2 DISCLAIMER

This manual has been produced as a guide at a given point of time and in an abbreviated form, to the key provision of The JSE Ltd Rules and directives, Stock Exchanges Act and Related legislation.

Given the compressed and dated nature of the contents of a document such as this, it should not be construed as the full and official interpretation of the Act, Rules and Directives; and The JSE Ltd does not accept any responsibility or liability for any errors or omission in the formulation of this manual, nor for any consequential claims arising there from. Accordingly, The JSE Ltd accepts no responsibility for any transaction entered into as a result of the contents herein.

3 INTRODUCTION

The aim of the Dissemination system is to provide users with raw data on daily trading and share movements. All information offered for dissemination is extracted from the relevant JSE systems, and held in a central database. Each user can specify the type of records they require from the standard layouts available. The users can get their data via FTP or Leased line connection.

Closing Price information is available at 18:30 and 20:00 each business day.

Market snapshots of trades and Values are available at 10:30, 13:00 and after 17:00 each business day.

The user must inform the Information Products Sales Division in writing of the record types they would like to receive. **Please note that the field descriptions together with the relevant Values (where applicable) including examples are provided in the glossary of terms.**

3.1 CONFIRMATION OF USER ID AND PASSWORD

1. A representative from the Customer Services Department will provide you with your Sign-on and Dataset name before 11am on the day you go live.
2. For security purposes, a representative from the IT Open System Department will provide you with your Password.
3. An Account Manager/Officer, from Information Products Sales Division will contact you to confirm receipt of the Dataset, User ID and Password.
4. The onus is on you to test as soon as you have received the above mentioned information to ensure that you will gain access to the system.

Should you experience any problems relating to the information communicated to you or the actual testing of this information, please contact the under-mentioned persons for assistance:

5 JSE PRINT SEQUENCE

The JSE provides a print sequence in the DS05 records, to assist the Media with the layout and sequence of the sectors and instruments. As a general rule, only the sectors are printed, with all the instruments belonging to that sector, save for Mining sector. With the Mining sector, the sub-sectors are printed and the instruments listed under the sub-sector. Attached is table of the print sequence. The sequence number relates to the sequence in which it should be printed.

Printing Sequence	Mining Sub-Sectors	Seq #	Sector Code	Alpha Code
Oil and Gas		010	0001	
-Oil and Gas		020	0500	
-Oil & Gas Producers		030	0530

6 STATISTICAL RULES

Record Types

This will apply to all statistic record types at all frequencies e.g. equity statistics, sector statistics. It will not apply to the record types under the general section or record types that only contain reference data.

Trade Type Statistic Rules

Displayed below are the rules that are used to calculate the following base statistics.

- Volume
- Value
- Number of Deals
- High/Low Price

Statistics Rules

Note: T refers to the date on which the trade was matched in the case of automatic trades and the date on which the trade was entered into the trading engine in the case of off book trades.

#	Scenario	• Applicable Trade Types	Statistics Impact
1	New Trades (including Back Dated Off Book Trades)	<ul style="list-style-type: none"> • On Book Trade Types • Published Off Book Trade Types 	<ul style="list-style-type: none"> • Increment Number of Deals for T. • Increase Value and Volume for T. • On Book Trades and NX trades have an impact on the High/Low Price for T
2	Same day cancellation of Trades (including Back Dated Off Book Trades)	<ul style="list-style-type: none"> • On Book Trade Types • Published off Book Trade Types 	<ul style="list-style-type: none"> • Increment Number of Deals for T. • Decrease Value and Volume for T. • On Book Trades and NX trades have an impact on the High/Low Price for T
3	Next day cancellation of Trades (including Back Dated Off Book Trades) where the Original Trade is found	<ul style="list-style-type: none"> • On Book Trade Types • Published Off Book Trade Types 	<ul style="list-style-type: none"> • Increment Number of Deals for T -1. • Decrease Value and Volume for T -1 • On Book Trades and NX trades have an impact on the High/Low Price for T-1.
4	Next day cancellation of Trades (Back Dated Off Book Trades) where the Original Trade is NOT found	<ul style="list-style-type: none"> • On Book Trade Types • Published Off Book Trade Types 	<ul style="list-style-type: none"> • No impact on the following: <ul style="list-style-type: none"> ○ Number of Deals ○ Value and Volume ○ High/Low Price
5	Same Day Cancellation of a PC / LC / NC Trade where the Initial PC / LC / NC corrected a previous day trade	<ul style="list-style-type: none"> • Published Off Book Trade Types 	<ul style="list-style-type: none"> • Increment Number of Deals for T -1. • Increase Value and Volume for T -1 • No impact on the High/Low Price statistics.
6	Same Day Cancellation of a PC / LC / NC Trade where the Initial PC / LC / NC did not correct a previous day trade	<ul style="list-style-type: none"> • Published Off Book Trade Types 	<ul style="list-style-type: none"> • No impact on the following: <ul style="list-style-type: none"> ○ Number of Deals ○ Value and Volume ○ High/Low Price

#	Scenario	• Applicable Trade Types	Statistics Impact
7	Next day cancellation of a PC / LC / NC Trade	• Published Off Book Trade Types	• No impact on the following: <ul style="list-style-type: none"> ○ Number of Deals ○ Value and Volume ○ High/Low Price
8	Trades of Non-Published Trade Types, irrespective of the trade scenario	• Non-Published Off Book Trade Types	• No impact on the following: <ul style="list-style-type: none"> ○ Number of Deals ○ Value and Volume ○ High/Low Price

The table below summarises the trade scenarios and the statistics dates impacted.

#	Scenario	Statistics Date
1	<ul style="list-style-type: none"> • New Trades (including Back Dated Trades) • Same day cancellation of Trades (including Back Dated Trades) • Next day cancellation of Trades where the Original Trade is NOT found • Same day cancellation of an PC / LC / NC Trade where that PC / LC / NC did not correct a trade made the previous day • Next day cancellation of a PC / LC / NC Trade 	T
2	<ul style="list-style-type: none"> • Next day cancellation of Trades (including Back Dated Trades) where the Original Trade is found • Same day cancellation of a PC / LC / NC Trade where that PC / LC / NC did correct a trade made the previous day 	T-1
3	<ul style="list-style-type: none"> • Next day cancellation of Trades where the Original Trade is NOT found • Same Day Cancellation of a PC / LC / NC Trade where the Initial PC / LC / NC did not correct a previous day trade • Next day cancellation of a PC / LC / NC Trade • Trades of Non-Published Trade Types, irrespective of the trade scenario 	No impact to Statistics

7 GLOSSARY OF TERMS

12 Months Percentage Move	<p>Percentage movement of the warrant in the last 12 months.</p> <p>The calculation for this measurement is as the same as the measurement 'Percentage Closing Price Change'</p>
Adjusted High Trade Price WE 01, WE 04, ME 01, ME 04, EA 01, EA 03	<p>The adjusted daily high trade price for the week/month/year, per instrument.</p> <p>I.e. the maximum adjusted trade price for Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
Adjusted High Trade Price Date WE 02, ME 02, EA 02	<p>The date on which the adjusted high trade price for the week/month/year was attained, per instrument.</p> <p>I.e. trade date for the maximum adjusted trade price for Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
Adjusted Low Trade Price WE 01, WE 04, ME 01, ME 04, EA 01, EA 03	<p>The adjusted daily low trade price for the week/month/year, per instrument.</p> <p>I.e. the minimum adjusted trade price for Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
Adjusted Low Trade Price Date WE 02, ME 02, EA 02	<p>The Date on which the Adjusted Low Trade Price for the week/month/year was attained, per instrument.</p> <p>I.e. trade date for the minimum adjusted trade price for Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
AND / OR? Default?	This represents the Link Operator between Option 1 and Option 2,
Authorised Capital (Rands)	The total rand Value of the authorised capital for a company.
Average Number of Days Instrument Traded DE 03, WE 02, ME 02, EA 02	The Average number of Days an Instrument traded for the week/month/year/12 months, excluding non-published trade types.
Board	Board the Instrument trades on:

BoardCode	BoardName
Main	Main Board
VCM	Venture Capital Market Board
DCM	Development Capital Market Board
AltX	Alternative Exchange Board
ADB	Agricultural Derivatives Board
FDB	Financial Derivatives Board
YieldX	YieldX Board
NSXMain	Namibian Main Board
BEE	BEE Board

Broadcast Action **Update** Identifies the action to be taken by customers on receipt of a message.

Length: 1
Format: Alphanumeric
ISO Standard N/A

The field can have the following Values:

'A'	The information contained in the message is new and should be added
'C'	The information contained in the message is changing previously advised information
'D'	The information contained in the message is deleting previously advised information
'F'	The information contained in the message is part of a full data download – the action to be taken will depend on the way in which customer's systems are set up to receive this download.

Buyer Price
WE 01, ME 01, EA 01 The latest cash offer to buy a share for the week/month/year (same as Last Best Bid)

CA Serial Number This reflects the CA Serial Number of the Corporate Action. It is a unique number that identifies a specific Corporate Action.

Call or Put Call: Holder of warrant entitled to buy underlying security
Put: Holder of warrant entitled to sell underlying security

Capital Introduced The Rand value of the capital introduced by an issuing company when an instrument was listed on the JSE.

Capital Raised Prior to Listing The amount of capital, quoted in Rands, which was raised prior to the listing on the JSE.

Capital Payment Yield The annualised rolling capital payments divided by the closing price, per Instrument. This is similar to the dividend yield but only includes capital payments.

Capital Structure Status This indicates the status of the capital structure of an Instrument on a specified date.

C	Current
F	Future
H	Historical
T	Terminated

Charge Structure Code The code indicating the type of charge applied when an instrument is traded.

B1	S A Reserve Bank
C1	Debentures (convertible)
C2	Loan Stock with hidden convertibility
D1	Debentures (non-convertible)
K1	Kruger Rands

NC	No Charge
O1	Ordinary and preference Instrument instruments (cents)
O2	Special preference instruments
O3	AltX
O4	Warrants
O5	JSE Unlisted
P1	0.1% brokerage – non convertible debentures
P2	0.2% brokerage – non convertible debentures
P3	0.3% brokerage – non convertible debentures
P4	0.4% brokerage – non convertible debentures
P5	0.5% brokerage – non convertible debentures
P6	0.6% brokerage – non convertible debentures
R1	Registration only
UN	Unknown

Class of Warrants

Warrant Class refers to the type of the underlying securities, e.g. Index Class would be a warrant with an underlying security being an Index (i.e. TOPI)

Class Code	Class Description
SE	SINGLE INSTRUMENT ISSUES (underlying is a single stock)
EB	INSTRUMENT BASKETS (underlying is stock basket)
IW	INDEX WARRANTS (underlying is an Index)
BW	BOND WARRANTS (underlying is a Bond)
IN	INDEX NOTES (underlying is an Index note)

Closing Price a Year Ago

The adjusted closing price a year ago

Closing Price Change In Cents

DE 01, DT 01, DT 02, VA 01, VO 01, WE 01, WT 01, WT 02, ME 01, MT 01, MT 02, EA 01, AT 01, AT 02

The closing price variation of an instrument for a period quoted in cents.

Closing Price for last trading day in current day/week/month/year - Adjusted Closing price for last trading day in previous day/week/month/year for every instrument.

Note: Zero closing prices not included in calculation. Instead uses the previous closing price > 0

Closing Price Three Months Ago

The adjusted closing price three months ago

Company Alpha Code

The alpha code of the company

Company Country Code

The code of the country of the company

Company Listing Date

The date on which the company was listed

Company Name

The full name of the issuing company of the instrument

Company Numeric Code	Each company is assigned a unique number, to which their Instrument is linked. A company can, under certain circumstances, list different instruments under multiple business relationships (roles) with the JSE. In this situation, the company will have more than one numeric code linked to the different instruments.
Company Short Name	The abbreviated version of the company name
Company Status	The code indicating the status of the company on the specified date.

C	Current
F	Future
H	Historical
T	Terminated
S	Suspended

Corporate Action Type Valid Values are:

- AS = Additional Instruments – Acquisition
- BS = Share Buybacks – Specific
- CB = Change Board
- CD = Cash Dividend
- CI = Capitalisation Issue
- CM = Full Redemption
- CO = Consolidation
- CP = Capital Payment
- CR = Capital Reduction
- CV = Conversion of Securities
- GB = Share Buybacks – General
- GI = General Issue Instruments for Cash
- IC = Increase in Authorised Share Capital
- IL = Liquidation Distribution
- IS = Special Dividends
- IT = Interest Payments
- MB = New Listing (non Warrants)
- MO = Minority Offers
- NC = Name Change
- CF = Conditional Offer
- OL = Odd Lot Offer
- PR = Partial Redemption
- PV = Par Value Change
- RL = Reverse Take-Over Listing
- RT = Rights / Claw Back Offer
- SA = Scheme of Arrangements
- SC = Scrip Dividend
- SD = Subdivision
- SE = Scrip Dividend – Additional Instruments
- SI = Specific Issue of Instruments for Cash
- SL = Suspension Lifted
- SO = Share option scheme/ Exercise of options
- SS = Share Incentive Scheme
- ST = Sector Transfer
- SU = Suspensions – Company and/or JSE Initiated
- TE = Termination Company or/and JSE Initiated
- TU = Take-up Rights Offer
- UB = Unbundling

- UO = Unconditional Offer
- VW = Voluntary Winding-Up
- WD = Withdrawal of Listing
- MW = Listing of a new Warrant
- RI = REIT Distribution
- RE = Electable REIT Distribution

Cover Ratio The ratio, which determines the number of warrants required to be exercised in relation to the underlying securities.

Current Closing Price The last cash sale price of the day as per the prices board.

Declaration Type This indicates which financial year total is contained in the record type.

Valid values:

DI	Dividend
EA	Earnings
CA	Capital Payments
IN	Interest Payments

Declared Dividend per Share The Dividend payment per share (DDPS) declared by a company, in cents.

Declared Earnings Per Share (Cents) The Headline earnings per share declared (DHEPS) by the listed instrument, in cents.

Note: Where no HEPS is declared, then the AHEPS Values disseminated by the JSE will be zero.

Declared REIT Distribution per share WD 01 The REIT distribution per share declared by a company, in cents.

Delisting Date The date on which an instrument was de-listed.

Dividend Declaration Date The date on which a company declared a dividend.

Dividend Declaration Period The period in the financial year in which a dividend was declared

Dividend Flag This indicates what kind of dividend was declared.

F	Final
I	Interim
M	Maiden
S	Special

Dividend in Specie Indicates whether the corporate action is a dividend in specie.

Dividend Number The number of a particular dividend as declared by the company.

Dividend Payment Date The date on which the dividend will be paid out by the issuing company will be given.

Dividend Yield Indicator	This field will indicate an '&' (ampersand), if the dividend yield has been affected by the fact that a dividend has been declared.
Earnings Declaration Period	The period in the company's financial year in which the earnings were declared.
Effective Date	The date on which the change becomes effective.
Effective Time	The time from which an Instrument's status changed in the format HHMMSS.
Event Type	This reflects the Corporate Action Event Type which generates the change to the Instrument / share holding. e.g. SD (Subdivision), CD (Cash Dividend), NC (Name Change) etc.

Event type	Description
MB/TE	MW
CA	This has been discontinued
SO	Now Includes issue of shares as well as exercise of options
AS	Additional instruments - Acquisition
BS	Share buybacks – Specific
CB	Change Board
CD	Cash Dividend
CI	Capitalisation Issue
PR	Partial Redemption
CO	Consolidation
CP	Capital Repayment
CR	Capital Reduction
CV	Conversion of Securities
SO	Exercise of Options
GB	Share buybacks - General
GI	General Issue of Instruments for Cash
IC	Increase in Authorised Share Capital
IL	Liquidation Distribution
IS	Special Dividend
IT	Interest Payment
MB	New Listing
MO	Minority Offer
NC	New Listing
CF	Conditional Offer
OL	Odd Lot Offer
CM	Full Redemption
PV	Par Value Change
RL	Reverse Listing
RT	Rights / Claw Back Offer
SA	Scheme of Arrangement
SC	Scrip Dividend
SD	Subdivision
SE	Scrip Dividend - Additional Instruments
SI	Specific Issue of Instruments for Cash
SL	Suspension Lifted
SS	Share Incentive Scheme

ST	Sector Transfer
SU	Suspension - Company and/or JSE initiated
TE	Termination - Company or JSE initiated
TU	Take-up Rights Offer
UB	Unbundling
UO	Unconditional Offer
VW	Voluntary Winding-Up
WD	Withdrawal of Listing
MW	Listing of Warrants

Event which Caused
Change

The code indicating the type of change to an Instrument.

Values are:

001	New listing
002	Raising capital
003	Share split
004	Share consolidation
005	Capitalisation issue
006	Raising capital - acquisition of unlisted company
007	Final redemption
008	Partial redemption
009	Reduction of capital - no pay out - reduce number of shares
010	Reduction of capital - no pay out - reduce par Value
011	Capitalisation issue, bonus share offer, no dividend
012	Termination
013	New scrip issued with no other change
014	Raising capital - share incentive scheme
015	Raising capital - bonus shares
016	Instrument name change
017	Change of authorised capital
018	Share swapping
019	Raising capital - share swapping
020	Partial conversion
021	Final conversion
022	"Par Value " of a share has been increased or decreased in number
023	Acquisition of a listed company
024	Company name override change
025	Instrument sector link change
026	Instrument company link change
027	Index constituent change
028	New scrip issued on company's request
029	Instrument description field(s) have changed
030	Listing Indicator Change

031	STK Exchange Indicator Change
-----	-------------------------------

Ex Dividend Indicator	<p>This indicates if an instrument is currently trading 'ex dividend', i.e. the seller and not the purchaser is entitled to receive the dividend.</p> <p>Values are: Y Yes N No</p> <p>"Yes" means that the seller and not the purchaser is entitled to the dividend being paid. The share will remain Ex dividend for duration of 5 business days, starting on Ex-Date and ending on Record Date.</p> <p>If the indicator is "No", this should then be ignored – only show indicator when it's Yes.</p>
Exchange	<p>The exchange the instrument/sector is linked to.</p> <ul style="list-style-type: none"> • JSE - Johannesburg Stock Exchange • LSE - London Stock Exchange • NSX - Namibian Stock Exchange
Expiry Date	Date on which the warrant expires
Filler	Space or Blank. This field is reserved for future usage.
Final Declared Earnings	<p>The Final Headline earnings per share declared (DHEPS) by the listed instrument in cents.</p> <p>Note: Where no HEPS is declared, then the AHEPS Values disseminated by the JSE will be zero.</p>
Financial Year End	The financial period to which the dividend or earnings relate.
Foreign Status	This field will be populated if an instrument is classified as 'Foreign Inward Listed' or 'African Inward Listed' by the South African Reserve Bank. It will be blank for all other instruments.
Foreign Tax Percentage	The percentage of foreign withholding tax deducted in the foreign jurisdiction, if applicable
Foreign Tax Reclaim Percentage	The foreign withholding tax that can be reclaimed by South African Shareholders
High Trade Price DE 01, CR 01	<p>The Highest Trade Price for the Day. (If only one Trade took place for the Day for the Instrument, the Close, High and the Low Trade Price will be equal. If no trades took place for the Day, the Closing Price will be carried forward from the Last Day the Instrument Traded.) Applicable to every instrument.</p> <p>I.e. the high trade price for Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
Index Constituent	This indicates if the specified instrument is a constituent of an Index
Index Name	The full description of the index.
Index Short Name	The abbreviated version of the index name.

