| 30 Jul – 10 Aug 2018 | ETE Testing – Cycle 3 Scripted passed two dress rehearsals | 5 |
| 13 Aug – 17 Aug 2018 | Prep for Dress Rehearsal; data clean up and full position take on | |
| 18 Aug 2018 | ETE Dress Rehearsal – mandatory for all clients PLEASE NOTE: Mandatory for all clients | |
| 20 Aug – 4 Sep 2018 | ETE Testing – Cycle 4 Scripted | |
| 8 Sep 2018 (TBC) | JSE deploys RTC/VIS/CIS into production | |
| 15 Sep 2018 | Go-Live Ready Dress Rehearsal – mandatory for all clients | |
| 8 Oct 2018 | Targeted Go-Live Date | |
| 12 Nov 2018 | | ATE RATE |

ITaC Agreements – cutoff dates

- JSE Services Agreement (JSA)
 - Signed JSA is required to access all production and test services including the End-To-End environment
 - JSA must be signed by Friday, 27 July 2018 which is prior to the start of Scripted End-To-End testing on Monday, 30 July 2018 whether participating in ETE or not
- JSE Data Agreement (JDA)
 - Signed JDA is required to access all market data (live, intra day or EOD)
 - JDA must be signed by Friday, 27 July 2018 for clients wishing to participate in Scripted End-To-End testing which starts on Monday, 30 July 2018
 - JDA must be signed by 31 August 2018 for all other clients not participating in ETE testing

ĴSΞ

Instruments created intra day

Live information subscribers and SW providers experiencing difficulties processing transactions on these instruments prior to receiving reference data files on IDP. Even though this change affects all market participants, it has been requested by the market to solve intra day instrument creation issues. The JSE expects to deploy this change for clients to test prior to the 18 Aug dress rehearsal and will also be tested in the dress rehearsal. Software providers engaged to date have indicated they will accommodate this change without impacting the targeted go-live. Deployment date is scheduled for 6 Aug 2018 into CTS and ETE.

• Trader name on Trading Members' Trader ID file

• The JSE provides a Trader ID file to all trading members but the file does not contain the name field. Software providers have requested the field to be added to assist in managing trader permissions. **Deployment date is scheduled for 30 July 2018.**

• Change month end interest calculation in RTC

 ETE month end testing highlighted that the RTC system calculates month end interest differently than the current market convention where the start of the next calendar month is on a weekend. This change will be deployed in ETE for the August month-end (Cycle 4) as this is not applicable for the July month end.

- Change JSE billing calculations to cater for changed month end interest calculations
 - ETE month end testing highlighted that the RTC system calculates month end interest differently than the current market convention and a change to RTC requires a change to JSE billing system. This change will be deployed in ETE for the August month-end (Cycle 4) as this is not applicable for the July month end.
- Capture commissions on behalf of branches
 - Software provider requested to be able to capture commissions on behalf of branches. If a member has many branches then the current solution is very cumbersome and requires a separate log in for each branch. **Deployed into CTS and ETE on 24 July 2018.**
- Default exercise style of options created by Trading Members
 - When creating an option instrument intra day, the requirement is to default the exercise style for options according to the Market i.e. American for EDM and European for FXM to assist in more efficient processes. **Deployment date in CTS and ETE is scheduled for 10 Aug 2018.**
- RTC correct the remaining quantity field on the trade sub-message in specific scenarios
 - Correct the way in which the remainingQuantity field (13) of the Trade sub message (10015) of the Account Position Event message (10032) and Account Trade Event (10141) is updated in specific scenarios, namely when an assign or tripartite allocation is accepted by the counterparty. After the patch, the remaining quantity of the trade being given up will no longer be updated. Deployment date in CTS and ETE is proposed for evening of 26 July 2018.

Agenda

- ITaC Key Dates
- ITaC Planned Functional Changes
- ITaC End-To-End (ETE) Testing update
 - ETE Documentation

End-To-End (ETE) Documentation

JS≣

• ETE testing documentation

call to

Action!

