1 October 2023 – 30 September 2024 R1.30/t/day

1 October 2024 – 30 September 2025 R1.36/t/day

The JSE will aim to ensure the maximum daily outstanding storage rate, grade discounts and location differentials are finalized by mid-September each year. Note that the PPI figure as published at the end of July will be referenced for maximum daily outstanding storage rate adjustments.

Wheat Grade Discounts

Details of the methodology outlined below:

- An arithmetic average of the near dated December expiry daily mark-to-market (mtm) for the JSE wheat (WEAT) futures contract will be referenced*
- A six-month reference period will be applied commencing from and including 15th March each year (if this is not a business day, the first business day prior)*
- The rate will be finalized including mtm data on the 15th of September each year (if this not a business day, the first business day prior)*
- The December WEAT expiry is the only expiry month considered in the methodology*
- Once the average futures price is calculated for the period for the par base grade, then grade adjustments as per table 2 below will be applied to this value to determine prices for the Super, B2 and B3 wheat grades for the next marketing season; and*
- The final grade adjustment will be rounded off to the closest R1 interval*