Instruction Indicator	Indicates whether the instruction is N, C or D for New, Changed or Deleted, respectively.
Instrument 12 Month High Dividend Cover DE 04	<p>The Highest Dividend Cover for an Instrument over a 12 Month period.</p> <p>MAX (Annualised Rolling Headline Earnings per Instrument / Annualised Rolling Dividends per Instrument) for every Instrument over a 12 Month period</p>
Instrument 12 Month Low Dividend Cover DE 04	<p>The Lowest Dividend Cover for an Instrument over a 12 Month period.</p> <p>MIN (Annualised Rolling Headline Earnings per Instrument / Annualised Rolling Dividends per Instrument) for every Instrument over a 12 Month period</p>
Instrument Adjusted Average Volume Traded DE 03, WE 02, ME 02, EA 02	<p>The Average Adjusted Volume Traded for every Instrument for all Trading Days in a Week/Month/Year/12 Months period.</p> <p>SUM(Instrument Adjusted Volume Traded) for every Instrument for every Trading Day in the period / Number of Trading Days in period</p>
Instrument Adjusted Payment	<p>Adjusted Payment per Instrument based on Payment Type</p> <p>(The last declared dividend per instrument included in the rolling dividend calculation) * smoothing factor</p>
Instrument Adjusted Headline Earnings	<p>Adjusted Headline Earnings per Instrument</p> <p>(The last declared earnings per instrument included in the rolling headline earnings calculation) * smoothing factor</p>
Instrument Adjusted Overactive Volume Traded WE 04	<p>The Volume Traded for all Trading Days in a Week divided by the Average Adjusted Volume Traded over the last 12 Months.</p> <p>SUM(Trade Volume) for every Instrument for all Trading Days in a Week DIVIDE BY SUM((Adjusted Trade Volume) for every Instrument for all Trading Days for 12 Months) / 4)</p>
Instrument Adjusted Overactive Volume Traded Indicator (Daily) DE 06	<p>This indicates if the Volume of Instruments Traded on a Trading Day is more than 50% Higher than the 10 Trading Day Moving Average.</p> <p>IF SUM(Instrument Volume Traded) for every Instrument on a Trading Day >= SUM(((Instrument Volume Traded) for every Instrument for all Trading Days for all 10 Trading Days) / 10)) * 1.5 THEN Instrument Adjusted Over Active Volume Indicator = Y ELSE N</p> <p>Values are:</p> <ul style="list-style-type: none"> • Y - Yes • N – No
Instrument Adjusted Volume Traded WE 01, WE 04, ME 01, ME 04, EA 01, EA 03	<p>Adjusted Volume Traded for every Instrument for every Trading Day in the week/month/year period.</p> <p>SUM (Adjusted Instrument Volume Traded for every Instrument for every Trading Day in the week/month/year)</p>
Instrument Alpha Code	All instruments traded on the market are identified by an alpha code. This field is alphanumeric and can be up to 6 characters long.

Instrument Annualised Rolling Adjusted Dividend WE 03, ME 03	Annualised Rolling Adjusted Dividend per Instrument (Rolling Dividend per Instrument * 12) / Number of Months
Instrument Annualised Rolling Adjusted Payment	Annualised Rolling Adjusted Payment per Instrument based on Payment Type (No Value for when the Payment Type is SPECDIV) (Rolling Dividend per Instrument * 12) / Number of Months
Instrument Annualised Rolling Adjusted Dividend Cover DE 03, WE 03, ME 03, EA 03	Annualised Rolling Headline Earnings per Instrument / Annualised Rolling Dividends per Instrument, for every Instrument
Instrument Annualised Rolling Adjusted Headline Earnings WE 03, ME 03	Annualised Rolling Adjusted Headline Earnings per Instrument, for the last 4 quarters (Rolling Headline Earnings per Instrument * 12) / Number of Months
Instrument Annualised Rolling Adjusted Headline earnings	The Annualised Rolling Adjusted Headline Earnings per Instrument for the last 4 quarters. (Rolling Headline Earnings per Instrument * 12) / Number of Months
Instrument Average Number of trades WE 02, ME 02, EA 02	The Average number of Trades that took place for a week/month/year period for every Instrument. SUM (Instrument Number of Trades) for every Instrument for every Trading Day in the period / Number of Trading Days in week/month/year
Instrument Average Value Traded DE 03, WE 02, ME 02, EA 02	The Average Value Traded for every Instrument for a Week/Month/Year/12 Months period. SUM(Instrument Value Traded) for every Instrument for every Trading Day in the period / number of trading days in the period
Instrument Closing Price	The Instrument Closing Price is the closing auction price, a period based Volume Weighted Average Price (VWAP) price or the last automatic trade price. Note: If there is no closing price on the day, the previous closing price > 0 is used.
Instrument Declared earnings adjusted – financial year WE 03	The total Declared Headline Earnings for the applicable Financial Year, adjusted for changes due to relevant Corporate Actions. SUM(Adjusted Headline Earnings per Instrument) as declared per Quarter in a Financial Year per Instrument
Instrument Dividend Yield DE 01, WE 03, ME 03, EA 03	The Annualised Rolling Dividends per Instrument divided by the Closing Price, per Instrument * 100. Annualised Rolling Dividends per Instrument / (Closing Price / Price Divisor) for every Instrument Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0

Instrument Earnings Yield DE 01, WE 03, ME 03, EA 03	<p>The percentage of the purchase price that will be recouped in Earnings per Year per Instrument</p> <p>Annualised Rolling Headline Earnings per Instrument / (Closing Price / Price Divisor) for every Instrument</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument Full Name	The full Instrument name
Instrument Gain/Loss Indicator DE 01, WE 01, ME 01, EA 01	<p>This indicates if there was a Closing Price Gain or Loss for the Day/Week/Month/year for every Instrument.</p> <p>IF Closing Price for Last Trading Day in Current Day/Week/Month/Year > Previous Adjusted Closing Price for Last Trading Day in Previous Day/Week/Month/Year AND Closing Price for Last Trading Day in Current Day/Week/Month/Year > 0 THEN Gain Loss Indicator = "G"</p> <p>ELSE IF</p> <p>Closing Price for Last Trading Day in Current Day/Week/Month/Year < Previous Adjusted Closing Price for Last Trading Day in Previous Day/Week/Month/Year AND Closing Price for Last Trading Day in Current Day/Week/month/year > 0 THEN Gain Loss Indicator = "L"</p> <p>ELSE IF</p> <p>Closing Price for Last Trading Day in Current Day/Week/Month/Year = Previous Adjusted Closing Price for Last Trading Day in Previous Day/Week/Month/Year THEN Gain Loss Indicator = "N" - for all Instruments</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument Highest Dividend Yield 12 months DE 04	<p>The Highest Dividend Yield for an instrument over the past 12 month period.</p> <p>MAX (Annualised Rolling Dividends per Instrument / (Closing Price / Price Divisor)) for every Instrument over a 12 Month period</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument Highest Earnings Yield 12 Months DE 04	<p>The Highest Earnings Yield for an Instrument for the past 12 Months.</p> <p>MAX (Annualised Rolling Headline Earnings per Instrument / (Closing Price / Price Divisor)) for every Instrument for the past 12 Months</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument Highest REIT Distribution Yield 12 Months DE/DEE Sub Type 04	The Highest REIT Distribution Yield for an instrument over the past 12 month period.
Instrument Last Best Bid DE 01	The Last Best Bid is determined by the Best Bid published at the same time that the first Closing Price is published for the day.

Instrument Last Best Offer DE 01	The Last Best Offer is determined by the Best Offer published at the same time that the first Closing Price is published for the day.
Instrument Lowest Dividend Yield 12 months DE 04	<p>The Lowest Dividend Yield for an Instrument over a 12 Month period.</p> <p>MIN (Annualised Rolling Dividends per Instrument / (Closing Price / Price Divisor)) for every Instrument over a 12 Month period</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument Lowest Earnings Yield 12 Months DE 04	<p>The Lowest Earnings Yield for an Instrument over the past 12 Months.</p> <p>MIN (Annualised Rolling Headline Earnings per Instrument / (Closing Price / Price Divisor)) for every Instrument for a 12 Month period</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument Lowest REIT Distribution Yield DE/DEE Sub Type 04 Instrument Market Capitalisation DE 03, WE 02, ME 02, EA 02	<p>The Lowest REIT Distribution Yield for an Instrument over a 12 Month period.</p> <p>The Instrument's number of listed shares in the market, multiplied by it's Closing Price.</p> <p>(Instrument Listed Shares * Closing Price per Instrument)/Price Divisor IF Price Type = % then DIVIDE above by 10000 ELSE DIVIDE above by 100 as per the price divisor.</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument Moving 12 Month High Price Earnings Ratio DE 04	<p>The Highest Price Earnings Ratio over a 12 Month period for every Instrument.</p> <p>MAX (Closing Price / Annualised Rolling Headline Earnings per Instrument) for every Instrument over a 12 Month period</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument Moving 12 Month Low Price Earnings Ratio DE 04	<p>The Lowest Price Earnings Ratio for a 12 Month period per Instrument.</p> <p>MIN (Closing Price / Annualised Rolling Headline Earnings per Instrument) per Instrument for a 12 Month period</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Instrument New High Indicator DE 03	<p>This indicates if an Instrument has attained a new high trade price on the specified Day since listing.</p> <p>Compare current day's high trade price to the latest adjusted new high trade price since listing. If current day's high trade price > latest adjusted new high trade price since listing then set newhighindicator = Y else set newhighindicator = N</p>

Instrument New High Trade Price NH 01	<p>The Highest Trade Price for an Instrument since date of listing.</p> <p>Compare current day's high trade price to the latest adjusted new high trade price since listing. If current day's high trade price > latest adjusted new high trade price since listing then set newhightradeprice = actualhightradeprice else set newhightradeprice = existing new high trade price</p>
Instrument New Low Indicator DE 03	<p>This indicates if an Instrument has attained a new Low Trade Price on the specified Day since listing.</p> <p>Compare current day's low trade price to the latest adjusted new low trade price since listing. If current day's low trade price < latest adjusted new low trade price since listing then set newlowindicator = Y else set newlowindicator = N</p>
Instrument New Low Trade Price NL 01	<p>The Lowest Trade Price for an Instrument since date of listing.</p> <p>Compare current day's low trade price to the latest adjusted new low trade price since listing. If current day's low trade price < latest adjusted new low trade price since listing then set newlowtradeprice = actualallowtradeprice else set newlowtradeprice = existing new low trade price</p>
Instrument Note	This indicates that a note has been loaded pertaining to the Instrument
Instrument Number of Trades DE 02, CR 01, WE 01, ME 01, EA 01	The number of Trades that took place for a Day/Week/Month/Year period for every Instrument. This excludes Non-Published Trade Types.
Instrument Numeric Code	All instruments traded on the market are identified by a unique numeric code.
Instrument Overactive Volume Traded (Daily) DE 06	<p>The Total Volume Traded on a Trading Day divided by the Average Adjusted Volume Traded over the last 10 Trading Days.</p> <p>Instrument Total Volume Traded for every Instrument on a Trading Day / (SUM((Instrument Adjusted Volume Traded) for every Instrument for all Trading Days for 10 Trading Days) / 10)</p>
Instrument REIT Distribution Yield DE/DEE 01, WE 0301, ME 03	$(\text{Annualised Rolling Adjusted REIT Distribution} / \text{Closing Price}) * 100$
Instrument Report Name	The version of an instrument name used on reports and online facilities.
Instrument Short Name	The abbreviated version of an instrument name
Instrument Status	This indicates the current status of an instrument.

Values are:

C	Current - can be traded
F	Future - may only be traded from the specified effective date
H	Historical - historical version of an Instrument.
T	Terminated - delisted, may not be traded. Can be reinstated if required.
S	Suspended - trading disallowed until it is reinstated.

Instrument Type Code This indicates the type of instrument.

New Instrument Type Code	New Instrument Type Name	Old System Instrument Type Code	Old System Instrument Type Name

Instrument Value Traded
WE 01, ME 01, EA 01

Value Traded for every Instrument for every Trading Day in the week/month/year period.

SUM (Instrument Value Traded for every Instrument for every Trading Day in the week/month/year)

Instrument Value Traded (Daily)
DE 02, CR 01, VA 01

The Value Traded (Trade Volume * Trade Price) for every Instrument on a Trading Day. This excludes Non-Published Trade Types.

Instrument Volume Density Value
DE 06, WE 04

Highest percentage of Instrument listed shares traded in a day/week period.

$\text{SUM}((\text{Trade Volume} * \text{Trade Price}) / \text{Price Divisor}) / \text{Instrument Listed Shares in Market}] * 100$ for every Instrument for a day/week period

Instrument Volume Traded
DE 01, DR 01, VO 01

Trade Volume per instrument, excluding non-published trade types.

Interest Payment Yield	The annualised rolling interest payments divided by the closing price, per Instrument. This is similar to the dividend yield but only includes interest payments.
ISIN Number	INTERNATIONAL SECURITIES IDENTIFICATION NUMBER. This uniquely identifies securities internationally. These numbers are allocated and maintained by the authorized agency of the particular country. The first 2 digits identify the country (ZA for South Africa). The next digit identifies the security i.e. E for Instrument, G for Gilt. The next 8 digits could be numbers and the last digit is a check ISIN digit e.g. ZAE123456784.
Issue Date	The date the Warrant was issued
Issued Amount	The number of listed Warrants.
Issue Price per Share (Cents)	The price per instrument when listed.
JSE General: Official Approval	This is related to the Status of a Corporate Action. The CA must be approved by a Corporate Finance Officer of the JSE as well as Annual General Meetings or Special General Meetings if required, and sanctioned by the courts if required, to have a 'Y' status. If any are outstanding this will have a 'N' status and the event will not proceed until the outstanding issues have been resolved / addressed.
JSE General: Retain History	This is related to whether the Corporate Action will retain the original data related to an Instrument. This value will only be populated for NC and RL Corporate Actions. Values are 'Y' or 'N'.
JSE General: SAFEX	This is related to an indicator of whether the Instrument is related to a Derivative Instrument. Values are 'Y' or 'N'.
Last 4 Quarters Maiden	This indicates whether a maiden dividend has been declared over the past 4 quarters.
Last 4 Quarters Special	This indicates whether a special dividend or other payment has been declared over the past 4 quarters.
Last Date to Register	The date that the investor has to be registered on the share register. (Last date to trade +5)
Last Date Traded DE 06	The date on which an instrument last traded.
Last Deal Traded Price DE 02, WE 02, ME 02	The Last Automatic or Negotiated Trade Price for the Day for every Instrument, excluding non-published trade types and trades that have been cancelled on the same day.
Last Traded Price DE 02, DE 06, CR 01, EA 02	The Last Trade Price for the Day for all instruments. This includes Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.
Last Years Maiden	This indicates whether a maiden dividend was declared over the past financial year.
Last Years Special	This indicates whether a special dividend or other payment was declared over the past financial year.

Low Trade Price DE 01, CR 01	The Low Trade Price for the Day, per instrument from the start of the Trading Day up until End of Day. (If only one Trade took place for the Day for the Instrument, the Close, High and the Low Trade Price will be equal. If no trades took place for the Day, the Closing Price will be carried forward from the Last Day the Instrument Traded.). This includes Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.
Market Capitalisation of Market DO 01, WO 01, MO 01	The Total Market Capitalisation for every Instrument in a Market on a Trading Day. SUM(Instrument Market Capitalisation for every Instrument in a Market on a Trading Day)
Market Dividend Yield DO 02, WO 02, MO 02	The Dividend Yield for a Market on a Trading Day. $\text{SUM(Instrument Listed Shares * Annualised Rolling Dividend per Instrument for all Instruments in Market) / SUM(Market Capitalisation for all Instruments in Market)}$
Market Earnings Yield DO 02, WO 02, MO 02	The Earnings Yield for a Market on a Trading Day. $\text{SUM(Instrument Listed Shares * Annualised Rolling Headline Earnings per Instrument for all Instruments in Market) / SUM(Market Capitalisation for all Instruments in Market)}$
Market Highest Adjusted Volume Traded WO 03, MO 03	The Highest Adjusted Volume Traded for the Market in a Week across all Trading Day's in a week/month period. SELECT MAX of SUM (Instrument Adjusted Volume Traded) for every Instrument in a Market for every Trading Day in a week/month period.
Market Highest Adjusted Volume Traded Date WO 03, MO 03	The Date on which the Highest Adjusted Volume Traded for the Market in a week/month period across all Trading Day's in a week/month period was attained. SELECT Trade Date for MAX of (SUM Instrument Adjusted Volume Traded) for every Instrument in a Market for every Trading Day in a week/month period.
Market Highest Number of Trades WO 02	The Highest Number of Trades that took place on a Day for a Week/Month period for a Market. SELECT MAX of SUM (Instrument Number Of Trades) for every Instrument in a Market for every Trading Day in a Week/Month period.
Market Highest Number of Trades Date WO 02, MO 02	The Date on which the Highest number of Trades took place on a Day for a Week/Month period for a Market was attained. SELECT Trade Date for MAX of SUM(Instrument Number Of Trades) for every Instrument in a Market for every Trading Day in a Week/Month period.
Market Highest Value Traded WO 03, MO 03	The Highest Value Traded for the Market in a Day across all Trading Day's in a week/month period. SELECT MAX of SUM (Instrument Value Traded) for every Instrument in a Market for every Trading Day in a week/month period.
Market Highest Value Traded Date WO 03, MO 03	The Date on which the Highest Value Traded for the Market in a Day across all Trading Day's in a week/month period was attained. SELECT Trade Date for MAX of SUM (Instrument Value Traded) for every Instrument in a Market for every Trading Day in a week/month period.