- All documentation required for ETE testing is available on the JSE website under the section "End-To-End Testing"
- <u>https://www.jse.co.za/services/itac#EndToEndTestingDocumentation</u>
- ITaC End-To-End Testing Overview
- E2E Cycle 2 Runplan Scenarios
- ITaC Non-Live Information Subscriber End-To-End Test Plan
- ITaC Guidance Note on ETE testing *New
- JSE ETE Trading and RTC Schedule *New
- IDP Connectivity Document for ITaC NLMD ETE

Weekly testing feedback is required from all participants – please flag relevant scenarios in the <u>E2E Cycle 2 Run Plan Scenarios</u> with related test results and feedback and send this through to your JSE buddy at the end of each week of ETE testing

Status Update – ETE Testing Cycle 2: Week 1

JS≣

- Overall:
 - Trading members still have low participation
 - Some new defects have been raised against software provider and JSE systems which proves that ETE testing is important

• Statistics

- Orders: 3314 orders submitted by 21 members
- Trades: 2418 trades submitted by 27 members
- Subscription Services: 238 Files produced

• There was no testing on 18 July 2018

- There was no End-To-End testing for trading members or information subscribers for 18 July 2018. Testing resumed on 19 July 2018.
- The JSE encountered issues with balancing to clearing members on 17 July 2018 which was caused by some unrealistic volumes and prices in the JSE trades that were played on 17 July 2018.

Status Update – ETE Testing Cycle 2: Week 2

- Information Subscribers
 - Live Market Data
 - 3 clients enabled for live market data access
 - Access to ETE environment via International Access Point enabled
 - Non-Live Market Data
 - NLMD Data files are made available each day
 - Enabling of new testing participants is still continuing
 - Data Subscribers that have not yet firmed up data record subscriptions should make use of the ETE testing phase to make final decisions
 - Clients have raised a few defects which the JSE is addressing

Status Update – ETE Testing Cycle 2: Week 2

• Clearing Members

JS≣

- Clearing Member Reports (Internal and external)
 - Clearing Members should be issuing daily reports to their clients please notify your JSE buddy if you are not receiving these
 - Clients should also log any problems with their reports directly with their Clearing Members
 - A formal status reporting mechanism of report testing by clearing members has been implemented
 - The reporting structure will track readiness of all reports that are part of the agreed scope on a weekly basis to ensure quality and readiness on an ongoing basis

Clearing Member balancing

- Two issues have delayed progress on daily balancing in the end to end environment requiring a reference and transactional data refresh for Clearing Members
- In the weeks prior to the above issues consistent daily balancing between JSE and Clearing Members was achieved
- Specific Events
 - Successful processing of an Equity Derivatives closeout and a currency expiry
 - Successful processing of a special dividend corporate action
 - Successful processing of intraday created option instruments in respect of the currency expiry

End-To-End (ETE) Testing – High Level Plan

JS≣

- Structured ETE testing test specific identified scenarios and events on specific days
 - Any additional scenarios or trades that are required to be included in Cycle 3 should be submitted by no later than 12h00 Wed, 25 July 2018

Structured ETE

Cycle 1 Complete

26 June – 6 July 2018

Week 1 Complete

Cycle 2 – Week 1

16 - 20 July 2018

Week 2 WIP

Cycle 2 – Week 2

23 – 26 July 2018

Week 3 Coming Up

Cycle 3

30 Jul – 10 Aug 2018

High level plan

By 09h00 Standard JSE trade pack processed by JSE

07h15 – 13h30 Execute On Book trading. Report Off Book trades. Generate user created instruments and trade on these. Process live market data.

07h30 – 13h30 Perform deal management activities

13h35 – 16h00 End of day procedures and balancing with Clearing Members

To Note:

Trading Members to perform an Own Order Book and / or Own Trade Book Download to synchronise JSE generated trades in their system.

Live market data subscribers to verify multicast data.

