JSE Sustainability and Climate Disclosure Guidance

"African capital markets have a fantastic leap-frog opportunity to stimulate much needed investment in the emerging green economy. Through this initiative the JSE has an opportunity to be a big part of this."

JSE stakeholder

This paper is issued as a guidance tool that may be used by issuers on a voluntary basis to:

- Assist local companies to navigate the global sustainability and ESG landscape
- Provide for South Africa's specific sustainability challenges
- Improve the quality of sustainability and ESG information available to enable more informed investment decisions
- Drive improved sustainability performance, accountability, and business leadership.

The paper does not constitute disclosure or reporting obligations for issuers pursuant to the provisions of the JSE Listings Requirements.

A lot of 'noise' as sustainability and ESG goes mainstream

We are seeing signs of convergence, but some confusion remains

The establishment of the ISSB marks a profound change in global reporting

03 November 2021

IFRS Foundation announces International Sustainability Standards Board, consolidation with CDSB and VRF, and publication of prototype disclosure requirements

The JSE Guidance seeks alignment with the ISSB and its Prototypes....

Source: Value Reporting Foundation presentation to Good Governance Academy Colloquium (Nov 2021)

...while also seeking alignment with GRI, EU CSRD and King IV

The GRI and <IR> Framework will continue to be relevant, alongside the ISSB

Myth	Reality
ISSB diminishes GRI's important role in the sustainability reporting landscape.	 GRI is the leading global standard-setter for sustainability reporting focused on the information needs of multiple stakeholders The ISSB and GRI will co-exist, because they play different roles in the landscape We aim for interoperability between the GRI and SASB Standards. We will continue to advocate as such for ISSB Standards.
The <ir> Framework is being consolidated into the ISSB and will therefore lose relevance as a connecting framework across financial and sustainability disclosure.</ir>	 The VRF is being consolidated into the IFRS Foundation, not the ISSB. The SASB Standards map to the ISSB. The <ir> Framework is best positioned as a connecting framework between the IASB and ISSB.</ir>

Source: Value Reporting Foundation presentation to Good Governance Academy Colloquium (Nov 2021)

JSE Sustainability and Climate Disclosure Guidance has adopted "double materiality"

All organisations impact the environment and society. In turn, the environment and society affect the business and its performance. These impacts may be positive or negative and will vary in time. **Organisations report these interactions** differently depending on the intended report user. **Three broad arenas of reporting** have emerged, each of which has **different global disclosure standards and initiatives** aimed at addressing the different material interests of the report user.

Impact Materiality

All sustainability matters affected by or that affect the organisation

Sustainability reporting: targets all stakeholders seeking to understand the entity's significant sustainability impacts

Disclosure includes those sustainability topics that reflect the organisation's **most significant impacts** (positive or negative) on society, the environment, and the economy ("people, planet and prosperity") **Materiality** should be informed by science-based environmental thresholds and agreed social priorities as articulated in authoritative international instruments, global and national development objectives, and local legislative requirements

WORLD

ORUM

TCFD

Integrated reporting: targets stakeholders seeking to assess enterprise value (eg investors, lenders and creditors)

Disclosure includes a sub-set of sustainability issues that enable report users to understand the financial implications of sustainability-related risks and opportunities on enterprise value over time Materiality should be informed by the extent to which the sustainability-related information influences a users' assessments of the value, timing and certainty of the reporting entity's future cash flows, over the short, medium and long term

BIFRS

Financial reporting: targets primarily investors and capital markets

Disclosure includes monetary amounts in the financial statements reflecting the effects on enterprise value that have already taken place at the reporting date, or are included in future cash flow projections

This diagram draws on materials developed by EFRAG, GRI, CDP, CDSB, Value Reporting Foundation and IFRS

...and feedback from an initial round of stakeholder consultation

Six questions on the Sustainability/ESG Disclosure Guidance:

- 1. Is there value in the JSE issuing its own ESG Disclosure Guidance?
- 2. Should the guidance provide for 'double materiality'?
- 3. Should the Guidance include specific sustainability/ESG metrics?
- 4. If so, should it distinguish between 'Core' and 'Leadership' metrics?
- 5. Should we structure the revised metrics using the FTSE/Russell 14 themes?
- 6. Should we provide sector-level guidance?