Market Lowest Adjusted Volume Traded WO 03, MO 03	<p>The Lowest Adjusted Volume Traded for the Market in a week/month period across all Trading Day's in a week/month period.</p> <p>SELECT MIN of SUM (Instrument Adjusted Volume Traded) for every Instrument in a Market for every Trading Day in a week/month period.</p>
Market Lowest Adjusted Volume Traded Date WO 03, MO 03	<p>The Date on which the Lowest Adjusted Volume Traded for the Market in a week/month period across all Trading Day's in a week/month period was attained.</p> <p>SELECT Trade Date for MIN of SUM(Instrument Adjusted Volume Traded) for every Instrument in a Market for every Trading Day in a week/month period.</p>
Market Lowest Number of Trades WO 02, MO 02	<p>The Lowest Number of Trades that took place on a Day for a Week/Month period for a Market.</p> <p>SELECT MIN of SUM (Instrument Number Of Trades) for every Instrument in a Market for every Trading Day in a Week/Month period.</p>
Market Lowest Number of Trades Date WO 02, MO 02	<p>The Date on which the lowest number of Trades that took place on a Day for a Week/Month period for a Market was attained.</p> <p>SELECT Trade Date for MIN of SUM (Instrument Number Of Trades) for every Instrument in a Market for every Trading Day in a Week/Month period.</p>
Market Lowest Value Traded WO 03, MO 03	<p>The Lowest Value Traded for the Market in a Day across all Trading Day's in a week/month period.</p> <p>SELECT MIN of SUM (Instrument Value Traded) for every Instrument in a Market for every Trading Day in a week/month period.</p>
Market Lowest Value Traded Date WO 03, MO 03	<p>The Date on which the Lowest Value Traded for the Market in a Day across all Trading Day's in a week/month period was attained.</p> <p>SELECT Trade Date for MIN of SUM(Instrument Value Traded) for every Instrument in a Market for every Trading Day in a week/month period.</p>
Market Number of Active Instruments DO 01, WO 01, MO 01	<p>The number of Active Instruments within the Market for a day/week/month period.</p> <p>COUNT DISTINCT (all Instruments in a Market) where number of trades > 0 for a day/week/month period.</p>
Market Number of Instruments DO 01, WO 01, MO 01	<p>The number of Current or Suspended Instruments within the Market for all Trading Days in a Day/Week/Month/Year period.</p> <p>COUNT DISTINCT (Instruments in a Market) that were Current or Suspended for all Trading Days in a Day/Week/Month/Year</p>
Market Number of Instruments Closing Price Down DO 01, WO 01, MO 01	<p>The number of Instruments within the Market, which showed a decrease in the Latest Closing Price compared to the Adjusted Closing Price on the Last Trading Day in the Previous Day/Week/Month/Year.</p> <p>COUNT(DISTINCT Instruments) WHERE Latest Closing Price < Previous Trading Period Adjusted Closing Price for every Instrument in a Market</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>

Market Number of Instruments Closing Price Up DO 01, WO 01, MO 01	<p>The number of Instruments within the Market, which showed an increase in the Latest Closing Price compared to the Adjusted Closing Price on the Last Trading Day in the Previous Day/Week/Month/Year.</p> <p>COUNT(DISTINCT Instruments) WHERE Latest Closing Price > Previous Trading Period Adjusted Closing Price for every Instrument in a Market</p> <p>Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0</p>
Market Number of Instruments with New High Trade Price DO 01, WO 01, MO 01	<p>The number of Instruments within the Market, which attained a new High Trade Price during the Day/Week/Month/Year since listing.</p> <p>COUNT Distinct (Instruments) where the Instrument New High Indicator is TRUE and Instrument New High Trade Price Date = any Trading Day within the Last Day/Week/Month/Year for every Instrument in a Market</p>
Market Number of Instruments with New Low Trade Price DO 01, WO 01, MO 01	<p>The number of Instruments within the Market, which attained a new Low Trade Price during the Day/Week/Month/Year since listing</p> <p>COUNT Distinct (Instruments) where the Instrument New Low Indicator is TRUE and Instrument New Low Trade Price Date = any Trading Day within the Last Day/Week/Month/Year for every Instrument in a Market</p>
Market Number of Trades DO 01, WO 01, MO 01	<p>The number of Trades that took place for all Instruments in a Market for a Day/Week/Month period.</p> <p>SUM(Instrument Number Of Trades) for every Instrument in a Market for every Trading Day in a Day/Week/Month period.</p>
Market Price Earnings Ratio DO 02, WO 02, MO 02	<p>The Price Earnings Ratio for the Market on a Trading Day</p> <p>$(1 / \text{Market Earnings Yield}) * 100$</p>
Market REIT Distribution Yield DO 02, WO 02, MO 02	<p>The REIT Distribution Yield for a Market on a Trading Day.</p>
Market Total Adjusted Volume Traded WO 01, MO 01	<p>The Total Adjusted Volume Traded for all Instruments in the Market across all Trading Day's in a week/month period.</p> <p>SUM(Instrument Adjusted Volume Traded) for every Instrument in a Market for every Trading Day in a week/month period.</p>
Market Total Value Traded DO 01, WO 01, MO 01	<p>The Total Value Traded for every Instrument in the Market for all Trading Days in a Day/Week/Month period.</p> <p>SUM(Instrument Value Traded) for every Instrument in a Market for every Trading Day in a Day/Week/Month period.</p>
Market Total Volume Traded (Daily) DO 01	<p>The Total Volume Traded for all Instruments in the Market for a Trading Day.</p> <p>SUM(Instrument Volume Traded) for every Instrument in a Market for a Trading Day.</p>
Market Trade Type Number of Trades DD 01, DW 01, DM 01	<p>The number of Trades that took place for a Day/Week/Month period for a Market per Trade Type.</p>

	SUM(Number Of Trades) for every Instrument per Trade Type in a Market for every Trading Day in a Day/Week/Month period.
Market Trade Type Total Adjusted Volume Traded DW 01, DM 01	<p>The Total Adjusted Volume Traded for all Instruments in the Market per Trade Type across all Trading Day's in a week/month period.</p> <p>SUM(Instrument Trade Type Adjusted Volume Traded) for every Instrument in a Market for every Trading Day in a week/month period.</p>
Market Trade Type Total Value Traded DD 01, DW 01, DM 01	<p>The Value Traded for every Instrument in a Market by Trade Type for all Trading Days in a Day/Week/Month period.</p> <p>SUM(Instrument Trade Type Value Traded) for every Instrument per Trade Type in a Market for every Trading Day in a Day/Week/Month period.</p>
Market Trade Type Total Volume Traded (Daily) DD 01	<p>The Volume Traded for every Instrument in a Market by Trade Type for a Trading Day.</p> <p>SUM(Instrument Trade Type Volume Traded) for every Instrument per Trade Type in a Market for a Trading Day</p>
Moving 12 Month High Trade Price DE 02	<p>The Highest Adjusted Trade Price for an instrument over the past 12 Months.</p> <p>MAX (Adjusted High Trade Price) for every Instrument for the last 12 months. This includes Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
Moving 12 Month High Trade Price Date DE 02	<p>The Trade Date on which the Highest Adjusted Trade price for an instrument over the past 12 Months was attained.</p> <p>This includes Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
Moving 12 Month Low Trade Price DE 02	<p>The Lowest Adjusted Trade price for an instrument over the past 12 Months.</p> <p>MIN (Adjusted Low Trade Price) for every Instrument for the last 12 months This includes Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
Moving 12 Month Low Trade Price Date DE 02	<p>The Trade Date on which the Lowest Adjusted Trade price for an instrument over the past 12 Months was attained.</p> <p>SELECT Trade Date for MIN (Adjusted Low Trade Price) for every Instrument for the last 12 months This includes Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
New Shares to be Listed	The total number of instruments issued this event. This number may be negative if the event in question causes the number of instruments to be reduced, e.g. Redemption, Final conversion.
Next Expected Declaration Date	<p>The date a company is expected to declare its next dividend.</p> <p>The Next Expected Declaration Date will be calculated as follows: For Payment Types: Dividend, Interest Payment and Capital Payments the Dividend Frequency is added to the LDT of the last payment that was made. For example, if the dividend frequency of an instrument is Semi Annually, 6 months will be added to the LDT. Where the last dividend was paid a long time ago and the Next Expected Declaration Date calculates to a date in the past, the Next Expected Declaration Date will be NULL. Where the Next Expected Declaration Date is</p>

	calculated and falls on a Non Business Day, the Previous Business Day will be selected. If no payments have been made (new Company) the Next Expected Declaration Date will be NULL.
Notes: Notes	This represents the Notes field saved to the Corporate Action. It contains any pertinent information not already on the Corporate Actions schedule, e.g. Reasons for suspensions / termination
Number of Shares one will receive	The number of instruments a shareholder will receive by virtue of the number of instruments already held.
Number of Days Instrument Traded WE 02, ME 02, EA 02	The number of Days an Instrument traded during the week/month/year, excluding non-published trade types.
Number of Days Market Traded WO 02, MO 02	The number of Days on which a Market traded during the week/month period, excluding non-published trade types.
Number of Days Sector Traded WS 02, MS 02, SA 03	The number of days on which a Sector traded during the week/month/year period, excluding non-published trade types and trades that have been cancelled on the same day. Applicable to all instruments in a sector for all trading days in a week/monthly/year period.
Number of Shares one has (have)	<p>The minimum number of instruments a shareholder must own to receive the number of new instruments given in the no of shares one will receive field. For example:</p> <p>Have: 2 Receive: 3 For every 2 instruments currently held, 3 instruments will be issued.</p>
Occurrence Number per Day of Events	Since more than one event may take place for an Instrument on one day, the events are numbered to indicate the sequence in which they will take place.
Opening Trade Price DE 02, CR 01	<p>The First Trade Price of an Instrument as at the start of business on the specified Day (If only one Trade took place for the Day for the Instrument, the First, Close, High and the Low Trade Price will be equal. If no trades took place for the Day, the Closing Price will be carried forward from the Last Day the Instrument Traded.)</p> <p>I.e the first trade price for Automatic trades (AT, UT, XT and VT Trades) and NX trades, which have not been cancelled on the same day.</p>
Option 1: AND / OR? Default?	This represents the Link Operator that will be used to indicate whether the payment offers money AND shares, or money OR shares.
Option 1: Gross rate in cents per share	This represents the payment amount, including withholding tax, expected from a share with regard to the Corporate Actions in which the Shareholder has the right to receive a payment e.g. CD (Cash Dividend) or CP (Capital Payment)
Option 1: NETT Rate in cents per share	<p>This represents the payment amount, excluding withholding tax and foreign tax, expected from a share with regard to the Corporate Actions in which the Shareholder has the right to receive a payment e.g. CD (Cash Dividend).</p> <p>* This value does not take into account any tax exemptions or double taxation agreements.</p>

Option 1: Ratio: Resultant Portion	The Source to Resultant ratio (S:R) is the ratio in which scrip will be received. E.g. S:R = 1:2 means the shareholder will get 2 new shares for every 1 held.
Option 1: Ratio: Source Portion	The Source to Resultant ratio (S:R) is the ratio in which scrip will be received. E.g. S:R = 1:2 means the shareholder will get 2 new shares for every 1 held.
Option 2: AND / OR? Default?	This represents the Link Operator that will be used to indicate whether the payment offers money AND shares, or money OR shares.
Option 2: Gross rate in cents per share	This represents the payment amount, including withholding tax, expected from a share with regard to the Corporate Actions in which the Shareholder has options with regard to payment (E.g. Scheme Of Arrangements, Scrip Dividends)
Option 2: NETT Rate in cents per share	<p>This represents the payment amount, excluding withholding tax and foreign tax, expected from a share with regard to the Corporate Actions in which the Shareholder has options with regard to payment (E.g. Scrip Dividends (SC))</p> <p>*This value does not take into account any tax exemptions or double taxation agreements</p>
Option 2: Ratio: Resultant Portion	The Source to Resultant ratio (S:R) is the ratio in which scrip will be received. E.g. S:R = 1:2 means the shareholder will get 2 new shares for every 1 held.
Option 2: Ratio: Source Portion	The Source to Resultant ratio (S:R) is the ratio in which scrip will be received. E.g. S:R = 1:2 means the shareholder will get 2 new shares for every 1 held.
Original Trade Code	The Trade code of the original trade. This will only be populated for cancellations of trades.
Par Value per Share (Cents)	The Value at which the instruments were first issued.
Parent Sector	This is the master code of the sector under which a particular sector falls.
Payment Classification	The high level payment type into which Corporate Action payment types are combined for statistical purposes.

DIV	Dividend	This category combines Cash Dividends (CD) and Script Dividends (SC)
CAPPAY	Capital Payment	This category combines Capital Repayments (CP) and Capital Reductions (CR)
INTPAY	Interest Payment	Interest payments made by a company. Corporate Action Type 'IT'
SPECDIV	Special Dividend	Special dividends paid by a company. Corporate Action Type 'IS'
OTHER	Other Payments	This is a historical type and will not be used going forward
REITS	REITS Distribution	Payment made by a REITS Company

Payment Date	The date on which a company will pay out any funds as a result of a capital structure change.
--------------	---

Payments Specific: Dividend Number	This represents the number given to a Dividend Payment within a Corporate Action.
Payments Specific: Dividend Type	This represents the type of Dividend Payment related to a Corporate Action. Values are 'Interim' / 'Final' / 'Special'.
Percentage Closing Price Change	The closing price variation of the period quoted, as a percentage.
DE 01, DT 01, DT 02, DR 01, WE 01, WT 01, WT 02, ME 01, MT 01, MT 02, EA 01, AT 01, AT 02	(((Latest Closing Price for last trading day in current day/week/month/year/12 Months – Adjusted Closing price for last trading day in previous day/week/month/year * 100) / Adjusted Closing price for last trading day in previous day/week/month/year/12 Months) for every instrument Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0
Previous Corresponding Dividend	The dividend payment that was declared in the corresponding quarter of the previous financial year.
Previous Days Closing Price	The previous business day's Instrument Closing Price
Previous Instrument High Trade Price NH 01	The Previous Highest Trade Price for an Instrument since date of listing. Compare current day's high trade price to the latest adjusted new high trade price since listing. If current day's high trade price > latest adjusted new high trade price since listing then set previoushightradeprice = existing new high trade price else set previoushightradeprice = existing previous high trade price
Previous Instrument Low Trade Price NL 01	The Previous Lowest Trade Price for an Instrument since date of listing. Compare current day's low trade price to the latest adjusted new low trade price since listing. If current day's high trade price > latest adjusted new low trade price since listing then set previouslowtradeprice = existing new low trade price else set previouslowtradeprice = existing previous low trade price
Price Earnings Ratio DE 02, WE 01, ME 01, EA 01	The number of Years worth of Earnings it will take to recoup the purchase price per Instrument (Closing Price / Annualised Rolling Headline Earnings per Instrument) per Instrument Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0
Price Prior to Listing	The price quoted in cents at which the instruments were available to the public prior to listing.
Processing: Barrier / Stop Loss Levels	This represents the Barrier / Stop Loss Level for a Corporate Action. This value is blank for all Instruments that are not warrants. The Barrier Level is the level of the underlying that, if reached, will result in the warrant automatically terminating with a zero value. Similar to a barrier with respect to warrants, except there is a usually a redeemable portion payable to warrant holders on termination of a warrant.