Perform deal management and your own internal downstream integration testing

NLMD files available from ~20h00 (check next business day)

End-To-End (ETE) Testing - Cycle 3

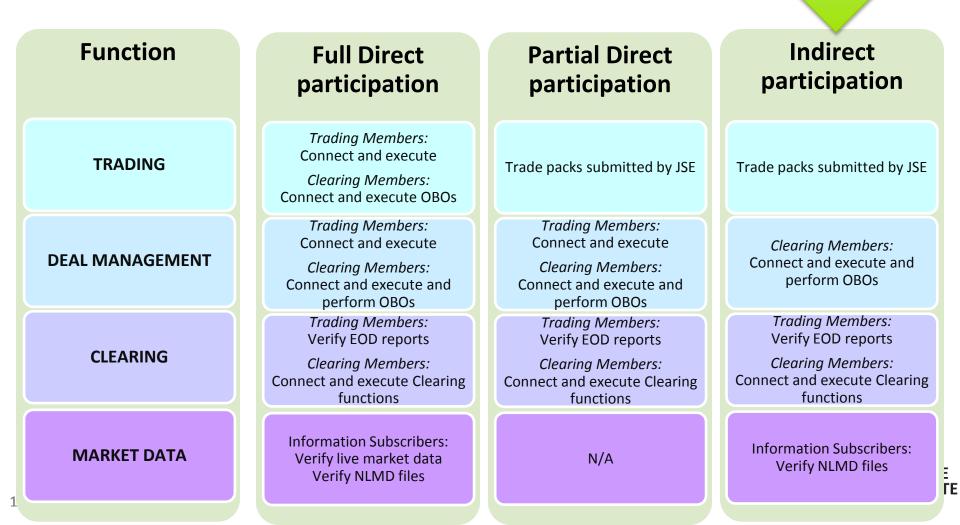

| Start Date: End Date: | 30 July 2018 10 August 2018 | JJE | |

GKUW

End-To-End (ETE) Testing – Cycle 3

 Cycle 3 Scripted ETE testing – ring fenced with specific data and functionality on specific days with specific expected outcomes as well as other testing along side Trading Members who do not have physical environments to participate and signoff reports

End-To-End (ETE) Testing – Cycle 3

JS≣

- JSE Run Plan will be issued Friday, 27 July 2018
 - Please note all the specific event dates and monitor communication page

• Trading Members

- Mandatory Indirect Participation required for Cycle 3 & 4
- JSE Trade pack will cover a few trades for each trading member
- Please ensure you get your reports from your clearing members on a daily basis and verify accuracy and completeness and notify your JSE buddy if you are not receiving these
- Log any problems with your reports directly with you Clearing Member
- Attend conceptual training
- Engage your software provider on any issues logged and ensure issues are closed out to your satisfaction
- Information Subscribers
 - Receive files on a daily basis and verify accuracy and completeness and notify <u>MDSupport@jse.co.za</u> if you have any issues or defects to raise

End-To-End (ETE) Testing

JS≣

- ETE Communication
 - Monitor ETE testing status and progress via the ITaC communication webpage here:
 - <u>https://www.jse.co.za/services/itac-communications-page</u>
- Helpline for support of all enablement or issues experienced during ETE testing?
 - Contact Client Service Centre (CSC) on <u>CustomerSupport@jse.co.za</u> or +27 11 520 7777

Submit your feedback to the JSE at the end of each week!

End-To-End (ETE) Testing - Cycle 4

| Start Date: | 20 August 2018 |
|-------------|------------------|

Dress Rehearsal Observations / Issues

JS≣

Trading

- Off Book Trade Reporting
 - Submission, accept, reject, withdrawal and cancellation
- Anyday contract creation
- Segregation of permissions on front ends
- Multiple expiry dates for same CFD

Post-trade

- Client maintenance and specifically adding a new local /foreign client
- Commissions two software providers solution not working effectively
- Bulk Upload
- AccountPosition Event add market identifier

Live Market Data

- Excessive re-requests issued and account's locked out
- Multicast data flow and configuration
- On replay/recovery technical timeouts/disconnects experienced
- Instrument reference data recovery having to recover post a system failure