Three questions on the Climate Disclosure Guidance:

- 1. Is there value in having separate Climate Disclosure Guidance?
- 2. Should the Climate Guidance adopt a double materiality approach?
- 3. Should climate guidance be included at a sector level?

...and feedback from an initial round of stakeholder consultation

JSE Sustainability Disclosure Guidance

Contents

Foreword

Introduction

PART 1. WHAT IS SUSTAINABILITY AND WHY REPORT ON IT?

- 1 What is Sustainability and ESG?
 - 1.1 Growing stakeholder and investor interest in sustainability performance and disclosure
- 2 Why report on sustainability? The business case for good disclosure
 - 2.1 Growing convergence in the sustainability disclosure landscape

PART 2. HOW MIGHT AN ORGANISATION APPROACH SUSTAINABILITY DISCLOSURE?

- 3 Sustainability reporting: Core concepts
 - 3.1 Materiality and different reporting formats
 - 3.2 Principles for useful sustainability data and an effective sustainability report

PART 3. WHAT SUSTAINABILITY INFORMATION SHOULD A COMPANY DISCLOSE?

- 4 Sustainability Narrative Disclosures
 - 4.1 Governance
 - 4.2 Strategy
 - 4.3 Management approach
 - 4.4 Metrics, targets, and performance
- 5 Core and Leadership Sustainability Metrics
 - 5.1 Governance Disclosure Metrics
 - 5.2 Social Disclosure Metrics
 - 5.3 Environmental Disclosure Metrics

ANNEXES

ANNEX 1: Global and regional standards and frameworks relating to sustainability disclosure ANNEX 2: The JSE Disclosure Guidance, the ISSB Protocols and the EU CSRD – A brief comparison ANNEX 3: Abbreviations and acronyms ANNEX 4: Acknowledgements Project team JSE Sustainability Advisory Committee Stakeholders

JSE Sustainability Disclosure Guidance: Narrative Disclosures and specific Metrics

Narrative Disclosures

 Guidance aligned with TCFD, SDGD, and ISSB Prototypes: Governance, Strategy, Management, and Metrics, targets & performance

Specific Sustainability / ESG Metrics

- Carefully selected set of disclosure metrics all derived from credible existing global standards and guidelines
- Include Core and Leadership metrics
- Emphasise outcome/impact metrics rather than output metrics
- Address South Africa's challenges with stronger social focus

JSE Sustainability Disclosure Guidance: Narrative Disclosures

Sustainability Narrative Disclosures

Governance

Describe the board's oversight of sustainability-related impacts, risks and opportunities, and its process for integrating sustainability issues into governance processes.

Strategy

Describe how an assessment of sustainability-related impacts, risks and opportunities has influenced the organisation's strategy, and what impact this has had on the organisation's overall performance, both positive and negative.

Management

Describe how sustainability-related impacts, risks and opportunities have been integrated into the organisation's management processes.

Metrics, targets and performance

Describe the performance metrics and targets used by the organisation to manage, monitor and manage its sustainability impacts, risks and opportunities, and its performance against these metrics and targets.