Processing: Buy Price Odd Lot Offer	This represents the Buy Price offered within Odd Lot Offers for an OL Corporate Action. It is the price at which the Issuer will repurchase the Odd Lot holding from the Shareholder.
Processing: Current Instruments In Issue	This represents the Listed Instruments in issue for the Source Instrument. For an IC Corporate Action this value will represent the current total number of Authorised Instruments.
Processing: Excess Indicator	This represents the Excess Indicator for a Corporate Action. It is an indicator to inform the shareholder whether or not excess shares are available in a rights offer that has not been underwritten.
Processing: Instruments In Issue Add / Withdrawn	This represents the number of Instruments to change for the Source Instrument. For an IC Corporate Action this value will represent the change in Authorised Instruments.
Processing: Issue Indicator	This represents the Issue Indicator for a Corporate Action. It indicates whether any minimum qualifying quantities are in cash or number of shares.
Processing: Issue Price In Cents Per Share	This represents the Issue Price for a share recorded within a Corporate Action (e.g. event types MB, MW, AS, GI, SI etc.)
Processing: Maximum Qualifying Quantity	This represents the Maximum Qualifying Quantity for a Corporate Action (the maximum qualifying number of shares or cash amount required to participate in the entitlement).
Processing: Minimum Qualifying Quantity	This represents the Minimum Qualifying Quantity for a Corporate Action (the minimum qualifying number of shares or cash amount required to participate in the entitlement).
Processing: New Total Instruments In Issue	This represents the Listed Instrument value related to the Source Instrument after the Corporate Action has been processed. For an IC Corporate Action this value will represent the new total Authorised Instruments.
Processing: Offer Indicator	This represents the Offer Indicator for a Corporate Action. It indicates if the new listing is done by means of a private placement, IPO, both.
Processing: Sell Price Odd Lot Offer	This represents the Sell Price offered within Odd Lot Offers for an OL Corporate Action. It is the price at which the Issuer will sell the Odd Lot holding to the Shareholder
Processing: Strike Price Cents Per Share	This represents the Strike Price for a Corporate Action (the price at which you can purchase the underlying). This value is only applicable to Warrants and will be blank for all other Instruments.
Record Date	The latest date shares can be lodged for registration to enable the shareholder to qualify for an entitlement.
Resultant Instrument: Alpha Code	This represents the Alpha Code of the Resultant Instrument The Alpha Code is a unique JSE Identification trading code of instruments on the JSE.
Resultant Instrument: Board	This represents the Board of the Resultant Instrument for the Corporate Action. E.g. Main, AltX, VCM and DCM
Resultant Instrument: Dual Listed	This is an indicator which represents whether the instrument is listed on more than one exchange. Options are 'Y' or blank

Resultant Instrument: Instrument Long Name	This represents the Long Name of the Resultant Instrument.
Resultant Instrument: Instrument Type	This represents the Instrument Type of the Resultant Instrument. E.g. Ordinary, Preference Shares, Debenture, etc.
Resultant Instrument: ISIN	This represents the ISIN number of the Resultant Instrument for the Corporate Action. This number can change during the lifetime of an instrument e.g. when the instrument undergoes a Name Change (NC Event type)
Resultant Instrument: LSE TIDM	This represents the TIDM of the Resultant Instrument. The TIDM is a unique London Stock Exchange identifier for the instrument.
Resultant Instrument: Short Name	This represents the Short Name of the Resultant Instrument.
Resultant Instrument: Sub Sector	This represents the Industry Sub Sector Code of the Resultant Instrument as determined by the ICB classification.
Salient Date: Declaration Date	This represents the Declaration Date for the relevant Corporate Action (The date when the event was initially entered into the system).
Salient Date: Election / Offer Close Date	This represents the Offer Close Date for the relevant Corporate Action. This is the last day to elect to receive an option.
Salient Date: EX Date	This represents the EX Date for the relevant Corporate Action. This is on the next working day after LDT – the shareholder no longer qualifies to receive the entitlement, if his entitlement has been sold.
Salient Date: Issue Date	This represents the Issue Date for the relevant Corporate Action (The date when resultant shares are issued to the shareholders).
Salient Date: LDT	This is the last date that trading can take place in the source instrument and the holder is still entitled to participate in the corporate action.
Salient Date: Listing / Reinstatement Date	This represents the Listing Date or Reinstatement Date (Suspension Lifted) for the relevant Corporate Action.
Salient Date: Offer Opens Date	This represents the Offer Opening Date for the relevant Corporate Action.
Salient Date: Pay Date	This represents the Pay Date for the relevant Corporate Action (The date when cash is paid to shareholders for any form of payment e.g. dividend, capital distribution or offer).
Salient Date: Record Date	This represents the Record Date for the relevant Corporate Action (The day that the registers of the Transfer Secretary are updated).
Salient Date: Record Last Updated	This represents the Process Date Time stamp of the last time the relevant Corporate Action was updated.
Salient Date: Shareholder's Meeting If Applicable	This represents the Shareholder Meeting Date for the relevant Corporate Action if applicable.
Salient Date: Suspension Date	This represents the Suspension Date for the relevant Corporate Action. The shares of the company cannot be traded while it is suspended.

Salient Date: Termination / Withdrawal Date / Expiry Date	This represents the Termination Date for the relevant Corporate Action.

Seller Price WE 01, ME 01, EA 01	The latest cash offer to sell a share for the week/month/year (same as Last Best Offer)
Sequencing: CA Serial Number	This reflects the CA Serial Number of the Corporate Action. It is a unique number that identifies a specific Corporate Action.
Sequencing: Link ID 1	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 2	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 3	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 4	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)

Sequencing: Link ID 5	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 6	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 7	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 8	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 9	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 10	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Relationship	This reflects a description of the Relationship between the relevant Corporate Actions which will be displayed as a string of text that shows the brackets with AND/OR operators in each Corporate Action that is affected in the sequence.
Sequencing	This reflects the Sequence Number of the Corporate Action
Share price type (% or C)	<p>This indicates if the price format for an instrument is a percentage or cents.</p> <p>Values are:</p> <ul style="list-style-type: none"> • % - Percentage • C - Cents
Source Instrument	Instrument that corporate actions are based on and to which entitlements are due.
Source Instrument: Alpha Code	This represents the Alpha Code of the Source Instrument. The Alpha Code is a unique JSE Identification trading code of instruments on the JSE..
Source Instrument: Board	This represents the Board of the Source Instrument. E.g. Main, AltX, VCM and DCM.
Source Instrument: Dual Listed	This is an indicator which represents whether the instrument is listed on more than one exchange. Options are 'Y' or blank
Source Instrument: Instrument Long Name	This represents the Long Name of the Source Instrument.
Source Instrument: Instrument Type	This represents the Instrument Type of the Source Instrument. E.g. Ordinary, Preference Share, Debenture, etc.
Source Instrument: ISIN	This represents the ISIN (International Securities Identification Number) of the Source Instrument for the Corporate Action. This number can change during the lifetime of an instrument e.g. when the instrument undergoes a Name Change (NC Event type)
Source Instrument: Issuer Name	This represents the Issuer Name of the Source Instrument.

Source Instrument: LSE TIDM	This represents the TIDM of the Source Instrument. The TIDM is a unique London Stock Exchange identifier for the instrument.
Source Instrument: Short Name	This represents the Short Name of the Source Instrument.
Source Instrument: Sub Sector	This represents the Industry Sub Sector Code of the Source Instrument as determined by the ICB classification.
Source Instrument: Warrant Type	This represents the Warrant Type of the Source Instrument if the instrument is a Warrant. This will be a null value if the Instrument is not a Warrant. Values are AC (American Call), AP (American Put), EC (European Call), EP (European Put), AX (American Combined), EX (European Combined) and OT (Other).
Statistics Date CR 01, CR 02	The date of the Statistics that are being corrected.
Status Info	The information / cautionary flag's pertaining to the status change.

The valid cautionary flag codes used in the status info field are given in the table below:

Flag	Descriptions
DI	Disclaimed annual audit opinion, i.e. auditors have not expressed an opinion on the financial statements of the company. This cautionary flag on a share will last one year.
PD	Green Tag. Declared Dividend still to be paid, i.e. the shares are trading cum dividend. This cautionary flag will last until LDR date.
CY	Orange Triangle. Caution in dealing in shares, i.e. negotiations are taking place. This cautionary flag will last from two weeks to two years.
QA	Qualified annual audit opinion, i.e. auditors have expressed an opinion on the financial statements of the company, with exceptions. This cautionary flag will last one year.
RC	Red Circle. Immediate settlement, i.e. deals done in shares that have an entitlement expiring that week will be settled within the same week. This cautionary flag will last one week.
RV	Red 'S'. Company violation of the JSE rules, for example a company has not submitted its provisional or final financial reports, and is warned of suspension. This cautionary flag will last from one day to two weeks.
TA	Red Star. Tax application, e.g. Namibia. Where a foreign tax for an entitlement is other than 15%

SV	Yellow Star. Low spread of shares, i.e. shares are held by very few shareholders and do not trade often. This cautionary flag will last until the situation changes.
----	--

STC Credits per Share	Amount of STC credits applicable to the payment, in cents per share
Strike Price	Is the price payable by the warrant holder in respect of each warrant on exercise of the warrant
TIDM	Tradable Instrument Display Mnemonic
Time Snapshot was Taken	The time at which the snapshot was taken in the format HHMM.
Total Capital Issued (Rands)	The total Rand value of the capital issued during the most recent issue.
Total Capital Raised (Rands)	The total Rand value of the capital raised through an event.
Total for Current Financial Year	Depending on the declaration type this field will contain either: <ul style="list-style-type: none"> - The total of any Adjusted Headline Earnings that was declared for the current Financial Year. OR <ul style="list-style-type: none"> - The total of any Dividends that was declared for the current Financial Year OR <ul style="list-style-type: none"> - The total of any Interest Payments that was declared for the current Financial Year OR <ul style="list-style-type: none"> - The total of any Capital Payments that was declared for the current Financial Year OR <ul style="list-style-type: none"> - The total of any Special Payments that was declared for the current Financial Year
Total Instrument Annualised Rolling Adjusted Dividend - Previous Financial Year WE03	The Total Adjusted Dividend per Instrument that was declared within the previous Financial Year. SUM (Adjusted Dividend per Instrument) where declaration is within the previous Financial Year.
Total Number of Instrument Listed Shares In Market DO 02, WO 02, MO 02	The Total Number of Instrument Listed Shares currently available for trading in the Market. SUM(Instrument Listed Shares for all Instruments in the Market)
Total Number of Shares DE 03, EA 03	The total number of Instrument listed shares currently available for trading in the Market.
Total Sector Closing Price DS 03, WS 01, MS 04, SA 03	The accumulated Closing Prices of all the Instruments within the Sector. SUM(Closing Price) of all Instruments in a Sector

Note: Zero closing prices not included in calculation. Instead use the previous closing price > 0

Treated as Domestic

This field indicates whether an instrument is treated as a domestic instrument for the purpose of exchange control, even though it is an inward listed instrument. It will be Yes or No for inward listed instruments, or blank for all other instruments.

Tradability Indicator
(Alpha)

Valid codes are:

L	Liquid	More frequently traded shares
I	Illiquid	Less Frequently traded shares

Tradability Indicator
(Numeric)

Valid codes are:

1	Highly liquid
2	Normally Liquid
3	Illiquid

Trade Price

The price of the Trade

Trade Type

This indicates the type of trade which has occurred.

Deal / Trade Name	Deal / Trade Type	Description
Automated Trade*	AT	A transaction matched automatically in the JSE trading system during continuous trading.
Auction Trade*	UT	A transaction matched automatically in the JSE trading system during price determination in an auction.
New Trade—Cross Trade	XT	A transaction matched automatically in the JSE trading system during continuous trading as the result of a central order book cross order. See Volume 00 Trading and Information Overview for further details related to this trade type.
New Trade - Volume Auction Trade	VT	A transaction matched automatically in the JSE trading system during price determination of the End of Day volume auction. See Volume 00 Trading and Information Overview for further details related to this trade type
Corporate Finance Trade	CF	A transaction which: -
		- must be entered into in writing;
		- requires public notification in the press; and -
		- complies with the requirements of transaction categories 1 or 2 or 3 of Section 9 of the Listing Requirements of the JSE.

Portfolio Trade	PF	A transaction where a broking member (instrument) trades as an agent in a portfolio.
Block Trade	BT	<p>A transaction where a broking member (instrument) trades as an agent in a single security where the transaction: -</p> <ul style="list-style-type: none"> - Has a minimum Value of R5 million; and - - Comprises at least 100% of the average daily Value
Asset Swap	AS	A transaction which complies with all the asset swap requirements of the South African Reserve Bank. Although allowed by the JSE trading system Reserve Bank regulation currently prohibits the use of this trade type completely.
Off Order Book Principal Trade	OP	<p>A transaction where a broking member (instrument) trades as a principal in a single security where the transaction: -</p> <ul style="list-style-type: none"> - has a minimum Value of R500,000; and - - Comprises at least six times the normal market size (NMS); <p>Except where the transaction is with a foreign professional market participant in which case no minimum Value or quantity of securities applies.</p> <p>This trade type replaces both the arbitrage and overseas counterparty trades used previously.</p> <p>Delayed publication rules no longer apply to this particular trade type.</p>
Late Trade	LT	<p>A transaction where a broking member (instrument) trades after hours with a professional market participant, as agent or principal, in fulfilment of: -</p> <ul style="list-style-type: none"> - an order already entered into the JSE trading system which reflects a reasonable price at which a client wishes to trade; - - an order received prior to the end of the closing auction call period, the price of which could only be established after the closing auction call period; or - an order received after hours.
Contra Trade*	CT	A transaction that is equal and opposite to a previously matched automated or auction trade that is entered on the same day as the original trade. Both parties to the trade are involved and will have to flag the trade as "CT" which will then be matched by the system.
Post Contra Trade	PC	A transaction that is equal and opposite to a previously matched automated or auction trade that is entered on the day following the original trade.

Option Exercised	OX	The exercise of an option (an option being an option on a security, traded on the JSE). Trade is dual-sided except if conducted intrafirm. Not included in End of Day Equity Market Statistics
Warrant Exercised	WX	The exercise of a warrant (a warrant as defined in the Listings Requirements of the JSE). Trade is dual-sided except if conducted intrafirm. Not included in End of Day Equity Market Statistics
Traded Option Exercised	TX	An option on a security traded on the JSE. Trade is dual-sided except if conducted intrafirm. Not included in End of Day Equity Market Statistics
Namibia Trade+	NX	A transaction specifically for the NSX market
Option Delta	OD	Option Delta exercised Not included in End of Day Equity Market Statistics
Give-up Trade	GU	A give-up trade is a transaction where a member trades in a single equity security as a principal with another member, who trades either as an agent on behalf of a client or as a principal for that member's own account. The purpose of a give-up trade is to pass a trade that has been executed by the first member ("executing member") on the same day or the previous day to the second member ("receiving member") at the price of the original trade. The trade that is given up to the receiving member must have originally been executed by the executing member with the intention of giving it up to the receiving member.
		The only reported transactions that may be the subject of a give-up trade are late trades executed in accordance with the provisions of rules 6.40.7.1, 6.40.7.3 or 6.40.7.4. The executing member and receiving member may give effect to these late trades by means of the executing member trading after hours with a foreign professional market participant and giving up that trade to the receiving member who is either acting on behalf of a client in terms of rules 6.40.7.1 or 6.40.7.3 or trading as a principal for its own account in terms of rule 6.40.7.4. The executing member must report the transaction with the foreign professional market participant as a late trade.
		A give-up trade may be used to give effect to an arrangement whereby one member

		has outsourced its trading function on a temporary basis to another member, provided that such arrangement has been approved by the Director: Surveillance and all such transactions are recorded in a dedicated stock account by the executing member.
		Not included in End of Day Equity Market Statistics
Bookbuild Trade	BK	A book build trade is a transaction where a member trades in a single equity security as an agent or a principal with another member in order for the second member or its clients to participate in a bookbuild. The member managing the bookbuild must advise the Director: Surveillance of the bookbuild prior to reporting a bookbuild trade.
Post Contra (Published Trades)	LC	Correction of previous day's published off book trade
Post Contra (Non-Published Trades)	NC	Correction of previous day's non-published off book trade. Not included in End of Day Equity Market Statistics
Book Over Trade	BO	

Trade Volume	The volume of the Trade
Traded Indicator	This indicates if an instrument traded on the specified day. Values are: <ul style="list-style-type: none"> • Y - Yes • N – No
Transfer Code	Secretary The code used to identify a specific transfer secretary
Underlying Security	The alpha code for the instrument, company, bond, index or commodity, over which the warrant is issued.
Warrant Issuer	The code of the issuer that issues the warrant
Warrant Style	American: Holder of warrant can exercise on any date up to expiry date European: Holder of warrant can only exercise on the exercise date on the expiry date
Withholding Tax Percentage	The percentage of local tax deducted for South African shareholders

8 DIVIDEND & EARNINGS KEY

KEY	DESCRIPTION
DDPS	Declared Dividend per share, as Declared and provided by the listed company
DHEPS	Declared Headline Earnings per share, as Declared and provided by the listed company.
ARDPS	Annualised Rolling Adjusted Dividend per share, for the last 4 quarters, as calculated by the JSE in terms of the new philosophy and methodology.
ARHEPS	Annualised Rolling Adjusted Headline Earnings per share , for the last 4 quarters, as calculated by the JSE in terms of the new philosophy and methodology.
CP	Official Closing price per share of the JSE.
Num_shares	Current JSE number of shares in issue (i.e. before applying the free float factor)
Num_instruments_Sector	The number of listed instruments in a particular Sector (as defined by the ICB Classification System)

*** = Values as at previous trading day**

8.1 DIVIDENDS AND EARNINGS METHODOLOGY

The calculation of adjusted figures will be triggered automatically by the following conditions:

- When the number of shares in issue changes for a share, all Adjusted figures prior to the date in question will be adjusted accordingly. This can happen both as result of an online change in Number of Shares in Issue, or via a Corporate Action, which may result in a changing number of shares in the market. The trigger should not be the Corporate Action, but rather that the generic fact of number of shares in the market has changed.
- When an Actual Declared figure is altered or that re-stated by the company, any associated calculations using such a figure must clearly be re-calculated.

The sequence for processing the data will be Adjusted figures first, Rolling and then finally Annualised figures, if required. The actual declared data will be used to calculate the adjusted data, which will be used to calculate the Rolling data, and then used to calculate the Annualised data. Annualisation must only occur by month when required, and not daily as is the current situation.

The JSE does realise that according SA GAAP, HEPS are calculated using a Weighted Average Number of Shares for the period in question. The methodology chosen does not take this into account for the following reasons:

- It is used to determine a ratio for adjusting the declared figures to calculate a meaningful Rolling figure.
- By choosing to use actual shares listed on a particular date, we are using published data. Average Weighted Shares in issue are usually limited to parties who receive company's financial reports.

8.2 DIVIDENDS

8.2.1 Adjusted dividend Per Share

Since the calculation is the same for Dividends, Interest, Special Dividends, Capital Repayments and REIT Distribution, an example is shown below, on how to calculate each of these types :

$$\text{ADPS} = \text{DDPS} \times \text{PSII} / \text{CSII}$$

Where:

ADPS = Adjusted Dividend Per Share.

DDPS = Declared Dividend Per Share.

PSII = # of Shares in Issue at the time of LDT+1 of the Actual Dividend.

CSII = Current / adjusted # of Shares in issue.

8.2.2 Rolling Figures (Last 4 Quarters Performance)

A rolling Dividend figure can be calculated by simply adding the ADPS figures for the past four quarters.

$$\text{RDPS} = \Sigma(\text{ADPS for all declared during Last 4 Quarters where a quarter may not always} = 3 \text{ months})$$

Where:

RDPS = Rolling Adjusted Dividends per share

4 Quarters.

8.2.3 Annualisation

Annualisation will only occur under three possible instances and must be triggered automatically:

- 1) It is a new listing and the company has not yet declared a full years figures. These figures are annualised to provide a more accurate reflection of the company's initial performance.
- 2) The company changes its financial year-end resulting in a non-standard Financial year which is not = 12 months long. Distorted HEPS and PPS figures for such a non-standard year-end period will result unless annualised. These are brought back in line to the standard of one financial year.
- 3) The company makes a non-standard declaration due to a specific corporate action from which they wish to protect or limit existing shareholders' entitlements.

