative values can be identified by a negative sign (-) at the beginning of the field.

MTM PRICE	Official closing price as determined by the Exchange.
ATM VOLATILITY %	This is the degree of variation of the trading price of the underlying instrument.
MTM VOLATILITY %	The extent to which the return of the underlying asset will fluctuate between now and the option's expiration. Only applicable to Options.
IMR	This is the fixed amount of margin per contract. N.B. The value of this field is the same value as Fixed Margin field value in the record AED 01
CSG	This is the class spread group (series) the contract belongs to.
CSMR	This is the offset margin that you will receive if two contracts are traded in the same offset group.
SSG	This is the series spread group the CSG belongs to.
SSMR	This is the offset margin that you will receive if two contracts are traded in the same offset group.
VSR	This is the volatility scanning range used to calculate margin for options.
SMR	The official IMR of the contract, in case it's a future or CFD.
1-DAY VAR %	The 1 day VaR Official value for the instrument. This attribute is stored per underlying.
LIQUIDATION PERIOD	The liquidation period for the instrument. This attribute is stored on the underlying.
AVERAGE DAILY VALUE TRADED	The ADVT value for the instrument. This attribute is stored on the underlying spot contract.

RISK SCENARIO 1	The Risk array (contract scenario exposure) in scenario 1.
RISK SCENARIO 2	The Risk array (contract scenario exposure) in scenario 2.
RISK SCENARIO 3	The Risk array (contract scenario exposure) in scenario 3.
RISK SCENARIO 4	The Risk array (contract scenario exposure) in scenario 4.
RISK SCENARIO 5	The Risk array (contract scenario exposure) in scenario 5.
RISK SCENARIO 6	The Risk array (contract scenario exposure) in scenario 6.
RISK SCENARIO 7	The Risk array (contract scenario exposure) in scenario 7.
RISK SCENARIO 8	The Risk array (contract scenario exposure) in scenario 8.
RISK SCENARIO 9	The Risk array (contract scenario exposure) in scenario 9.
RISK SCENARIO 10	The Risk array (contract scenario exposure) in scenario 10.
RISK SCENARIO 11	The Risk array (contract scenario exposure) in scenario 11.
RISK SCENARIO 12	The Risk array (contract scenario exposure) in scenario 12.
RISK SCENARIO 13	The Risk array (contract scenario exposure) in scenario 13.
RISK SCENARIO 14	The Risk array (contract scenario exposure) in scenario 14.
RISK SCENARIO 15	The Risk array (contract scenario exposure) in scenario 15.
RISK SCENARIO 16	The Risk array (contract scenario exposure) in scenario 16.

RISK SCENARIO 17	The Risk array (contract scenario exposure) in scenario 17.
RISK SCENARIO 18	The Risk array (contract scenario exposure) in scenario 18.
RISK SCENARIO 19	The Risk array (contract scenario exposure) in scenario 19.
RISK SCENARIO 20	The Risk array (contract scenario exposure) in scenario 20.
ISIN	An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.
INSTRUMENT ID	This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

7.22 Detailed Instruments - XED Sub Type 01

This record contains all active instruments on the day irrespective of whether they were traded or not with additional reference data fields.

FIELD NAME	START POS	LENGTH	DATA TYPE	NUMERIC FORMAT	END POS
Derivative Instrument Name	49	70	AN		118
Derivative Instrument Type	119	60	A		178
Contract Code	179	50	AN		228
ISIN	229	13	AN		241
Instrument ID	242	17	N	17	258
Volatility Surface Code	259	50	A		308

FIELD DESCRIPTIONS:

DERIVATIVE INSTRUMENT NAME

This is the Contract level name of the instrument, which provides basic information about the type of instrument. This name will appear on several different tradable instruments with different expiry dates and strike prices.

DERIVATIVE INSTRUMENT TYPE

The type of instrument that the contract represents e.g. Single Stock Future, Forex Any day Option, etc.

CONTRACT CODE

The code of the underlying instrument that the contract is written on.

ISIN

An International Securities Identification Number (ISIN) uniquely identifies a security. An ISIN consists of three parts: a country code, an alpha-numeric national security identifier, and a check digit. An ISIN is unique per instrument.

INSTRUMENT ID

This is a unique identifier that is assigned to all instruments, across all markets at the JSE. This is the universal instrument master ID.

VOLATILITY SURFACE CODE

The Volatility surface code