JSE Sustainability Disclosure Guidance: Narrative Disclosures

METRICS, TARGETS AND PERFORMANCE Recommended Disclosures

Describe the performance metrics and In describing its sustainability metrics, targets, and performance, the organisation should disclose targets used by the organisation to the following information: measure, monitor and manage its The metrics and targets used to measure, monitor and manage the organisation's performance sustainability impacts, risks and against its material sustainability-related impacts, risks and opportunities, including any crossopportunities, and its performance industry, sector-based and entity-specific activity metrics. against these metrics and targets. The methodologies used to calculate or estimate the metrics and targets, where this is not immediately apparent. The nature of its sustainability targets, including where relevant: (i) whether the target is absolute, normalised, intensity, or activity-based (ii) the timeframe over which the target applies (iii) the base period from which progress is measured (iv) any milestones or interim targets. The nature of any changes to metrics or targets, explaining the reasons for these changes, including (where practical and appropriate) any restated comparative figures. A response to each of the Core Metrics listed in the JSE Disclosure Guidance, or a description as to why these are not disclosed and/or not seen to be material, and what steps are being taken to start disclosing those that are material. The organisation's performance against its sustainability metrics and targets, with provision for a suitable historical period to allow for trend analysis.

JSE Sustainability Disclosure Guidance: Core and Leadership metrics

In the final publication the following details will be provided on each metric:

- Description of the Core or Leadership metric
- How the metric is measured
- The rationale for disclosure
- Reference to existing standards and frameworks

LABOUR STANDARD)S
Diversity and Inclusion	1. Percentage of employees per employee category, by race, gender, age, and other indicators of diversity
CORE	2. Number of reports of discrimination and harassment incidents, investigation status of reported incidents, and actions taken and the total amount of monetary losses as a result of legal proceedings associated with (1) law violations and (2) employment discrimination
How is it Measured	 Quantitative metric – % of employees by category # and description
Context/Rationale	Organisations with higher levels of diversity, particularly within executive teams, are generally better able to innovate, attract top talent, improve their customer orientation, enhance employee satisfaction, and secure their license to operate. To be effective, organisational culture should be built on a foundation of respect, courtesy, and professionalism, free from any acts of discrimination, bullying or harassment.

EXECUTIVE SUMMARY

A MESSAGE FROM THE JSE

INTRODUCTION

CHAPTER 1: CLIMATE DISCLOSURE - SETTING THE STAGE

- 1.1 Key trends
- 1.2 What is the TCFD? 1.3 How to get started
- 1.4 Differential reporting
- 1.5 The intended audience for this guidance

CHAPTER 2: RISKS AND OPPORTUNITIES

2.1 Climate opportunities 2.2 Climate risks 2.3 Climate governance 2.4 Materiality assessment 2.5 Scenario analysis 2.6 Just transition

CHAPTER 3: DISCLOSURE CONTENT

- 3.1 Investor-useful information
- 3.2 Reporting on opportunities and use of taxonomies
- 3.3 Carbon emission reporting
- 3.4 Setting targets

CHAPTER 4: DISCLOSURE PRESENTATION AND VALIDATION

- 4.1 Frameworks for disclosure
- 4.2 Data verification and assurance
- 4.3 Location and timing of climate-related disclosure

CHAPTER 5: EDUCATION AND RESOURCES

5.1 Resources for updating scientific knowledge

ANNEX 1: TCFD CHECKLIST

ANNEX 2: ALIGNMENT OF RECOMMENDED DISCLOSURES WITH OTHER FRAMEWORKS ANNEX 3: RECENT STUDIES ON POTENTIAL AGGREGATED FINANCIAL IMPACTS OF CLIMATE CHANGE

Final Report

the Task Force on Climate-related Financial Disclosures

TCFD Increase on content

Closely aligned with SSE Model Guidance with following revisions:

- Shortened the document to enhance access and value, but retained same structure
- Updated to provide for recent global and national trends, including work undertaken by National Treasury, and King IV Guidance paper
- Adopts double materiality a departure from TCFD, but aligned with EU regulatory developments, and informed by King IV Guidance paper and Sustainability Disclosure Guidance
- Specific section on Just Transition to provide for South Africa's social challenges

Final Report Recommendations of the Task Force on Climate-related Financial Disclosures