Should a company declare pre-listing Figures, we must be able to capture this, as if it was a normal financial year, i.e. no annualisation is required. Once actual figures are released for the company as a listed entity, these figures will take precedence over any pre-listing figures.

All declarations are for historical periods, thus we only need to annualise when the 'sum of the number of months of the last 4 quarters' corresponding to the latest declared figures does not equal twelve months. Calculate the period / months that the particular declaration was actually for. For this we need to capture the end date of that particular financial period. Subtract the latest period end date from the previous to calculate the number of months. Sum these for the periods up to but excluding the previous equivalent declaration, e.g. from Q1 to next Q1. If this total is not equal to 12 months then annualise.

This annualised figure is simply calculated by taking the rolling Dividends per share (RDPS), multiplying it by 12 (months in a year) and dividing it by the number of months that make up the last 4 quarters.

$$\text{ARDPS} = \text{RDPS} \times 12 / \text{No. Months}$$

Where:

RDPS = Rolling Adjusted Dividend Per Share.

ARDPS = Annualised Rolling Adjusted Dividend Per Share

12 = Months in the year.

No. Months = Number of months in the financial reporting period due to change of Financial year end OR new Months expired.

This ARDPS figure is used in all downstream calculations including EY and PE calculations. If no Annualisation is required then the **ARDPS = RDPS**.

8.3 HEADLINE EARNINGS PER SHARE

8.3.1 Adjusted Headline Earnings Per Share

HEPS that are adjusted for changes in Number of Shares in the Market (not the Financial Market terminology of “Adjusted Headline Earnings”) will be calculated as follows:

$$\text{AHEPS} = \text{DHEPS} \times \text{PSII} / \text{CSII}$$

Where:

AHEPS = Adjusted Headline Earnings Per Share. (As per the JSE’s internal calculations, not as per the financial statements)

DHEPS = Declared Headline Earnings Per Share.

PSII = # of Shares in Issue at the time of the Year End / Interim Period End Date of the Actual HEPS.

CSII = Current / adjusted # of Shares in issue.

Note: Obviously, should any of the above variables change, re-calculations are required (e.g. Changes in year-end).

8.3.2 Rolling Figures (Last 4 Quarters Performance)

The difference comes in how we treat the **Final** declared HEPS. This figure is for the whole year and is thus **inclusive** of all interim HEPS for that financial year. The system will capture and store the data as final HEPS.

As long as there are no new interim HEPS declarations, then this final figure will be used for all HEPS calculations. This figure will be adjusted and annualised as required.

The difficulty arrives in calculating the rolling HEPS figure when the latest declaration is not the Final declaration for the financial year. This function of calculating rolling HEPS will be totally automatic and will be based on the actual data captured, as well as any inferred “missing periods”.

It will be necessary to calculate an **Inferred Actual HEPS (IHEPS) Value** for the period between the last Interim HEPS declaration and the Final HEPS declaration, i.e. what were the inferred actual HEPS for the last period in the financial year (or any “missing” period that should fall within the Last 4 quarters).

To calculate this figure, all **Interim** AHEPS figures prior to the latest Final declaration, will be subtracted from the **Final** declared HEPS figure, for the financial year in question. This figure must then be used as the 4th quarter figure in the calculations below.

$$\text{IHEPS} = \text{FHEPS} - \Sigma(\text{AHEPS})$$

Where:

IHEPS = Inferred Actual HEPS in 4th Quarter

FHEPS = Implied Actual Earnings per share

Σ AHEPS = Sum of AHEPS for the First 3 Quarters of the financial year, excluding Final figure.

$$\text{RHEPS} = \Sigma(\text{AHEPS for all declared during Last 4 Quarters where a quarter may not always} = 3 \text{ months})$$

Where:

RHEPS = Rolling Adjusted Earnings per share

Σ AHEPS = Sum of AHEPS for the Last 4 quarters, excluding Final figure.

The correct Rolling HEPS can now be calculated by simply adding the adjusted AHEPS for the latest 4 consecutive periods (using the inferred figure instead of the Final. When the latest declaration is not the Final declaration for the financial year, the following calculation would apply:

8.3.3 Annualisation

Annualisation will only occur under three possible instances and must be triggered automatically:

- 1) It is a new listing and the company has not yet declared a full year's figures. These figures are annualised to provide a more accurate reflection of the company's initial performance.
- 2) The company changes its financial year-end resulting in a non-standard Financial year, which is not equal to 12 months long. Distorted HEPS and PPS figures for such a non-standard year-end period will result, unless annualised. These are brought back in line to the standard of one financial year.
- 3) The company makes a non-standard declaration due to a specific corporate action from which they wish to protect or limit existing shareholders' entitlements.

Should a company declare pre-listing Figures, we must be able to capture this, as if it was a normal financial year, i.e. no annualisation is required. Once actual figures are released for the company as a listed entity, these figures will take precedence over any pre-listing figures.

All declarations are for historical periods, thus we only need to annualise when the 'sum of the number of months of the last 4 quarters' corresponding to the latest declared figures does not equal twelve months. Calculate the period / months that the particular declaration was actually for. For this we need to capture the end date of that particular financial period. Subtract the latest period end date from the previous to calculate the number of months. Sum these for the periods up to but excluding the previous equivalent declaration, e.g. from Q1 to next Q1. If this total is not equal to 12 months then annualise.

This annualised figure is calculated by taking the rolling HEPS per share (RHEPS), multiplying it by 12 (months in a year) and dividing it by the number of months that make up the last 4 quarters.

ARHEPS = RHEPS x 12 / No. Months

Where:

RHEPS = Rolling Adjusted Earnings Per Share.

ARHEPS = Annualised Rolling Adjusted Earnings Per Share

12 = Months in the year.

No. Months = Number of months in the financial reporting period due to change of Financial year end OR new Months expired

This ARHEPS figure is used in all downstream calculations. If no Annualisation is required then **ARHEPS = RHEPS**.

When a company changes its reporting period, e.g. from bi-annual to quarterly or vice-versa, then this could also result in skewed data due to the fact that you are adding data together from different reporting periods. Under such circumstances the previous year's reporting period / periods will be apportioned accordingly to "match" the reporting periods / period in the New Year. For example a previous half-yearly figure would be split into two equal quarterly figures and each one superseded by the next year's reported quarterly figures. Two previous year's quarterly figures will be added to correspond with the new year's half-yearly data. When this happens all adjusted figures must be updated accordingly. This applies to HEPS only.

8.4 OTHER CURRENCY DECLARATIONS:

When a company declares figures in a currency other than South African Rands and Cents, the following rules are applied in order of priority.

- 1) The company is asked to supply a ZAR figure for both HEPS and payments. This is what happens in the majority of cases.
- 2) The company must alternatively supply an Average Exchange rate for the year. It is essential for the company to provide a weighted average exchange rate for HEPS, as the JSE cannot determine when the Revenue flows occurred that resulted in the declared HEPS.
- 3) If no suitable exchange rate is given then the Average Exchange rate for the relevant financial period as published by an official foreign exchange source.

This policy is not going to change going forward.

9 EXPLANATION OF THE INDEX TREATMENT FOR SPECIFIC CORPORATE ACTIONS (DUMMY LINES IN DATA RECORDS)

FTSE Russell Rules regarding the use of Dummy Lines in Indices:

- 9.1. Dummy lines are non-tradable instruments which have been temporarily created by FTSE/JSE in order to reflect a corporate event.
- 9.2. The use of dummy lines is normally determined on an ad hoc basis and typically results from complexities surrounding a corporate event.
- 9.3. Dummy lines will also be visible within the standard corporate action deliverables when they are being utilized.
- 9.4. Dummy lines are generally used in order to ensure the index reflects the investor experience or in order to facilitate index replication by index funds.
- 9.5. Details of the non-tradeable instrument will be included in a special manner in the **Instrument Version Information** data records (EN/ENE Subtypes 01 and 02).
- 9.6. An ISIN will be generated to contain the word 'DUMMY' in order to distinguish it from other securities.

FIELD DESCRIPTIONS:

SECTOR CODE	All instruments in the market are grouped into sectors, according to the type of business they represent.
INSTRUMENT ALPHA CODE	All instruments traded on the market are identified by a unique alpha code.
RECORD TYPE	The code indicating the type of information contained in the record disseminated - eg: DE.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 01.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD
BOARD	The board the instrument/sector is linked to
MARKET	The market the instrument/sector is linked to.
EXCHANGE	The exchange the instrument/sector is linked to.
FILLER	Spaces or blank
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

NOTE:

Should a company be de-listed an INSTRUMENT ALPHA CODE may be re-used at a later stage, but an INSTRUMENT NUMERIC CODE will never be re-used, therefore, we recommend that programming be done according to the INSTRUMENT NUMERIC CODE.

11 END OF DAY EQUITY DATA PRODUCTS (RECORDS) - DAILY

11.1 Daily Instrument Statistics

Daily Instrument statistics are calculated at the close of each business day for all instruments on the market. A traded indicator is used to show which instruments traded on a specified day.

All daily Instrument statistics fall within record type DE - Daily Instrument. The statistics are grouped into various sub types, which allows you to select the type of information you require. The different sub types and the relevant field layouts are listed.

Note: For the initial take-on of all listed instruments, select record type DE 05.

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
TRADED INDICATOR	This indicates if an instrument traded on the specified day.
INSTRUMENT CLOSING PRICE	The instrument closing price as calculated by the Trading Engine.
INSTRUMENT VOLUME TRADED	The volume traded for every Instrument on a trading day
HIGH TRADE PRICE	The highest trade price for the day.
LOW TRADE PRICE	The low trade price for the day.
INSTRUMENT DIVIDEND YIELD	The annualised rolling dividends per instrument divided by the closing price, per Instrument.
INSTRUMENT EARNINGS YIELD	The percentage of the purchase price that will be recouped in earnings per year per Instrument.
INSTRUMENT LAST BEST BID	The Last Best Bid is determined by the Best Bid published at the same time that the first Closing Price is published for the day.
INSTRUMENT LAST BEST OFFER	The Last Best Offer is determined by the Best Offer published at the same time that the first Closing Price is published for the day.
CLOSING PRICE CHANGE IN CENTS	The closing price variation of the instrument for the period quoted in cents.
PERCENTAGE CLOSING PRICE CHANGE	The closing price variation for the period quoted, as a percentage.
INSTRUMENT GAIN/LOSS INDICATOR	This indicated if there was a closing price gain or loss for the day for every Instrument
SHARE PRICE TYPE (% OR C)	This indicates if the price format for the instrument is a percentage or cents. If the price format is a % the record lengths for the closing price, high trade price, low trade price, dividend yield and earning yield changes will differ as per the layout.
INDEX CONSTITUENT	This indicates if the specified instrument is an index constituent.
INSTRUMENT STATUS	This indicates the current status of the instrument.
INSTRUMENT TYPE CODE	This indicates the type of instrument.
EARNINGS YIELD SIGN	Sign indicating the yield value e.g. 'N' for negative value and 'P' for positive value
INTEREST PAYMENT YIELD	The annualised rolling interest payments divided by the closing price, per Instrument. This is similar to

the dividend yield but only includes interest payments.

CAPITAL PAYMENT YIELD

The annualised rolling capital payments divided by the closing price, per Instrument. This is similar to the dividend yield but only includes capital payments.

INSTRUMENT REIT DISTRIBUTION YIELD

The annualised rolling REIT distributions per instrument, divided by the closing price, per instrument

Instrument numeric code	40	7	46
Instrument short name	47	15 (T)	61
Company name	62	55 (T)	116
ISIN	117	12 (T)	128
Company numeric code	129	4	132
Company Registration Number	133	20	152
Company Income Tax Number	153	15	167

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

INSTRUMENT SHORT NAME

The abbreviated version of the instrument name.

COMPANY NAME

The full name of the issuing company of the instrument.

ISIN

The ISIN (International Securities Identification Number) uniquely identifies all Active and Suspended securities internationally.

COMPANY NUMERIC CODE

Each company is assigned a unique number, to which their Instrument is linked. A company can, under certain circumstances, list different instruments under multiple business relationships (roles) with the JSE. In this situation, the company will have more than one numeric code linked to the different instruments.

COMPANY REGISTRATION NUMBER

Company Registration Number of the issuer.

COMPANY INCOME TAX NUMBER

Tax Number of the issuer.

11.2 Daily Sector Statistics

All instruments traded on the market are grouped according to the type of business they represent.

The statistics for each sector are calculated at the close of business each day.

All daily sector statistics fall within record type DS. The statistics are grouped into various sub types, which allows you to select the type of information you require. The different sub types and the relevant field layouts are listed.

11.2.1 Record Type DS/DSE Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Sector code	40	4 (T)	43
Sector Number of Instruments closing price up	44	9	52
Sector Number of Instruments closing price down	53	9	61
Sector Number of active instruments	62	9	70
Sector Number of trades	71	9	79
Sector Number of instruments	80	5	84

FIELD DESCRIPTIONS:

SECTOR CODE

All instruments in the market are grouped into sectors, according to the type of business they represent.

SECTOR NUMBER OF INSTRUMENTS CLOSING PRICE UP

The number of Instruments within the Sector, which showed an increase in the Latest Closing Price compared to the previous Trading Day's Adjusted Closing Price.

SECTOR NUMBER OF INSTRUMENTS CLOSING PRICE DOWN

The number of Instruments within the Sector, which showed a decrease in the Latest Closing Price compared to the previous Trading Day's Adjusted Closing Price.

SECTOR NUMBER OF ACTIVE INSTRUMENTS

The number of Active Instruments within the Sector for a Trading Day

SECTOR NUMBER OF TRADES

The total number of trades for the sector, which took place on the specified day.

SECTOR NUMBER OF INSTRUMENTS

The number of Current or Suspended Instruments within the Sector for a Trading Day

Trade type	83	2 (T)	84
Sector Trade Type Volume Traded	85	13	97
Sector Trade Type Value Traded	98	15	112
Sector Trade Type Number of Trades	113	9	121

FIELD DESCRIPTIONS:

SECTOR CODE

All instruments in the market are grouped into sectors, according to the type of business they represent.

TRADE TYPE

This indicates the type of trade which has occurred.

SECTOR TRADE TYPE VOLUME TRADED

The volume traded for every Instrument in a Sector by Trade Type for a Trading Day.

SECTOR TRADE TYPE VALUE TRADED

The value traded for every Instrument in a Sector by Trade Type for a Trading Day.

SECTOR TRADE TYPE NUMBER OF TRADES

The number of trades for every Instrument in a Sector by Trade Type for a Trading Day.

11.4 Daily Overall Market Statistics

Daily overall market statistics are calculated at the close of each business day. The record contains the key market statistics for the days trade. It provides a view of the days trade at a glance.

All daily overall market statistics fall within record type DO, and the relevant field layouts are listed below.

11.4.1 Record Type DO Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Market total volume traded	40	13	52
Market total Value Traded	53	15	67
Market Capitalisation for the Market	68	14	81
Market Number of instruments	82	9	90

Barrier Level	115	10 (6.4)	124
Issue Date	125	8	132
Issued Amount	133	15	147

FIELD DESCRIPTIONS:

CALL OR PUT

Call or PutCall: Holder of warrant entitled to buy underlying security Put: Holder of warrant entitled to sell underlying security.

WARRANT STYLE

American: Holder of warrant can exercise on any date up to expiry date.

European: Holder of warrant can only exercise on the exercise date on the expiry date

WARRANT ISSUER

The code of the issuer that issues the warrant.

UNDERLYING SECURITY

The alpha code for the instrument, company, bond, index or commodity, over which the warrant is issued.

COVER RATIO

The ratio, which determines the number of warrants Required to be exercised in relation to the underlying securities.

STRIKE PRICE

Is the price payable by the warrant holder in respect of each warrant on exercise of the warrant.

EXPIRY DATE

Date on which the warrant expires.

12 MONTHS PERCENTAGE MOVE

Percentage movement of the warrant in the last 12 Months.

CLASS OF WARRANTS

Warrant Class refers to the type of the underlying securities.

ISIN

The ISIN (International Securities Identification Number) uniquely identifies securities internationally.

BARRIER LEVEL

Barrier level value identifier.

ISSUE DATE
ISSUED AMOUNT

The date the Warrant was issued
The number of listed Warrants.

11.7.2 Record Type DR/DRE Sub Type 02/3 Continuation Sequence 01 To 99

FIELD NAME	START POS	LENGTH	END POS
WARRANT DESCRIPTION	40	80(T)	119

FIELD DESCRIPTIONS:

WARRANT DESCRIPTION

80-character warrant definition free-form text line that contains description information pertaining to the warrant instrument as captured in the JSE Masterdata systems. There will be more than one of these lines for each warrant up to a maximum of 99 per each of the sub types 02 and 03.

11.8 Adjustments to Equity Market Statistics

When a trade is cancelled the Instrument statistics for the affected day are recalculated. In such a scenario the affected fields will be re-disseminated in this specific record type.

All instruments on the market is identified by a unique alpha code.

*MOVING 12 MONTH HIGH TRADE PRICE

The highest adjusted trade price for an instrument over the past 12 months

*MOVING 12 MONTH HIGH TRADE PRICE DATE

The date on which the highest adjusted trade price for an instrument over the 12 months was attained.

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

11.12 New Lows

The New low information is disseminated daily for shares which have reached it's lowest sale price since listing on the market.

All new low information falls within record type NL. The field layouts are listed below.

11.12.1 Record Type NL/NLE Sub Type 01 Sequence No 01-99

FIELD NAME	START POS	LENGTH	END POS
Instrument alpha code	40	6 (T)	45
Instrument New Low Trade Price	46	9	54

*MOVING 12 MONTH LOW TRADE PRICE DATE

The date on which the lowest adjusted trade price for an instrument over the 12 months was attained.

