Data classifications:

Live ➡ Snapshot ➡ Delayed ➡ End of day

Terms and conditions of use

Terms and conditions of use

A live snapshot licence holder must

| Control access to live snapshot requests. | → | Track the number of snapshot requests per end user. | → | Report the number of requests to the JSE on a monthly basis for billing purposes. |

Snapshot data may not be automatically provided/sent to an end user without the end user requesting the data. The end user has to request access to the live data. (The request can be interactive/manually requested/refresh/click).

Live snapshot functionality is licensed separately per market/data type (EQM/ EDM/ CDM/ FXM/ indices).

Terms and conditions of use

A snapshot distributor may provide unlimited snapshots per data type to an end user per month and only a maximum/capped amount will be charged per data type for that end user.

Snapshot billing per end user cannot exceed the cost of a live terminal for the specific data type.

Different snapshot capping limits apply for professional and non-professional end users per data type.