Table 1.1 TCFD recommendations and Supporting Recommended Disclosures

Recommendations and Supporting Recommended Disclosures

Governance	Strategy	Risk Management	Metrics and Targets
Disclose the organization's governance around climate related risks and opportunities.	Disclose the actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning where such information is material.	Disclose how the organization identifies, assesses, and manges climate - related risks.	Disclose the metrics and targets used to assess and manage relevant climate - related risks and opportunities where such information is material.
Recommended Disclosures	Recommended Disclosures	Recommended Disclosures	Recommended Disclosures
Describe the board's oversight of climate-related risks and opportunities Describe management's role in assessing and managing climate- related risks and opportunities	Describe the climate-related risks and opportunities the organisation has identified over the short, medium and long term Describe the impact of the climate- related risks and opportunities on the organisation's businessess, strategy and financial planning Describe the resilience of of the organisation's strategy, taking into consideration different climate - related scenarios, including a 2°C or lower scenario	Describe the organisation's processes for identifying and assessing climate-related risks Describe the organisation's processes for managing climate- related risks Describe how processes for identifying, assessing, and managing climate -related risks are integrated into the orgabisation's overall risk management	Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material Disclose Scope 1, Scope 2, and, if appropriate, Scope 3 greenhouse gas (GHG) emissions, and the related risks Describe the target used by the organisation to manage climate - related risks and opportunties and performance against targets

 a) Metrics used to assess climate-related risks and opportunities in line with its strategy and risk management process 					
ALL	What are the key metrics used to measure and manage the climate-related risks and opportunities found in table 1 and 2 of the TCFD recommendations?				
ALL	Where climate-related issues are material, are related performance metrics incorpo- rated into remuneration policies?				
ALL	What internal carbon prices are used for measuring impact and setting targets?				
ALL	What climate-related opportunity metrics such as revenue from products and ser- vices designed for a lower-carbon economy are used?				
Banks	To what extent is lending and other financial intermediary business activity aligned with a well below 2°C scenario?				
Insurance	What is the aggregated risk exposure to weather related catastrophes of the organi- sation's property business (i.e., annual aggregated expected losses from weather-re- lated catastrophes) by relevant jurisdiction?				
Insurance	To what extent are insurance underwriting activities aligned with a well below 2*C scenario?"				
Asset Manager	What metrics are used to assess climate-related risks and opportunities in individual funds or investment strategies, and how do these metrics change over time?				
Asset Manager	What metrics are used to assess climate-related risks and opportunities in each product or investment strategy, and how do these metrics change over time?				
Asset Owner + Managers	To what extent are assets owned or managed or funds and investment strategies, where relevant, aligned with a well below 2°C scenario?				
b) Scope	1, Scope 2, and, if appropriate, Scope 3 greenhouse gas (GHG) emissions, and the relat

ALL

Banks	What are the GHG emissions for lending and other financial intermediary business activities where data and methodologies allow for calculation?	
Insurance	What is the weighted average carbon intensity or GHG emissions associated with commercial property and speciality lines of business, where data and methodologies allow for calculation?	
Asset Owner	What is the weighted average carbon intensity, where data are available or can be reasonably estimated, for each fund or investment strategy?	
Asset Manager	What is the weighted average carbon intensity, where data are available or can be reasonably estimated, for each product or investment strategy?	
Asset Owner + Managers	What are the GHG emissions for assets owned or under management, where data and methodologies allow for calculation?	
c) Targets	used to manage climate-related risks and opportunities and performance	
ALL	What are the key climate-related targets such as those related to GHG emissions, water usage, energy usage, etc. in line with anticipated regulatory requirements or market constraints or other goals? What are the long-term quantitative targets for reducing GHG emissions? What interim targets have been set? Are targets consistent with cross-industry, climate-related metric categories?	
ALL	Does the organisation have climate-related targets pertaining to: efficiency or financial goals, financial loss tolerances, avoided GHG emissions through the entire product life cycle, or ent revenue goals for products and services designed for a lower-carbon economy?	
ALL	Are climate-related targets absolute or intensity based?	
ALL	What time frames are applied to each climate-related target?	
ALL	What is the base year used for each climate-related target?