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

11.13 Instrument Notes – Disseminated Daily

Instrument notes indicates the information pertaining to any Instrument notes, which may be available.

This information is disseminated as and when notes are added or amended. The general Instrument information falls within record type NQ with 3 different sub types.

NOTES: The NQ01/NQE01 record will be created for all Notes that are amended or added for an Instrument.

The NQ02/NQE02 record will consist of notes that are deleted for a Instrument

The NQ03/NQE03 record will consist of all Instrument notes to date. It is recommended that this record type is downloaded once off only, to bring your database up to date.

11.13.1 Record Type NQ/NQE Sub Type 01 (Changes to Instrument notes)

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Instrument note	47	500 (T)	546

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

INSTRUMENT NOTE

This indicates that a note has been loaded pertaining to the Instrument.

NOTE: This record type must be read with record type EC01.

11.13.2 Record Type NQ/NQE Sub Type 02 (Deletions of Instrument notes)

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Instrument note	47	500 (T)	546

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

INSTRUMENT NOTE

This indicates that a note has been loaded pertaining to the Instrument.

11.13.3 Record type NQ/NQE Sub Type 03 (Instrument Notes to date)

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Instrument note	47	500 (T)	546
Instrument Status	547	1 (T)	547

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

INSTRUMENT NOTE

This indicates that a note has been loaded pertaining to the Instrument.

INSTRUMENT STATUS

This indicates the current status of an instrument.

11.14 Company Codes – Disseminated Daily and Monthly

The company code information will give information about companies who have shares listed on the stock exchange. The company information falls within record type YC. A user can subscribe to YC01 on a monthly basis, i.e. the user will receive this record only at the end of the month.

11.14.1 Record Type YC Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Company numeric code	40	4	43
Company listing date	44	8	51
Company status	52	1 (T)	52
Company short name	53	15 (T)	67

Transfer secretary code	123	5 (T)	127
Company country code	128	3 (T)	130
Company alpha code	131	8 (T)	138

FIELD DESCRIPTIONS:

COMPANY NUMERIC CODE

Each company is assigned a unique number, to which their Instrument is linked. A company can, under certain circumstances, list different instruments under multiple business relationships (roles) with the JSE. In this situation, the company will have more than one numeric code linked to the different instruments.

COMPANY LISTING DATE

The date on which the company was listed

COMPANY STATUS

The code indicating the status of the company on the specified date.

COMPANY SHORT NAME

The abbreviated version of the company name.

COMPANY NAME

The full name of the issuing company of the instrument.

TRANSFER SECRETARY CODE

The code used to identify a specific transfer secretary.

COMPANY COUNTRY CODE

The code of the country of the company.

COMPANY ALPHA CODE

The alpha code of the company.

11.15 Annual Instrument Statistics – Dissemination Daily

The annual Instrument statistics disseminated daily, are calculated at the close of each trading day for the shares, which are traded on the market during the year. These record types contain some cumulative information for the shares for the year to date.

All annual Instrument statistics disseminated daily fall within record type EA. These statistics are grouped into various Sub Types, which allows you to select the type of information you require. The different Sub Types and the relevant field's layouts are listed below.

11.15.1 Record Type EA Sub Type 01 Sequence No. 01

FIELD NAME	START POS	LENGTH SHARE PRICE TYPES:		END POS
		CENTS	%

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
INSTRUMENT ADJUSTED OVERACTIVE VOLUME TRADED	The Volume Traded for all Trading Days in a Week divided by the Average Adjusted Volume Traded over the last 12 Months
INSTRUMENT VOLUME DENSITY VALUE	Highest percentage of Instrument listed shares traded in a week.
ADJUSTED HIGH TRADE PRICE	The Adjusted Highest trade price for the week
ADJUSTED LOW TRADE PRICE	The Adjusted Lowest trade price for the week
INSTRUMENT ADJUSTED VOLUME TRADED	The Adjusted Volume Traded for every Instrument for every Trading Day in a Week

12.2 Weekly Sector Statistics

All shares, which are traded on the market, are grouped according to the type of business they represent.

The statistics for each sector are calculated at the close of business on a Friday for the shares, which were traded on the market, during the week.

All weekly sector statistics fall within record type WS.

The statistics are grouped into various Sub Types, which allows you to select the type of information you require. The different Sub Types and the relevant field layouts are listed below.

12.2.1 Record type WS sub type 01

FIELD NAME	START POS	LENGTH	END POS
Sector code	40	4 (T)	43
Sector Number of active instruments	44	9	52
Sector Total Annualised Rolling Adjusted Dividend	53	13 (9.4)	65
Sector Total Annualised Rolling Adjusted Headline Earnings	66	13 (9.4)	78

Declared REIT Distribution per share	102	13 (7.6)	114

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

DECLARED DIVIDEND PER SHARE

The Dividend payment per share (DDPS) declared by a company, in cents.

DIVIDEND FLAG

This indicates what kind of dividend was declared.

F	Final
I	Interim
M	Maiden
S	Special

LAST DATE TO REGISTER

The date that the investor has to be registered on the share register. (Last date to trade +5)

DIVIDEND PAYMENT DATE

The date on which the dividend will be paid out by the issuing company will be given.

PREVIOUS CORRESPONDING DIVIDEND

The dividend payment that was declared in the corresponding quarter of the previous financial year

CA SERIAL NUMBER

This reflects the CA Serial Number of the Corporate Action. It is a unique number that identifies a specific Corporate Action.

DECLARED REIT DISTRIBUTION PER SHARE

The REIT distribution per share declared by a company in cents.

NOTE:

The dividend information will be disseminated whenever a change is made to the record

13 END OF DAY EQUITY DATA PRODUCTS (RECORDS) – MONTHLY

13.1 Monthly Instrument statistics

The monthly Instrument statistics are calculated at the close of business on the last business day of the month for shares, which are traded on the market, during the month. The records display the key monthly statistics.

All monthly Instrument statistics fall within record type ME. The statistics are grouped into various Sub Types, which allows you to select the type of information you require. The different Sub Types and the relevant field layouts are listed below.

13.1.1 Record type ME sub type 01 sequence no. 01

FIELD NAME	START POS	LENGTH SHARE PRICE TYPES:		END POS

Total Number of Instrument Listed Shares In Market	114	15	128
ISIN	129	12	140
Earnings yield sign	141	1 (T)	141
Annualised rolling adjusted dividend cover sign	142	1 (T)	142
Annualised rolling adjusted earnings sign	143	1 (T)	143
Instrument REIT Distribution yield	144	7 (3.4)	150

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
INSTRUMENT DIVIDEND YIELD	The Annualised Rolling Dividends per Instrument divided by the Closing Price, per Instrument.
INSTRUMENT EARNINGS YIELD	The percentage of the purchase price that will be recouped in Earnings per Year per Instrument
INSTRUMENT ANNUALISED ROLLING ADJUSTED DIVIDEND COVER	The Annualised Rolling Headline Earnings per Instrument Divided by the Annualised Rolling Dividends per Instrument
INSTRUMENT ANNUALISED ROLLING ADJUSTED HEADLINE EARNINGS	Annualised Rolling Adjusted Headline Earnings per Instrument, for the last 4 quarters
INSTRUMENT ANNUALISED ROLLING ADJUSTED DIVIDEND	Annualised Rolling Adjusted Dividend per Instrument
TOTAL CAPITAL ISSUED (RANDS)	The total rand Value of the capital issued during the most recent issue
TOTAL NUMBER OF INSTRUMENT LISTED SHARES IN MARKET	The total number of shares currently available for trading in the market for a particular instrument.
ISIN	The ISIN (International Securities Identification Number) uniquely identifies securities internationally.
EARNINGS YIELD SIGN	Value sign for earnings yield e.g. 'N' for negative value and 'P' for positive value
ANNUALISED ROLLING ADJUSTED DIVIDEND COVER SIGN	Sign indicating the dividend cover value 'N' for negative value and 'P' for positive Value

ANNUALISED ROLLING ADJUSTED
EARNINGS SIGN

Sign indicating the earnings value 'N' for negative value
and 'P' for positive value

INSTRUMENT REIT DISTRIBUTION YIELD

The annualised rolling REIT distributions per instrument,
divided by the closing price, per instrument

13.1.5 Record type ME sub type 04

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Adjusted High Trade Price	47	9	55
Adjusted Low Trade Price	56	9	64
Instrument Adjusted Volume traded	65	13	77

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
ADJUSTED HIGH TRADE PRICE	The Adjusted Daily Highest Trade Price for the month.
ADJUSTED LOW TRADE PRICE	The Adjusted Daily Lowest Trade Price for the month.
INSTRUMENT ADJUSTED VOLUME TRADED	The Adjusted Volume Traded for every Instrument for every Trading Day in a Month

13.1.6 Record type ME sub type 05

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Instrument short name	47	15 (T)	61
Company name	62	55 (T)	116
Instrument report name	117	24 (T)	140
Sector code	141	4 (T)	144
Foreign Status Code	145	1 (T)	145
Treated as Domestic	146	1 (T)	146

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

INSTRUMENT SHORT NAME

The abbreviated version of the instrument name.

COMPANY NAME

The full name of the issuing company of the instrument.

INSTRUMENT REPORT NAME

The version of the instrument name used on reports and online facilities.

SECTOR CODE

Instruments grouped accordingly to the type of business they represent. The Value of this sector code is the sector code at the end of the month. Therefore this record should be taken with DE05.

FOREIGN STATUS CODE

This field will be populated if an instrument is classified as 'Foreign Inward Listed' or 'African Inward Listed' by the South African Reserve Bank. It will be blank for all other instruments.

Code	Description
A	African Inward Listed
F	Foreign Inward Listed, excluding Africa
	Blank

TREATED AS DOMESTIC

This field indicates whether an instrument is treated as a domestic instrument for the purpose of exchange control, even though it is an Inward Listed instrument. It will be Y for Yes or N for No for Inward Listed Instruments, or blank for all other instruments.

13.2 Monthly sector statistics

All shares, which are traded on the market are grouped according to the type of business they represent.

The statistics for each sector are calculated at the close of business on the last business day of the month for shares, which were traded on the market, during the month.

All monthly sector statistics fall within record type MS. The statistics are grouped into various Sub Types, which allows you to select the type of information you require. The different Sub Types and the relevant field layouts are listed below.

13.2.1 Record type MS sub type 01

FIELD NAME	START POS	LENGTH	END POS
Sector code	40	4 (T)	43
Sector Number of active instruments	44	9	52
Sector Total Annualised Rolling Adjusted Dividend	53	13 (9.4)	65
Sector Total Annualised Rolling Adjusted Headline Earnings	66	13 (9.4)	78
Sector Market capitalisation	79	14	92
Total earnings Value sign	93	1 (T)	93
Sector Total Annualised Rolling Adjusted REIT Distribution	94	13 (9.4)	106

FIELD DESCRIPTIONS

SECTOR CODE	All instruments in the market are grouped into sectors, according to the type of business they represent.
SECTOR NUMBER OF ACTIVE INSTRUMENTS	The number of Active Instruments within the Sector for all Trading Days in a Month
SECTOR TOTAL ANNUALISED ROLLING ADJUSTED DIVIDEND	Total Annualised Rolling Dividends per Instrument for a Sector.
SECTOR TOTAL ANNUALISED ROLLING ADJUSTED HEADLINE EARNINGS	Total Annualised Rolling Headline Earnings per Instrument for all Instruments in a Sector.
SECTOR MARKET CAPITALISATION	The Total Market Capitalisation for all Instruments within a Sector on a Trading Day.
TOTAL EARNINGS VALUE SIGN	Sign indicating the total earnings e.g. 'N' for negative value and 'P' for positive value.
SECTOR TOTAL ANNUALISED ROLLING ADJUSTED REIT DISTRIBUTION	Total Annualised Rolling REIT Distribution per Instrument for a Sector

Sector Trade Type Value traded	98	15	112
Sector Trade Type Number of trades	113	9	121

FIELD DESCRIPTIONS:

SECTOR CODE	All instruments in the market are grouped into sectors, according to the type of business they represent.
TRADE TYPE	The code indicating the type of Trade.
SECTOR ADJUSTED TRADE TYPE VOLUME TRADED	The Adjusted Volume Traded for every Instrument in a Sector by Trade Type for every Trading Day in a Month
SECTOR TRADE TYPE VALUE TRADED	The Value Traded for every Instrument in a Sector by Trade Type for every Trading Day in a Month
SECTOR TRADE TYPE NUMBER OF TRADES	The number of Trades that took place for a Month period for a Sector per Trade Type

13.4 Monthly overall market statistics

Monthly overall market statistics are calculated at the close of business on the last business day of the month for shares, which were traded on the market during the month. The record contains the key market statistics for the month's trade. It provides a view of the days trade at a glance.

All monthly overall market statistics fall within record type MO. The statistics are grouped into various sub types, which allows you to select the type of information you require. The different sub types and the relevant field layouts are listed below.

13.4.1 Record type MO sub type 01

FIELD NAME	START POS	LENGTH	END POS
Market Total Adjusted Volume Traded	40	13	52
Market Total Value Traded	53	15	67
Market Capitalisation of the Market	68	14	81
Market Number of instruments	82	9	90
Market Number of instruments Closing Price up	91	9	99
Market Number of instruments Closing Price down	100	9	108
Market Number of active instruments	109	9	117
Market Number of instruments with new high Trade Price	118	9	126
Market Number of instruments with new low Trade Price	127	9	135
Market Number of Trades	136	9	144

FIELD DESCRIPTIONS:

MARKET TOTAL ADJUSTED VOLUME TRADED	The Total Adjusted Volume Traded for the Market across all Trading Day's in a Month
MARKET TOTAL VALUE TRADED	The Total Value Traded for the Market for all Trading Day's in a Month
MARKET CAPITALISATION OF THE MARKET	The Total Market Capitalisation for every Instrument in a Market on a Trading Day.
MARKET NUMBER OF INSTRUMENTS	The number of Current and Suspended Instruments within the Market for all Trading Days in a Month
MARKET NUMBER OF INSTRUMENTS CLOSING PRICE UP	The number of Instruments within the Market, which showed an Increase in the Latest Closing Price compared to the Adjusted Closing Price on the Last Trading Day in the Previous Month
MARKET NUMBER OF INSTRUMENTS CLOSING PRICE DOWN	The number of Instruments within the Market, which showed a Decrease in the Latest Closing Price compared to the Adjusted Closing Price on the Last Trading Day in the Previous Month
MARKET NUMBER OF ACTIVE INSTRUMENTS	The number of active instruments within the market which traded in the month
MARKET NUMBER OF INSTRUMENTS WITH NEW HIGH TRADE PRICE	The number of Instruments within the Market, which attained a new High Trade Price during the Month.

MARKET NUMBER OF INSTRUMENTS WITH
NEW LOW TRADE PRICE

The number of Instruments within the Market, which
attained a new Low Trade Price during the Month.

MARKET NUMBER OF TRADES

The number of Trades that took place for a Month period
for a Market

13.4.2 Record type MO sub type 02

FIELD NAME	START POS	LENGTH	END POS
Market Dividend yield	40	13 (9.4)	52
Market Earnings yield	53	13 (9.4)	65
Market Price Earnings ratio	66	13 (9.4)	78

FIELD DESCRIPTIONS:

MARKET DIVIDEND YIELD

The Dividend Yield for a Market on a Trading Day.

MARKET EARNINGS YIELD

The Earnings Yield for a Market on a Trading Day.

MARKET PRICE EARNINGS RATIO

The Price Earnings Ratio for the Market on a Trading Day

TOTAL NUMBER OF INSTRUMENT LISTED
SHARES IN MARKET

The Total Number of Instrument Listed Shares currently
available for trading in the Market.

NUMBER OF DAYS MARKET TRADED

The number of Days on which a Market traded during the
Month

MARKET HIGHEST NUMBER OF TRADES

The Highest Number of Trades that took place on a Day
for a Month period for a Market

MARKET HIGHEST NUMBER OF TRADES
DATE

The Date on which the Highest number of Trades that
took place on a Day for a Month period for a Market was
attained.

MARKET LOWEST NUMBER OF TRADES

The Lowest number of Trades that took place on a Day
for a Month period for a Market

MARKET LOWEST NUMBER OF TRADES
DATE

The Date on which the Lowest number of Trades that
took place on a Day for a Month period for a Market was
attained

EARNINGS YIELD SIGN

Sign indicating the earnings yield Value e.g. 'N' for
negative value and 'P' for positive value

PRICE/EARNINGS RATIO SIGN

Value sign for P/E ratio e.g. 'N' for negative value and 'P' for positive value

MARKET REIT DISTRIBUTION YIELD

The REIT Distribution Yield for a Market on a Trading Day.

13.4.3 Record type MO sub type 03

14 END OF DAY EQUITY DATA PRODUCTS – GENERAL RECORDS

The following record types are only disseminated when changes are made to the relevant information.

14.1 Instrument General Information

The Instrument general information record contains details of the type of Instrument, and general information related to it. This record is disseminated when a new Instrument is listed on the market. The information will be disseminated on the night before it becomes effective.

The general Instrument information falls within record type EQ, and the relevant field layouts are listed. The EQE is the early dissemination record.

14.1.1 Record Type EQ/EQE Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Instrument type code	47	10 (T)	56
Price prior to listing	57	6	62
Next expected declaration date	63	8	70
Capital introduced	71	15 (13.2)	85
Capital raised prior to listing	86	13 (11.2)	98
Charge Structure code	99	2 (T)	100

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
INSTRUMENT TYPE CODE	This indicates the type of instrument e.g. Ordinary, Deb (Debenture) etc.
PRICE PRIOR TO LISTING	The price quoted in cents at which the instruments were available to the public prior to listing.
NEXT EXPECTED DECLARATION DATE	<p>The date a company is expected to declare its next dividend. The Next Expected Declaration Date will be calculated as follows:</p> <ul style="list-style-type: none"> - For Payment Types: Dividend, Interest Payment and Capital Payments the Dividend Frequency is added to the LDT of the last payment that was made. For example, if the dividend frequency of an instrument is Semi Annually, 6 months will be added to the LDT. - Where the last dividend was paid a long time ago and the Next Expected Declaration Date calculates to a date in the past, the Next Expected Declaration Date will be NULL. <p>Where the Next Expected Declaration Date is calculated and falls on a Non Business Day, the Previous Business Day will be selected. If no payments have been made (new Company) the Next Expected Declaration Date will be NULL</p>
CAPITAL INTRODUCED	The rand Value of the capital introduced by an issuing company when an instrument was listed on the JSE.
CAPITAL RAISED PRIOR TO LISTING	The amount of capital, quoted in Rands, which was raised prior to the listing on the JSE.