Overall Dress Rehearsal Results

12 May 2018

| Correct Market | Correct Instrument Type | Suspend/Halt | No trading session | Future | Option |
| 99% | 99% | 99% | 94% | 8% | 9% |

- Average (not weighted) Trading Member results across both EDM and FXM both technical and functional results
- Reference Data downloads and reference data management consistent across the dress rehearsals
- User created instruments slight improvement clients are still familiarising themselves with this process more testing is required and this will be one of the key objectives for end to end testing

| No. of Trading Members who were mandated to test on 14 July | No. of Trading Members who passed 14 July | No. of Trading Members who did not pass 14 July |
|-------------------------------------------------------------------|----------------------------------------------|----------------------------------------------------|
| 52 (EDM) | 42 | 10 |
| 44 (FXM) | 27 | 17 |

| No. of Trading Members have passed 2 dress rehearsals | No. of Trading Members that have passed 1 dress rehearsal | No. of Trading Members who have not passed a dress rehearsal |
|----------------------------------------------------------|-----------------------------------------------------------|--------------------------------------------------------------------|
| 53 (EDM) | 11 | 4 |
| 30 (FXM) | 15 | 9 |

Key areas of concern:

- Trade Cancellations
- Commissions
 - Some software providers had issues on the day which impacted overall commissions functionality
 - Population of reference fields is much better, some issues still to be ironed out
- Understanding of AM (At Market) order type

Post-trade MDR Results Summary

- Average Post-trade (deal management) results for Trading Members only
- % Met is derived on this **minimum set of criteria** relevant to the business of the firm

| Category | Function | 12-May | 26-May | 14-Jul |
|---------------------|--------------------------|--------|--------|--------|
| Trade Feed into RTC | Receive Trades in RTC | 100% | 100% | 100% |
| | Accumulate | 79% | 73% | 92% |
| | Allocate | 66% | 63% | 70% |
| Deal Management | Allocate Correction | 37% | 33% | 37% |
| | Assign | 67% | 60% | 75% |
| | Tripartite Allocation | 22% | 6% | 28% |
| | Principal Correction | 24% | 31% | 43% |
| | Trade Sub Account Mod | 51% | 50% | 66% |
| | Position Sub Account Mod | 24% | 31% | 38% |
| Position Management | Option Exercise | 37% | 46% | 46% |
| | Position Abandon | 33% | 38% | 38% |
| | New Commission | 67% | 60% | 59% |
| Commissions | Cancel Commission | 38% | 33% | 25% |
| | Reject Commission | 28% | 17% | 54% |

• Stats above are simply number of members that successfully performed a function as a percentage of total number of members and do not consider whether the function is applicable or not to the members' business

· Commissions stats above do not factor whether commission reference fields were correctly populated

• Includes all trading members even if not active or deal management outsourced to clearing member

25

| No. of Trading Members who were mandated to test on 14 July | No. of Trading Members who passed 14 July | No. of Trading Members who did not pass 14 July | |
|-------------------------------------------------------------------|----------------------------------------------|----------------------------------------------------|--|

* includes those where the clearing member does the On-Behalf-Ofs

Agenda

- ITaC Key Dates
- ITaC Planned Functional Changes
- ITaC End-To-End (ETE) Testing update
 - ETE Documentation
 - ETE Cycle 2 status update
 - ETE Cycle 3 scope, approach and participation requirements
- ITaC Dress Rehearsal 14 July 2018 results feedback
- ITaC User Readiness reports
- ITaC Guidance Notes
- Questions?

- Of the 70 trading member clients we are tracking, 41 clients returned Certain User readiness reports as at 13 July 2018
- Remaining 28 trading member clients are reflected as "Ready for Go-Live" as they did not submit their reports JSE will engage these clients
- Of the 41 clients the following areas need attention:
 - JSE Remote Disaster recover connectivity testing
 - Trader ID and CompID set up and permissions for clearing members
 - IDP credentials verification
 - Client technical changes i.e. downstream to members
 - Client education by members on ITaC changes
 - Operational readiness by members
 - 76% will be ready by go-live JSE will engage clients to address remaining clients
