<b>Determination of final cash settlement value</b>	<p>The final settlement price for <b>cash settlement</b> of the contract will require two components, a CME Group settlement value and a Dollar Rand exchange rate.</p> <p>The CME Group settlement value will refer to an average of <b>15 iterations</b> referencing trades in the underlying derivative contract, taken every 1 minute for a period of 15 minutes ending 10h00 New York time (SA Summer: 16h46 – 17h00 and SA Winter: 15h46 – 16h00) on the business day aligned to the currency futures expiry date.</p> <p>The Dollar Rand exchange rate required to determine the final settlement price in South African Rands will be the same rate as calculated for the applicable currency futures contract, namely: a 5 minute process with iterations recorded every 30 seconds where the last spot trade within the 30 second interval will be recorded and then averaged over the 5 minute period. The close out process will run from 09h55 to 10h00 New York time. The expiry day will be two business days prior to the 3rd Wednesday of the expiry month (or the previous business day if that day is a public holiday).</p> <p>The two variables are calculated to 4 decimals and rounded off to 2 decimals for the final Rand settlement value.</p> <p>The final calculated Rand settlement value will be publish via the trading system (NUTRON) and included in the end of day settlement prices <u>on expiry day</u>.</p>