CHARGE STRUCTURE CODE

The code indicating the type of charge applied when an instrument is traded.

14.2 Instrument Version Information

The Instrument version information record contains basic information specific to each instrument traded on the market. The Instrument code and name, as well as the date from which an instrument becomes effective on the market is included in the record. The record is disseminated on the night before a new instrument lists for the first time and also on any day that a change is subsequently made to the Instrument information.

The Instrument version information falls within record type EN. Different types of information are grouped into sub types, to allow the user to select the information required. These sub types and the relevant field layouts are listed. The ENE is the early dissemination record.

In Summary when a change occurs to an instrument, the **EN 01** record type for the instrument will provide a 'before' image in Sequence 01 and the 'after' image in Sequence 02 of the record.

N.B. In exceptional instances, due to a specific type of corporate event, a non-tradable instrument will need to be temporarily created and provided on an ad-hoc basis in order to support the complex corporate action. Please refer to section 9 of this documents for detailed explanation.

14.2.1 Record Type EN/ENE Sub Type 01 Sequence 01-02

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Effective date	47	8	54
Instrument Short name	55	14 (T)	68
Company Name	69	55 (T)	123
Company numeric code	124	4	127
Sector code	128	4 (T)	131
Instrument status	132	1 (T)	132
ISIN	133	12 (T)	144

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

EFFECTIVE DATE

The date on which an Instrument change becomes effective.

INSTRUMENT SHORT NAME

The abbreviated version of an instrument name.

COMPANY NAME

The full name of the issuing company of an instrument.

COMPANY NUMERIC CODE

Each company is assigned a unique number, to which their Instrument is linked. A company can, under certain circumstances, list different instruments under multiple business relationships (roles) with the JSE. In this situation, the company will have more than one numeric code linked to the different instruments

SECTOR CODE

All instruments in the market are grouped into sectors, according to the type of business they represent

INSTRUMENT STATUS

This indicates the current status of the instrument.

ISIN

The ISIN (International Securities Identification Number) uniquely identifies securities internationally.

14.2.2 Record Type EN/ENE Sub Type 02 Sequence 01 and 02

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Effective date	47	8	54
Instrument Report name	55	24 (T)	78
Instrument full name	79	55 (T)	133

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

EFFECTIVE DATE

The date on which an Instrument change becomes effective.

INSTRUMENT REPORT NAME

The version of an instrument name used on reports and online facilities.

INSTRUMENT FULL NAME

The full Instrument name.

Note:

Sequence number 1 as reflected in the header record will contain the 1st line of the Instrument name. Sequence number 2 will contain the 2nd line of the Instrument name in the case of the extended definition of the warrants. Therefore each Instrument full name will consist of 2 lines.

14.3 Instrument Version Summary

The Instrument version summary record contains summarised information about a change to the Capital structure of an instrument. The type of change and the ratio of old shares for new will be given. This record will be disseminated on the night before the change becomes effective, and only the record which has been changed, will be disseminated.

The Instrument version summary falls within record type ES, and the relevant field layouts are listed. The ESE is the early dissemination record.

14.3.1 Record Type ES/ESE Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Effective date	47	8	54
Event which caused change	55	3 (T)	57
Number of shares one has (have)	58	5	62
Number of shares one will receive (receive)	63	5	67
Occurrence number per day of events	68	2	69
ISIN	70	12 (T)	81
Instruction indicator	82	1 (T)	82

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
EFFECTIVE DATE	The date on which an Instrument change becomes effective.
EVENT WHICH CAUSED CHANGE	The code indicating the type of change to an Instrument.
NUMBER OF SHARES ONE HAS (HAVE)	The minimum number of instruments a shareholder must own to receive the number of new instruments given in the 'No of Shares One Will Receive' field.
NUMBER OF SHARES ONE WILL RECEIVE (RECEIVE)	The number of instruments a shareholder will receive by virtue of the number of instruments already held.
OCCURRENCE NUMBER PER DAY OF EVENTS	Since more than one event may take place for an Instrument on one day, the events are numbered to indicate the sequence in which they will take place.
ISIN	The ISIN (International Securities Identification Number) uniquely identifies securities internationally.
INSTRUCTION INDICATOR	Indicates whether the instruction is N, C or D for New, Changed or Deleted, respectively.

14.4 Instrument Status Change

The Instrument status change record indicates a change in status of an instrument traded on the market, as well as changes to Annotations or Ex markers related to the instrument.

The status of an instrument may change during the course of a day; an instrument may be suspended, or become active during the day. This record will be disseminated on the day that a change is made, and only the record which has been changed, will be disseminated. The ECE record, is part of the early dissemination.

The Instrument status change falls within record type EC, and the relevant field layouts are listed below.

14.4.1 Record Type EC/ECE Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Effective Date	47	8	54
Effective Time	55	6	60
Instrument status	61	1 (T)	61
Status info	62	6 (T)	67

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
EFFECTIVE DATE	The date on which an Instrument change becomes effective.
EFFECTIVE TIME	The time from which an Instrument's status changed in the format HHMMSS.
INSTRUMENT STATUS	This indicates the current status of the instrument.
STATUS INFO	The information / cautionary flag's pertaining to the status change.

14.5 Company Information

The company information record contains details of the companies (Issuers) who have instrument(s) listed on the stock exchange. This record will be disseminated on the day that a change is made to the Issuer information, and only the record which has been changed, will be disseminated.

The company information falls within record type CO, and the relevant field layouts are listed below.

14.5.1 Record Type CO/COE Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Company numeric code	40	4	43
Effective date	44	8	51
Company status	52	1 (T)	52
Company short name	53	15 (T)	67
Company name	68	55 (T)	122
Transfer secretary code	123	5 (T)	127

FIELD DESCRIPTIONS:

COMPANY NUMERIC CODE

Each company is assigned a unique number, to which their Instrument is linked. A company can, under certain circumstances, list different instruments under multiple business relationships (roles) with the JSE. In this situation, the company will have more than one numeric code linked to the different instruments.

EFFECTIVE DATE

The date on which the change becomes effective.

COMPANY STATUS

The code indicating the status of a company on a specified date.

COMPANY SHORT NAME

The abbreviated version of a company name.

COMPANY NAME

The full name of the issuing company of an instrument.

TRANSFER SECRETARY CODE

The code used to identify a specific transfer secretary.

14.6 Capital Structure

The capital structure record contains information on how a company has financed its operations by floating instrument on the market. A company may, for example, issue an initial 500 000 instrument at 100 cents each, and at a later date another 100 000 at 120 cents each. This record will be disseminated on the night before an instrument lists for the first time and any day that a change is made to the capital structure, and only the record which has been changed, will be disseminated.

The capital structure information falls within record type CS. Different types of information are grouped into sub types, to allow the user to select the information required. These sub types and the relevant field layouts are listed below.

14.6.1 Record Type CS Sub Type 01 Sequence No. 01 - 99

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Effective date	47	8	54
Total Number of Instrument Listed Shares In Market	55	15	69
Share price type (% or C)	70	1 (T)	70
New shares to be listed	71	15	85
Capital Structure status	86	1 (T)	86
Issue price per share (cents)	87	13 (7.6)	99
Total capital issued (Rands)	100	15 (13.2)	114
Record date	115	8	122
Total capital raised (Rands)	123	15 (13.2)	137
Payment date	138	8	145
Index constituent	146	1 (T)	146
Number of shares listed sign	147	1 (T)	147

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
EFFECTIVE DATE	The date on which a capital structure change becomes effective.
TOTAL NUMBER OF INSTRUMENT LISTED SHARES IN MARKET	The total number of shares currently available for trading in the market for a particular instrument.
SHARE PRICE TYPE (% OR C)	This indicates if the price format for an instrument is a percentage or cents.
NEW SHARES TO BE LISTED	The total number of instruments issued by this event. This number may be negative if the event in question causes the number of instruments to be reduced, e.g. Redemption, Final conversion.
CAPITAL STRUCTURE STATUS	This indicates the status of the capital structure of an Instrument on a specified date.
ISSUE PRICE PER SHARE (CENTS)	The price per instrument when listed.
TOTAL CAPITAL ISSUED (RANDS)	The total rand Value of the capital issued during the most recent issue.

RECORD DATE	The latest date shares can be lodged for registration to enable the shareholder to qualify for an entitlement.
TOTAL CAPITAL RAISED (RANDS)	The total Rand value of the capital raised through an event.
PAYMENT DATE	The date on which a company will pay out any funds as a result of a capital structure change.
INDEX CONSTITUENT	This indicates if the specified instrument is a constituent of an Index.
NUMBER OF SHARES LISTED SIGN	This indicates the sign of the number of instruments listed.

14.6.2 Record Type CS Sub Type 02 Sequence No. 01 - 99

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Par Value per share (cents)	47	13 (7.6)	59
Authorized capital (Rands)	60	15(13.2)	74
Occurrence number per day of events	75	2	76

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
PAR VALUE PER SHARE (CENTS)	The Value at which the instruments were first issued.
AUTHORISED CAPITAL (RANDS)	The total rand Value of the authorised capital for a company.
OCCURRENCE NUMBER PER DAY OF EVENTS	Since more than one event may take place for an Instrument on one day, the events are numbered to indicate the sequence in which they will take place.

NOTE: This is the detailed record of ES (Instrument Version Summary) record type.

14.7 Instrument Dividend

The Instrument dividend record contains details of the latest dividends for each instrument traded on the market. This record will be disseminated on the day that a change is made to the Instrument dividend information, and only the record which has been changed, will be disseminated. The Instrument dividend information falls within record type ED. The EDE is the early dissemination record.

Different types of information are grouped into sub types, to allow the user to select the information required.

14.7.1 Record Type ED/EDE Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Declared dividend per share	47	13 (7.6)	59
Record Date	60	8	67
Payment Classification	68	6 (T)	73
Dividend payment date	74	8	81
Dividend number	82	10	91
Dividend declaration date	92	8	99
Instrument Adjusted Payment	100	13 (7.6)	112
Financial year end	113	8	120
Dividend declaration period	121	1	121
Instrument Annualised rolling adjusted payment	122	15 (9.6)	136
Dividend flag	137	3 (T)	139
CA Serial Number	140	10	149
Filler	150	3	152

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
DECLARED DIVIDEND PER SHARE	The Dividend payment per share (DDPS) declared by a company, in cents.
RECORD DATE	The date that the investor has to be registered on the share register. (Last date to trade +5).
PAYMENT CLASSIFICATION	The high level payment type into which Corporate Action payment types are combined for statistical purposes.
DIVIDEND PAYMENT DATE	The date on which a dividend will be paid by the issuing company, in the format CCYYMMDD.
DIVIDEND NUMBER	The number of a particular dividend as declared by the company.
DIVIDEND DECLARATION DATE	The date on which a company declared a dividend.
INSTRUMENT ADJUSTED PAYMENT	Adjusted Payment per Instrument based on Payment Type
FINANCIAL YEAR END	The financial period to which the dividend or earnings relate.

DIVIDEND DECLARATION PERIOD

The period in the financial year in which a dividend was declared.

INSTRUMENT ANNUALISED ROLLING ADJUSTED PAYMENT

Annualised Rolling Adjusted Payment per Instrument based on Payment Type (No Value for when the Payment Type is (SPECDIV))

DIVIDEND FLAG

This indicates what kind of dividend was declared.

F	Final
I	Interim
M	Maiden
S	Special

CA SERIAL NUMBER

This reflects the CA Serial Number of the Corporate Action. It is a unique number that identifies a specific Corporate Action.

FILLER

This field will not contain a value, reserved for future use.

NOTE:

The dividend information will be disseminated whenever a change is made to the record.

14.8 Instrument Earning

The Instrument earning record contains details of the annual earning or profit after tax, less preference dividends and profits attributed to outside shareholders, per instrument traded on the market.

This record will be disseminated on the day that a change is made to the Instrument earnings information, and only the record which has been changed, will be disseminated. The Instrument earning information falls within record type EE. The EEE is the early dissemination record.

14.8.1 Record Type EE/EEE Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Declared earnings per share (cents)	47	13 (7.6)	59
Earnings Declaration date	60	8	67
Instrument Adjusted Headline earnings	68	13 (7.6)	80
Financial year end	81	8	88
Earnings declaration period	89	1	89
Instrument Annualised Rolling Adjusted Headline earnings	90	15 (9.6)	104
Instrument earnings of share sign	105	1	105
Revised rolling annualised adjusted earnings sign	106	1	106
Annualised rolling adjusted earnings sign	107	1	107
Filler	108	1	108
Final declared earnings	109	15 (9.6)	123
Final declared earnings sign	124	1 (T)	124

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE	All instruments traded on the market are identified by a unique numeric code.
DECLARED EARNINGS PER SHARE (CENTS)	The Headline earnings per share declared (DHEPS) by the listed instrument, in cents. Note: Where no HEPS is declared, then the AHEPS Values disseminated by the JSE will be zero.
EARNINGS DECLARATION DATE	The date on which the earnings were declared.
INSTRUMENT ADJUSTED HEADLINE EARNINGS	Adjusted Headline Earnings per Instrument
FINANCIAL YEAR END	The financial period to which the earnings relate.
EARNINGS DECLARATION PERIOD	The period in the company's financial year in which the earnings were declared.
INSTRUMENT ANNUALISED ROLLING ADJUSTED HEADLINED EARNINGS	The Annualised Rolling Adjusted Headline Earnings per Instrument for the last 4 quarters.
INSTRUMENT EARNINGS OF SHARE SIGN	Sign indicating the Instrument Earnings of Share Value e.g. 'N' for negative and 'P' for positive Value.
REVISED ROLLING ANNUALISED ADJUSTED EARNINGS SIGN	Sign indicating the revised earnings Value e.g 'N' for negative and 'P' for positive Value.

ANNUALISED ROLLING ADJUSTED
EARNINGS SIGN

Sign indicating the earnings Value e.g. 'N' for negative
and 'P' for positive Value.

FILLER

This field will not contain a value.

FINAL DECLARED EARNINGS

The Final Headline earnings per share declared for the
full financial year. This will only be populated for Quarter
4 declarations.

FINAL DECLARED EARNINGS SIGN

Sign indicating the final declared earnings value e.g. 'N'
of negative and 'P' for positive value.

NOTE:

Earning information will be disseminated whenever a
change is made to the record.

14.9 Financial Year Summary

The Financial year summary is the annual financial summary of all earnings / payment declaration made for an instrument.

A separate record is disseminated per declaration type (Earnings / the different payment types as specified in the glossary). The financial year summary information will be disseminated on the day that a change is made to the financial year summary information. Only the record which has been changed will be disseminated.

The financial year summary information falls within record type FY; the record type FYE is the early dissemination of the FY record type. There is only one Sub Type within this record type.

14.9.1 Record Type FY/FYE Sequence Number 01 - 99

FIELD NAME	START POS	LENGTH	END POS
Instrument numeric code	40	7	46
Financial year end	47	8	54
Declaration Type	55	2	56
Total for Financial Year	57	15 (9.6)	71
Declaration Total for Financial year sign	72	1	72

FIELD DESCRIPTIONS:

INSTRUMENT NUMERIC CODE

All instruments traded on the market are identified by a unique numeric code.

FINANCIAL YEAR END

The financial period to which the transactions relate. I.e. the financial year-end of the company.

DECLARATION TYPE

This indicates which financial year total is contained in the record type.

TOTAL FOR FINANCIAL YEAR

Depending on the declaration type this field will contain either:

- The total of any Adjusted Headline Earnings that was declared for the current Financial Year.

OR

- The total of any Dividends that was declared for the current Financial Year

OR

- The total of any Interest Payments that was declared for the current Financial Year

OR

- The total of any Capital Payments that was declared for the current Financial Year

OR

- The total of any Special Payments that was declared for the current Financial Year

DECLARATION TOTAL FOR THE FINANCIAL YEAR SIGN

Sign indicating the declaration total value e.g. 'N' of negative and 'P' for positive value.

14.10 Sector Information

The sector information is the basic information, which is specific to each sector of shares traded on the market. The codes used to identify the sectors and other relevant information related to the sectors is included.

The sector information will be disseminated on the day that a change is made to the sector information. Only the record, which has been changed, will be disseminated.

All basic sector information falls within record type SN. The different types of information are grouped into different two Sub Types, which allows you to select the type of information you require. The different Sub Types and the relevant field layouts are listed below.

14.10.1 Record type SN/SNE sub type 01

FIELD NAME	START POS	LENGTH	END POS
Sector code	40	4 (T)	43
Effective date	44	8	51
Sector short name	52	13 (T)	64
Sector Afrikaans short name	65	13 (T)	77
Parent sector	78	4 (T)	81
Filler	82	1 (T)	82
Sector status	83	1 (T)	83

FIELD DESCRIPTIONS:

SECTOR CODE	All instruments in the market are grouped into sectors, according to the type of business they represent. Each sector is assigned an alpha-numeric code.
EFFECTIVE DATE	The date on which the sector change becomes effective.
SECTOR SHORT NAME	The abbreviated version of the sector name.
SECTOR AFRIKAANS SHORT NAME	The Afrikaans abbreviation of the sector name.
PARENT SECTOR	This is the master code of the sector under which a particular sector falls.
FILLER	Space or Blank.
SECTOR STATUS	The status of the sector on the specified date.

14.10.2 Record type SN/SNE sub type 02

FIELD NAME	START POS	LENGTH	END POS
Sector code	40	4 (T)	43
Sector name	44	40 (T)	83
Sector Afrikaans name	84	40 (T)	123

FIELD DESCRIPTIONS:

SECTOR CODE

All instruments in the market are grouped into sectors, according to the type of business they represent. Each sector is assigned an alpha-numeric code.

SECTOR NAME

The full description of the sector.

SECTOR AFRIKAANS NAME

The Afrikaans description of the sector.

