CURRENT TRENDS IN BOND FUTURES ACTIVITY

Bond Futures tend to be traded as term instruments which results in large volumes trading around expiry dates and lower volumes in other periods. This manifests as a “see-saw” activity in the monthly volumes. Rolling 3m Average activity allows us to observe smoother trends.

Bond Futures Trends: Contracts Traded and Open Interest

Bond futures trends (based on 3m rolling avg contracts traded) trending downwards but remain higher than 2022 levels. Open Interest in 2023 declining after a long upward trend since Sep-21.