15 CORPORATE ACTIONS DATA PRODUCT

The CA record type reflects a defined set of future dated Corporate Actions. The Corporate Action information provided is the basic information, which is specific to each Instrument. It provides the same information as the JSE's CA schedule product, which is in an Excel format.

All basic Corporate Action information falls within record type CA. Not all the fields will be populated for all the different Corporate Actions. The relevant fields for each Corporate Action is specified below in the layout table.

15.1 Record Type CA 01

FIELD DESCRIPTIONS:

Source Instrument	Instrument that corporate actions are based on and to which entitlements are due.
Source Instrument: ISIN	This represents the ISIN (International Securities Identification Number) of the Source Instrument for the Corporate Action. This number can change during the lifetime of an instrument e.g. when the instrument undergoes a Name Change (NC Event type)
Source Instrument: Alpha Code	This represents the Alpha Code of the Source Instrument. The Alpha Code is a unique JSE Identification trading code of instruments on the JSE..
Source Instrument: Short Name	This represents the Short Name of the Source Instrument.
Source Instrument: Instrument Long Name	This represents the Long Name of the Source Instrument.
Source Instrument: LSE TIDM	This represents the TIDM of the Source Instrument. The TIDM is a unique London Stock Exchange identifier for the instrument.
Source Instrument: Instrument Type	This represents the Instrument Type of the Source Instrument. E.g. Ordinary, Preference Share, Debenture, etc.
Source Instrument: Warrant Type	This represents the Warrant Type of the Source Instrument if the instrument is a Warrant. This will be a null value if the Instrument is not a Warrant. Values are AC (American Call), AP (American Put), EC (European Call), EP (European Put), AX (American Combined), EX (European Combined) and OT (Other).
Source Instrument: Board	This represents the Board of the Source Instrument. E.g. Main, AltX, VCM and DCM.
Source Instrument: Sub Sector	This represents the Industry Sub Sector Code of the Source Instrument as determined by the ICB classification.
Source Instrument: Dual Listed	This is an indicator which represents whether the instrument is listed on more than one exchange. Options are 'Y' or blank
Source Instrument: Issuer Name	This represents the Issuer Name of the Source Instrument.
Resultant Instrument: ISIN	This represents the ISIN number of the Resultant Instrument for the Corporate Action. This number can change during the lifetime of an instrument e.g.

	when the instrument undergoes a Name Change (NC Event type)
Resultant Instrument: Alpha Code	This represents the Alpha Code of the Resultant Instrument. The Alpha Code is a unique JSE Identification trading code of instruments on the JSE.
Resultant Instrument: Short Name	This represents the Short Name of the Resultant Instrument.
Resultant Instrument: Instrument Long Name	This represents the Long Name of the Resultant Instrument.
Resultant Instrument: LSE TIDM	This represents the TIDM of the Resultant Instrument. The TIDM is a unique London Stock Exchange identifier for the instrument.
Resultant Instrument: Instrument Type	This represents the Instrument Type of the Resultant Instrument. E.g. Ordinary, Preference Shares, Debenture, etc.
Resultant Instrument: Board	This represents the Board of the Resultant Instrument for the Corporate Action. E.g. Main, AltX, VCM or DCM.
Resultant Instrument: Sub Sector	This represents the Industry Sub Sector Code of the Resultant Instrument as determined by the ICB classification..
Resultant Instrument: Dual Listed	This is an indicator which represents whether the instrument is listed on more than one exchange. Options are 'Y' or blank
Event Type	This reflects the Corporate Action Event Type which generates the change to the Instrument / share holding. e.g. SD (Subdivision), CD (Cash Dividend), NC (Name Change) etc.
Salient Date: Record Last Updated	This represents the Process Date Time stamp of the last time the relevant Corporate Action was updated.
Salient Date: Declaration Date	This represents the Declaration Date for the relevant Corporate Action (The date when the event was initially entered into the system).
Salient Date: Listing / Reinstatement Date	This represents the Listing Date or Reinstatement Date (Suspension Lifted) for the relevant Corporate Action.
Salient Date: Shareholder's Meeting If Applicable	This represents the Shareholder Meeting Date for the relevant Corporate Action if applicable.
Salient Date: LDT	This is the last date that trading can take place in the source instrument and the holder is still entitled to participate in the corporate action.
Salient Date: EX Date	This represents the EX Date for the relevant Corporate Action. This is on the next working day

after LDT – the shareholder no longer qualify to receive the entitlement, if his entitlement has been sold.

Salient Date: Offer Opens Date

This represents the Offer Opening Date for the relevant Corporate Action.

Salient Date: Election / Offer Close Date

This represents the Offer Close Date for the relevant Corporate Action. This is the last day to elect to receive an option.

Salient Date: Record Date

This represents the Record Date for the relevant Corporate Action (The day that the registers of the Transfer Secretary are updated).

Salient Date: Issue Date

This represents the Issue Date for the relevant Corporate Action (The date when resultant shares are issued to the shareholders).

Salient Date: Pay Date

This represents the Pay Date for the relevant Corporate Action (The date when cash is paid to shareholders for any form of payment e.g. dividend, capital distribution or offer).

Salient Date: Suspension Date

This represents the Suspension Date for the relevant Corporate Action. The shares of the company cannot be traded while it is suspended.

Salient Date: Termination / Withdrawal Date / Expiry Date

This represents the Termination Date for the relevant Corporate Action.

Option 1: NETT Rate in cents per share

This represents the payment amount, excluding withholding tax and foreign tax, expected from a share with regard to the Corporate Actions in which the Shareholder has the right to receive a payment e.g. CD (Cash Dividend).

For Cash Dividends (CD), Scrip Dividends (SC) and Special Dividends (IS) it is calculated in the following way:

Scenario 1:

If the $(\text{Foreign Tax\%} - \text{Foreign Reclaim\%}) > \text{Local Withholding Tax \%}$

The following calculation will apply:

$$\text{Nett Rate} = (\text{Gross} - \text{STC}) - ((\text{ForeignTax} - \text{ForeignTaxReclaim}) * (\text{Gross} - \text{STC}) / 100) + \text{STC}$$

Scenario 2:

If the $\text{Local Withholding Tax \%} \geq (\text{Foreign Tax\%} - \text{Foreign Reclaim\%})$

Then the following calculation will apply:

$$\text{Nett Rate} = (\text{Gross} - \text{STC}) - ((\text{WithholdingTax}) * (\text{Gross} - \text{STC})/100) + \text{STC}$$

* This value does not take into account any tax exemptions or double taxation agreements.

This represents the Link Operator that will be used to indicate whether the payment offers money AND shares, or money OR shares.

Option 1: AND / OR? Default?

Option 1: Ratio: Source Portion

The Source to Resultant ratio (S:R) is the ratio in which scrip will be received. E.g. S:R = 1:2 means the shareholder will get 2 new shares for every 1 held.

Option 1: Ratio: Resultant Portion

The Source to Resultant ratio (S:R) is the ratio in which scrip will be received. E.g. S:R = 1:2 means the shareholder will get 2 new shares for every 1 held.

AND / OR? Default?

This represents the Link Operator between Option 1 and Option 2,

Option 2: NETT Rate in cents per share

This represents the payment amount, excluding withholding tax and foreign tax, expected from a share with regard to the Corporate Actions in which the Shareholder has options with regard to payment (E.g. Scrip Dividends (SC))

For Scrip Dividends (SC) it is calculated in the following way:

Scenario 1:

If the (Foreign Tax% – Foreign Reclaim%) > Local Withholding Tax %

The following calculation will apply:

$$\text{Nett Rate} = (\text{Gross} - \text{STC}) - ((\text{ForeignTax} - \text{ForeignTaxReclaim}) * (\text{Gross} - \text{STC})/100) + \text{STC}$$

Scenario 2:

If the Local Withholding Tax % >= (Foreign Tax% – Foreign Reclaim%)

Then the following calculation will apply:

$$\text{Nett Rate} = (\text{Gross} - \text{STC}) - ((\text{WithholdingTax}) * (\text{Gross} - \text{STC})/100) + \text{STC}$$

*This value does not take into account any tax exemptions or double taxation agreements.

This represents the Link Operator that will be used to indicate whether the payment offers money AND shares, or money OR shares.

Option 2: AND / OR? Default?

Option 2: Ratio: Source Portion

The Source to Resultant ratio (S:R) is the ratio in which scrip will be received. E.g. S:R = 1:2 means

	the shareholder will get 2 new shares for every 1 held.
Option 2: Ratio: Resultant Portion	The Source to Resultant ratio (S:R) is the ratio in which scrip will be received. E.g. S:R = 1:2 means the shareholder will get 2 new shares for every 1 held.
Processing: Issue Price In Cents Per Share	This represents the Issue Price for a share recorded within a Corporate Action (e.g. event types MB, MW, AS, GI, SI etc.)
Processing: Buy Price Odd Lot Offer	This represents the Buy Price offered within Odd Lot Offers for an OL Corporate Action. It is the price at which the Issuer will repurchase the Odd Lot holding from the Shareholder.
Processing: Sell Price Odd Lot Offer	This represents the Sell Price offered within Odd Lot Offers for an OL Corporate Action. It is the price at which the Issuer will sell the Odd Lot holding to the Shareholder
Processing: Minimum Qualifying Quantity	This represents the Minimum Qualifying Quantity for a Corporate Action (the minimum qualifying number of shares or cash amount required to participate in the entitlement).
Processing: Maximum Qualifying Quantity	This represents the Maximum Qualifying Quantity for a Corporate Action (the maximum qualifying number of shares or cash amount required to participate in the entitlement).
Processing: Excess Indicator	This represents the Excess Indicator for a Corporate Action. It is an indicator to inform the shareholder whether or not excess shares are available in a rights offer that has not been underwritten.
Processing: Issue Indicator	This represents the Issue Indicator for a Corporate Action. It indicates whether any minimum qualifying quantities are in cash or number of shares.
Processing: Offer Indicator	This represents the Offer Indicator for a Corporate Action. It indicates if the new listing is done by means of a private placement, IPO, both.
Processing: Strike Price Cents Per Share	This represents the Strike Price for a Corporate Action (the price at which you can purchase the underlying). This value is only applicable to Warrants and will be blank for all other Instruments.
Processing: Barrier / Stop Loss Levels	<p>This represents the Barrier / Stop Loss Level for a Corporate Action. This value is blank for all Instruments that are not warrants.</p> <p>The Barrier Level is the level of the underlying that, if reached, will result in the warrant automatically terminating with a zero value.</p>

Similar to a barrier with respect to warrants, except there is usually a redeemable portion payable to warrant holders on termination of a warrant.

Processing: Current Instruments In Issue

This represents the Listed Instruments in issue for the Source Instrument. For an IC Corporate Action this value will represent the current total number of Authorised Instruments.

Processing: Instruments In Issue Add / Withdrawn

This represents the number of Instruments to change for the Source Instrument. For an IC Corporate Action this value will represent the change in Authorised Instruments.

Processing: New Total Instruments In Issue

This represents the Listed Instrument value related to the Source Instrument after the Corporate Action has been processed. For an IC Corporate Action this value will represent the new total Authorised Instruments.

Payments Specific: Dividend Number

This represents the number given to a Dividend Payment within a Corporate Action.

Payments Specific: Dividend Type

This represents the type of Dividend Payment related to a Corporate Action. Values are 'Interim' / 'Final' / 'Special'.

Notes: Notes

This represents the Notes field saved to the Corporate Action. It contains any pertinent information not already on the Corporate Actions schedule, e.g. Reasons for suspensions / termination

JSE General: SAFEX

This is related to an indicator of whether the Instrument is related to a Derivative Instrument. Values are 'Y' or 'N'.

JSE General: Retain History

This is related to whether the Corporate Action will retain the original data related to an Instrument. This value will only be populated for NC and RL Corporate Actions. Values are 'Y' or 'N'.

JSE General: Official Approval

This is related to the Status of a Corporate Action. The CA must be approved by a Corporate Finance Officer of the JSE as well as Annual General Meetings or Special General Meetings if required, and sanctioned by the courts if required, to have a 'Y' status. If any are outstanding this will have a 'N' status and the event will not proceed until the outstanding issues have been resolved / addressed.

Sequencing: CA Serial Number

This reflects the CA Serial Number of the Corporate Action. It is a unique number that identifies a specific Corporate Action.

Sequencing: Link ID 1	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 2	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 3	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 4	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 5	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 6	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 7	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 8	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 9	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Link ID 10	This reflects the CA Serial number of another Corporate Action which the relevant CA is related to (blank if not applicable)
Sequencing: Sequencing	This reflects the Sequence Number of the Corporate Action
Sequencing: Relationship	This reflects a description of the Relationship between the relevant Corporate Actions which will be displayed as a string of text that shows the brackets with AND/OR operators in each Corporate Action that is affected in the sequence.
Source Equity Numeric Code	Unique identifier for the source instrument.
Resultant Equity Numeric Code	Unique identifier for the resultant instrument.
Option 1 Gross rate in cents per share	This represents the payment amount, including withholding tax, expected from a share with regard to the Corporate Actions in which the Shareholder has the right to receive a payment e.g. CD (Cash Dividend) or CP (Capital Payment)

Option 2 Gross rate in cents per share	This represents the payment amount, including withholding tax, expected from a share with regard to the Corporate Actions in which the Shareholder has options with regard to payment (E.g. Scheme Of Arrangements, Scrip Dividends)
BEE Indicator	<p>This field indicates whether the Corporate Action is part of a BEE transaction. Only applicable to the SA (Scheme of Arrangement) Corporate Action type.</p> <p>Valid values will include 'Y' or 'N' for the SA Corporate Action type and blank for all other Corporate Action types.</p>
Withholding Tax Percentage	The percentage of local tax deducted for South African shareholders
Foreign Tax Percentage	The percentage of foreign withholding tax deducted in the foreign jurisdiction, if applicable
Foreign Tax Reclaim Percentage	The foreign withholding tax that can be reclaimed by South African Shareholders
STC Credits per Share	Amount of STC credits applicable to the payment, in cents per share
Dividend in Specie	Indicates whether the corporate action is a dividend in specie.
Source of Payment	<p>This field will contain a "Y" if the Corporate Action is a dividend in Specie, else it will be blank.</p> <p>Indicates the Source of payment of the corporate action. This field will contain "INC" for Income, "CAP" for Capital or "INT" for Interest else it will be blank. This field applies to the following corporate actions:</p> <p>CD, SC, IS, IL, CP, CR and IT (refer to the Glossary of terms for corporate action types)</p>
Company Registration Number	Company Registration Number of the issuer
Company Income Tax Number	Tax Number of the issuer
Fraction Payment Date	Date of payment
Rounding Methodology	<p>Rounding convention for fractional entitlements</p> <ul style="list-style-type: none"> • D – Round Down (This is where the share entitlement is rounded down to the last full unit, and the fractions are discarded) • U – Round Up (This is where the share entitlement is rounded up to the next full unit, and the fractions are discarded) • S – Standard Rounding (Fractions will be rounded down to the nearest whole number if they are less than 0,5 or will be rounded up to the nearest whole number if they are equal to or greater than 0,5) • F – Distributed Rounding (Take distribution of fractions in the form of securities/ cash)

Fraction Payment Gross Rate	The payment amount, including the withholding tax and foreign tax, expected from a fraction of a share with regard to the Corporate Actions in which the Shareholder has the right to receive a payment
Fraction Payment Nett Rate	This represents the payment amount, excluding withholding tax and foreign tax, expected from a fraction of a share with regard to the Corporate Action in which the Shareholder has the right to receive a payment
Fraction Payment Withholding Tax Percentage	The percentage of local tax deducted for South African shareholders
Fraction Payment Foreign Tax Percentage	The percentage of foreign withholding tax deducted in the foreign jurisdiction, if applicable
Fraction Payment Foreign Tax Reclaim Percentage	The foreign withholding tax that can be reclaimed by South African Shareholders
Fraction Payment STC Credits per Share	Amount of STC credits applicable to the payment, in cents per share
Minimum Payment Threshold	This represents the minimum amount that will be paid out to shareholders as a fractional payment. An amount less than the specified amount may result in bank charges exceeding the payout amount. This amount is displayed in ZAC.
Source Par Value	Par Value of the source instrument or the initial par value
Resultant Par Value	Par Value of the resultant instrument or the resultant par value.

FIELD DESCRIPTIONS:

SOURCE INSTRUMENT: ISIN	This represents the ISIN (International Securities Identification Number) of the Source Instrument for the Corporate Action. This number can change
-------------------------	---

during the lifetime of an instrument e.g. when the instrument undergoes a Name Change (NC Event type)

SOURCE INSTRUMENT: ALPHA CODE

This represents the Alpha Code of the Source Instrument. The Alpha Code is a unique JSE Identification trading code of instruments on the JSE.

SOURCE INSTRUMENT: SHORT NAME

This represents the Short Name of the Source Instrument.

SOURCE INSTRUMENT: LSE TIDM

This represents the TIDM of the Source Instrument. The TIDM is a unique London Stock Exchange identifier for the instrument.

SOURCE INSTRUMENT: SUB SECTOR

This represents the Industry Sub Sector Code of the Source Instrument as determined by the ICB classification.

SOURCE INSTRUMENT: DUAL LISTED

This is an indicator which represents whether the instrument is listed on more than one exchange. Options are 'Y' or blank

SOURCE INSTRUMENT: ISSUER NAME

This represents the Issuer Name of the Source Instrument.

SALIENT FEATURE: DECLARED DATE

The date the meeting was announced in the format YYYYMMDD.

SALIENT FEATURE: MEETING DATE

The date of the meeting in the format YYYYMMDD.

SALIENT FEATURE: MEETING TYPE CODE

The Meeting Type code. Possible values are:

Code	Meaning of the code
SM	Shareholder Meeting

SALIENT FEATURE: TIME

The time of the meeting in the format HHMMSS.

SALIENT FEATURE: ANNUAL REPORT

The value is 'Y' or 'N', indicating whether there was an annual report sent out in relation to this meeting.

SALIENT FEATURE: CIRCULAR

The value is 'Y' or 'N', indicating whether there was a circular sent out in relation to this meeting.

ADDRESS

The address of the meeting.
